Sixth Annual Employment- Unemployment Survey Report

(Since 1920)

**Government of India
Ministry of Labour & Employment
Labour Bureau**

Report on
Sixth Annual
Employment - Unemployment
Survey
(2016-17)

GOVERNMENT OF INDIA
MINISTRY OF LABOUR & EMPLOYMENT
LABOUR BUREAU

Foreword

The experience of countries that succeeded in reducing poverty significantly indicates the importance of high rates of economic growth in achieving this. High growth, alone, is not a sufficient condition for poverty reduction; the pattern and sources of growth as well as the manner in which its benefits gets distributed are equally important from the point of view of achieving the goal of poverty reduction. In this context, employment plays a key role in all developing countries. Indeed, countries which attained high rates of employment growth alongside high rates of economic growth are also the ones who succeeded in reducing poverty significantly.

Labour Bureau has been entrusted with the task of conducting Annual Employment-Unemployment Survey in the country. The first such survey was conducted in 28 States/UTs by covering 300 districts in the country during the year 2010. The second, third, fourth and fifth Annual Employment-Unemployment Surveys were more comprehensive in terms of coverage as well as parameters estimated. These surveys were conducted in all the States/UTs by covering all the districts in the country.

The present Sixth Annual Employment-Unemployment Survey has been conducted during the period August, 2016 to March, 2017 in all the 36 States/UTs by covering all the districts in the country. A moving reference period of last twelve completed months from the date of survey is used to derive various estimates of labour force and its derivatives.

Considering the importance of the labour force parameters and demands from different various quarters under the Sixth Annual Employment-Unemployment Survey report 2016-17 the integrated report has been prepared dealing with important parameters namely Labour Force Participation Rate, Worker Population Rate, Unemployment Rate based on Usual Principal Status Approach and Usual Principal & Subsidiary Status Approach, distribution of employed persons by different activity for different age groups viz. 15-17 years, 18-29 years and 30 Years & above, vocational training and main activity pursued, educational level and main activity, type of formal and non-formal training attained for various social groups.

6th Annual EUS Report 2016-17

In addition considering the demand of district level estimates for decentralized planning, Labour Bureau has worked with four States/UTs namely Maharashtra, Telangana, Andhra Pradesh and Puducherry. These States/UTs have covered matching samples along with Labour Bureau main survey. After pooling the samples, the district level estimates for these States/UTs are also a part of Sixth Annual Employment-Unemployment Survey 2016-17.

There have been many hurdles in completing the survey on time. Despite all such hurdles, the survey was successfully completed mainly because of the hard work put in by the dedicated staff and officers of the Labour Bureau. Without such support and co-operation from the State Governments it would have been very difficult to undertake such survey.

I would like to express my deep appreciation for the constant support received from the State Governments, especially their Directorates of Economics & Statistics (DES), despite the acute shortage of staff and officers, faced by them. My thanks are also due to the National Sample Survey Office (Field Operation Division) for timely making available the Urban Frame Survey maps of the sample urban blocks for use in the survey.

The Expert Group set up under the able Chairmanship of Prof. S. P. Mukherjee meticulously designed the sample design, schedules and instruction manuals and deliberated at length on the findings of the survey at various stages. This report is the product of the efforts put in by the Committee members, in general and Prof. S. P. Mukherjee in particular. Without his constant guidance and enthusiasm the survey would not have progressed at such a pace. I have no hesitation in admitting that the errors or inadequacies in the Report are however entirely due to the limitations of the Labour Bureau. Last but not the least; Labour Bureau is grateful to the Ministry of Labour and Employment for reposing its faith in the Labour Bureau to conduct such a massive exercise at All-India level.

Report on Sixth Annual Employment - Unemployment Scenario

Foreword

Executive Summary i-vii

Chapter-I Labour Force Parameters under various Annual Employment Unemployment Surveys 1-10

Chapter-II Significance of Employment Statistics 11-22

Chapter-III Household Characteristics 23-36

Chapter-IV Labour Force Estimates 37-61

Chapter-V Labour force parameter based on Age, Social group, Education & Skill 62-85

Annexure I Concepts and Definitions 1-7

Annexure II Sampling Design & Estimation Procedure 8-15

Annexure III Projected Population 16-17

Annexure IV Tables (1 to 43) 1-456

Annexure V Constitution of Expert Group i-ii

EXECUTIVE SUMMARY

INTRODUCTION

- The Present Report pertains to the Sixth Annual Employment-Unemployment Survey conducted by the Labour Bureau.
- The survey was conducted in all the States/UTs and covered all the districts.
- Field work was executed during August, 2016 and March, 2017.
- A total of 1,56,429 households including 88,701 in rural areas was covered.
- Information could be collected in respect of 7,76,171 household members, out of whom 4,44,730 belonged to rural households and the rest 3,31,441 to urban households.
- A moving reference period of last twelve months from the date of survey was used to derive the usual activity status (both principal as also principal and subsidiary) of an eligible person. (Persons in the age-group 15 + are taken as eligible).
- Going by the survey results, 42.1 per cent households belonged to the OBC category followed by 29.2 per cent under the 'others' category, 19.2 per cent under SC category and 9.4 per cent under the ST category.
- Three major indicators of the employment-unemployment situation prevailing during the survey period viz. Labour Force Participation Rate (LFPR), Worker Population Rate (WPR) and Unemployment Rate (UR) have been analysed in this Report. Differentials for gender, age-group and social group have also been revealed.

OVER-ALL PICTURE

- The estimated total number of workers stood at 41.84 crores as against a total of 40.03 crores during the fifth round, implying an increase of 2 crores approximately. The total number of self-employed persons

increased from 18.64 crores in the fifth round to 20.63 crores during the sixth round. However, the increase in the number of regular wage / salaried employees was somewhat smaller viz. 0.72 crore during the intervening period. Further, the number of casual and contract workers declined from 14.58 crores to 13.68 crores. It appears that the self-employment sector has grown remarkably during the year between the fifth and sixth rounds.

- The Unemployment Rate in the age-group 18-29 was 10.2 per cent under UPS approach in 5th Employment Unemployment Survey (EUS), however, in 6th EUS this age group (18-29) is separated into two parts first (18-24) and other (25-29). The Unemployment Rate under 6th EUS in the age group (18-24) is 20.8 per cent and the same for age group (25-29), it is 9.2 per cent. The rate of unemployment among people with graduate-level or higher qualifications has remained more or less constant at 15.9 per cent.
- The worker-population rate has increased by about one per cent.

LABOUR FORCE PARTICIPATION RATE

- Labour Force Participation Rate (LFPR) denoting persons aged 15 years and above either working or available/seeking work, was estimated to be 51.2 per cent and 52.8 per cent under the UPS & UPSS approaches respectively at All India level during the reference period.
- LFPR for different categories based on UPS approach is as below:

Sector	All India (in per cent)			
	Male	Female	Transgender	Person
Rural	77.5	26.0	69.3	52.8
Urban	73.5	19.4	36.5	47.2
Rural + Urban	76.4	24.1	61.2	51.2

- In the rural sector, LFPR estimated on the basis of UPS as well as UPSS came out to be higher than the corresponding estimates for the

urban sector. This difference is true for both males and females. One possible explanation for this phenomenon is that in rural areas more young persons seek jobs or are already on jobs rather than enrolling themselves for higher education.

- Female LFPR was significantly lower as compared to LFPR among males. At All India level, female LFPR was estimated to be 24.1 per cent as compared to 76.4 per cent for males. The male-female difference was a bit higher in urban areas, again possible because more females join higher education programmes in urban areas.
- Labour Force Participation Rates according to UPS and UPSS approaches for different age groups are as under:

All India (in per cent)				
Approach	15-17 Years	18-24 Years	25-29 Years	30 Years & above
UPS	7.3	38.5	61.3	58.9
UPSS	8.2	40.1	63.0	60.5

- Labour Force Participation Rate was the highest in the age group 25-29 years 61.3 per cent followed by age group 30 years & above 58.9 per cent and lowest among the age group 15-17 years under UPS approach. Further, the same trend was observed under UPSS approach with age group 25-29 years having highest LFPR of 63.0 per cent and lowest for age group 15-17 years 8.2 per cent.
- Labour Force Participation Rates for different social groups based on UPS and UPSS approach are as under:

All India (in per cent)				
Approach	SC	ST	OBC	Others
UPS	53.3	56.6	51.6	47.7
UPSS	55.2	59.1	53.0	48.9

- Going by both UPS and UPSS approaches, LFPR for each of the social groups SC, ST and OBC is higher than that in the 'Others' (general) category. Female LFPR was significantly lower in all social groups as compared to LFPR for male category under the Usual Principal Status approach. At All India level, the highest LFPR of 77.8 per cent among males was found under SC category, whereas for females highest LFPR was estimated to be 33.7 per cent under ST category.

WORKER POPULATION RATE

- The Worker Population Rate (WPR) i.e. working population aged 15 years & above was estimated to be 48.5 per cent and 50.7 per cent at the All India level under the UPS and UPSS approaches respectively. WPR for different categories based on UPS approach is as below:

Sector	All India (in per cent)			
	Male	Female	Transgender	Person
Rural	74.1	23.9	67.5	50.1
Urban	70.3	16.8	35.7	44.3
Rural + Urban	73.1	21.9	59.6	48.5

- As somewhat expected from LFPR differentials, the number of workers per hundred eligible males is much higher than the corresponding figure among females. Also to be noted is the fact that figures for rural population exceed those for urban population.
- The female WPR was estimated to be 21.9 per cent at the All India level under the UPS approach as compared to the male WPR of 73.1 per cent and 59.6 per cent for transgenders.
- The Worker Population Rates for different age groups by two different approaches are as under:

6th Annual EUS Report 2016-17

Approach	All India (in per cent)			
	15-17 Years	18-24 Years	25-29 Years	30 Years & above
UPS	5.9	30.5	55.6	58.0
UPSS	7.2	33.6	58.6	60.0

- Worker Population Rate was the highest among age group 30 years & above 58.0 per cent followed by age group 25-29 years & above 55.6 per cent and lowest among age group 15-17 years 5.9 per cent under UPS approach. Further, the same trend was observed under UPSS approach with age group 25-29 years having highest WPR of 58.6 per cent and lowest for age group 15-17 years 7.2 per cent.
- The Worker Population Rates for different social groups based on UPS and UPSS approach are as under:

Approach	All India (in per cent)			
	SC	ST	OBC	Others
UPS	50.6	53.7	48.7	45.1
UPSS	53.2	57.4	50.9	46.7

- The Worker Population Rate (WPR) in rural areas was higher as compared to the urban areas. The highest WPR was 55.0 per cent registered in the rural areas for ST Category whereas it was found that WPR was the highest at 46.3 per cent in urban areas for SC category, based on UPS approach.

UNEMPLOYMENT RATE

- The Unemployment Rate relating to persons aged 15 years and above who were available for work but could not get work was estimated to be 5.4 per cent at the All India level under the UPS approach during

the reference period. Taking into account subsidiary economic activity, this rate comes down as expected.

- Unemployment Rates for different categories based on UPS approach are given below:

Sector	All India (in per cent)			
	Male	Female	Transgender	Person
Rural	4.3	8.0	2.7	5.2
Urban	4.3	13.2	2.2	6.1
Rural + Urban	4.3	9.2	2.6	5.4

- In rural sector, unemployment rate was 5.2 per cent whereas in urban sector, the unemployment rate was 6.1 per cent under the UPS approach.
- The Unemployment rate was significantly higher among females as compared to males. At the All India level, the female unemployment rate was estimated to be 9.2 per cent, whereas for males it was 4.3 per cent (under the UPS approach).
- In urban areas, the female unemployment rate was estimated to be as high as 13.2 per cent.
- The Unemployment Rates for different age groups by two different approaches are as under:

Approach	All India (in per cent)			
	15-17 Years	18-24 Years	25-29 Years	30 Years & above
UPS	19.1	20.8	9.2	1.5
UPSS	12.5	16.2	7.0	0.8

- The Unemployment Rates for the age group 15-17 years, 18-24 years were estimated at 19.1 & 20.8 per cent respectively. For the age-group 30 years and above, the unemployment rate is estimated to be as low

as 1.5 and the figure goes further down to 0.8 if we adopt the UPSS approach. Figures for the age-group 25-29 are not that encouraging.

- The Unemployment Rates for different social groups based on UPS and UPSS approach are given below:

All India (in per cent)				
Approach	SC	ST	OBC	Others
UPS	5.2	5.2	5.5	5.5
UPSS	3.6	2.9	4.0	4.4

- The highest unemployment rate is observed in the “Others” category as also in the OBC category. Based on Usual Principal Status approach, unemployment rate was estimated at 5.5 per cent in ‘Other Backward and ‘Others’ categories followed by 5.2 per cent under ST & SC category. However, under UPSS approach unemployment rate for 2.9 per cent in Schedule Tribe was found to be lowest followed by 3.6 per cent for Schedule caste, 4.0 per cent in Other Backward category and 4.4 in other category respectively. Subsidiary activity is quite important among all the categories, specially so for the ST category.

CHAPTER-I

Labour Force Parameters under various Annual Employment Unemployment Surveys

Introduction

1.1 In order to fill the data gap for ascertaining the Employment-Unemployment Scenario in the country, Labour Bureau conducted six Annual Employment Unemployment Surveys for the years 2010-11, 2011-12, 2012-13, 2013-14, 2015-16 & 2016-17. The Annual Employment Unemployment Surveys were conducted in all the States/UTs (except first Annual EUS which was conducted in only 300 districts of 28 States/UTs), covering

all the districts with sample distributed proportionally in rural and urban sectors i.e. 88,783 households in the rural sector and 67,780 households in the urban sector under 6th Annual EUS. A moving reference period of last twelve months from the date of survey was used to derive the labour force estimates. Features pertaining to various rounds of Annual EUS are given in Table 1.1

Table 1.1: A comparative picture of the features relating to various rounds of Annual EUS is given as under:

Particulars	1st EUS	2nd EUS	3rd EUS	4th EUS	5th EUS	6th EUS
Launch of Survey	April, 2010	July, 2011	October, 2012	December, 2013	April, 2015	August, 2016
Reference Period	Fixed Reference Period of financial Year 2009-10	Fixed Reference Period of Agriculture Year 2010-11 i.e. July, 2010 to June, 2011	Moving Reference Period i.e. last 12 months from the date of survey	Moving Reference Period i.e. last 12 months from the date of survey	Moving Reference Period i.e. last 12 months from the date of survey	Moving Reference Period i.e. last 12 months from the date of survey
Coverage	300 Districts of 28 States/UTs	All Districts of all 35 States/UTs	All Districts of all 35 States/UTs	All Districts of all 36 States/UTs	All Districts of all 36 States/UTs	All Districts of all 36 States/UTs
Field Work	April, 10-Aug, 10	July, 11-Jan, 12	Oct, 12 - Mar, 13	Jan, 14 - July, 14	April, 15 - Dec, 15	Aug, 16 - Mar, 17
Sample Size	46,000	1.28 lakh	1.36 lakh	1.36 lakh	1.57 lakh	1.57 lakh
Reports Released in	Nov, 2010	July, 2012	Sep, 2013	Jan, 2015	Sept, 2016	Dec, 2020

6th Annual EUS Report 2016-17

1.2 The Key labour force indicators i.e. Labour Force Participation Rate (LFPR), Worker Population Rate (WPR) and Unemployment Rate (UR) are derived for persons aged 15 years and above based on

two approaches namely Usual Principal Status (UPS) Approach and Usual Principal and Subsidiary Status (UPSS) Approach are presented from Table 1.2 to 1.7 (Fig. 1.1 to 1.6)

Table 1.2: Labour Force Participation Rate based on Usual Principal Status (UPS) approach for persons aged 15 years & above based on 2nd, 3rd, 4th, 5th and 6th EUS (in per cent)

SURVEY / SECTOR	LABOUR FORCE PARTICIPATION RATE UNDER UPS APPROACH											
	RURAL				URBAN				RURAL + URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
SECOND EUS (2011-12)	78.8	28.0	-	54.8	73.3	17.9	-	47.2	77.4	25.4	-	52.9
THIRD EUS (2012-13)	78.0	24.8	-	52.8	73.0	16.9	-	46.1	76.6	22.6	-	50.9
FOURTH EUS (2013-14)	74.7	29.1	-	54.7	73.8	18.5	-	47.2	74.4	25.8	-	52.5
FIFTH EUS (2015-16)	77.3	26.7	51.1	53.0	69.1	16.2	41.2	43.5	75.0	23.7	48.0	50.3
SIXTH EUS (2016-17)	77.5	26	69.3	52.8	73.5	19.4	36.5	47.2	76.4	24.1	61.2	51.2

M=Male, F=Female, T=Transgender P=Person

Note: - The data pertaining to Transgender (T) is collected for the first time in 5th EUS (2015-16).

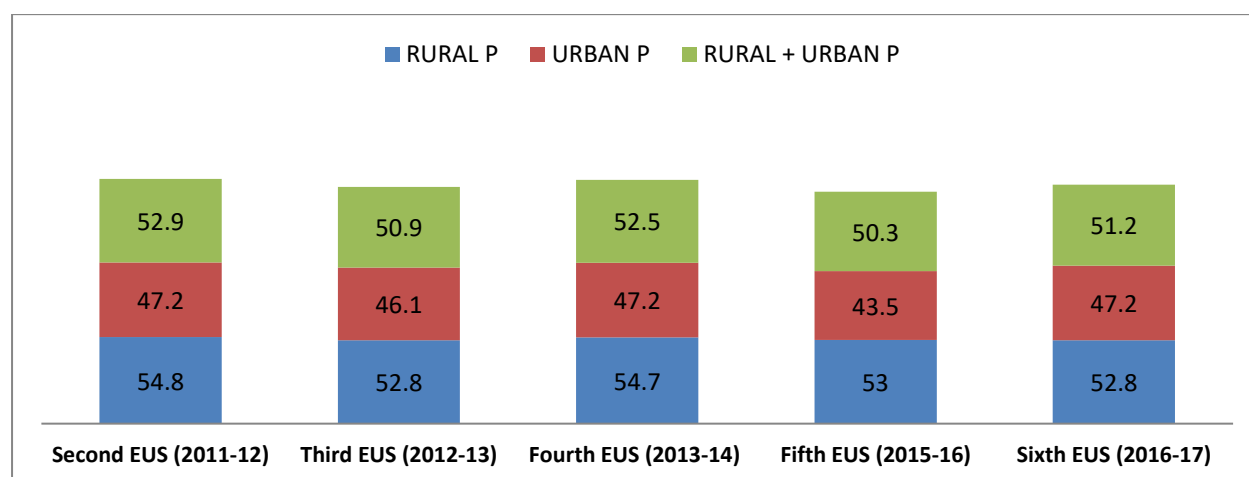

Figure 1.1: LFPR based on UPS approach for persons aged 15 Years & above based on various Employment Unemployment Surveys

Labour Force Participation Rate

1.3 Table 1.2 reveals that Labour Force Participation rate based on Usual Principal Status (UPS) approach (Rural+Urban) for persons aged 15 Years & above based on 2nd, 3rd, 4th, 5th and 6th EUS was more than 50 percent of total population. Labour Force Participation Rate (LFPR) denoting persons aged 15 years and above either working or available/seeking

work based on UPS approach under 6th EUS was 51.2 percent which was more than LFPR under 5th EUS which was 50.3 percent. Under 6th EUS, LFPR in urban sector had increased to 47.2 percent in comparison to 5th EUS i.e. 43.5 percent. Further, LFPR in rural sector under 6th EUS has slightly reduced to 52.8 percent from 53.0 percent under 5th EUS.

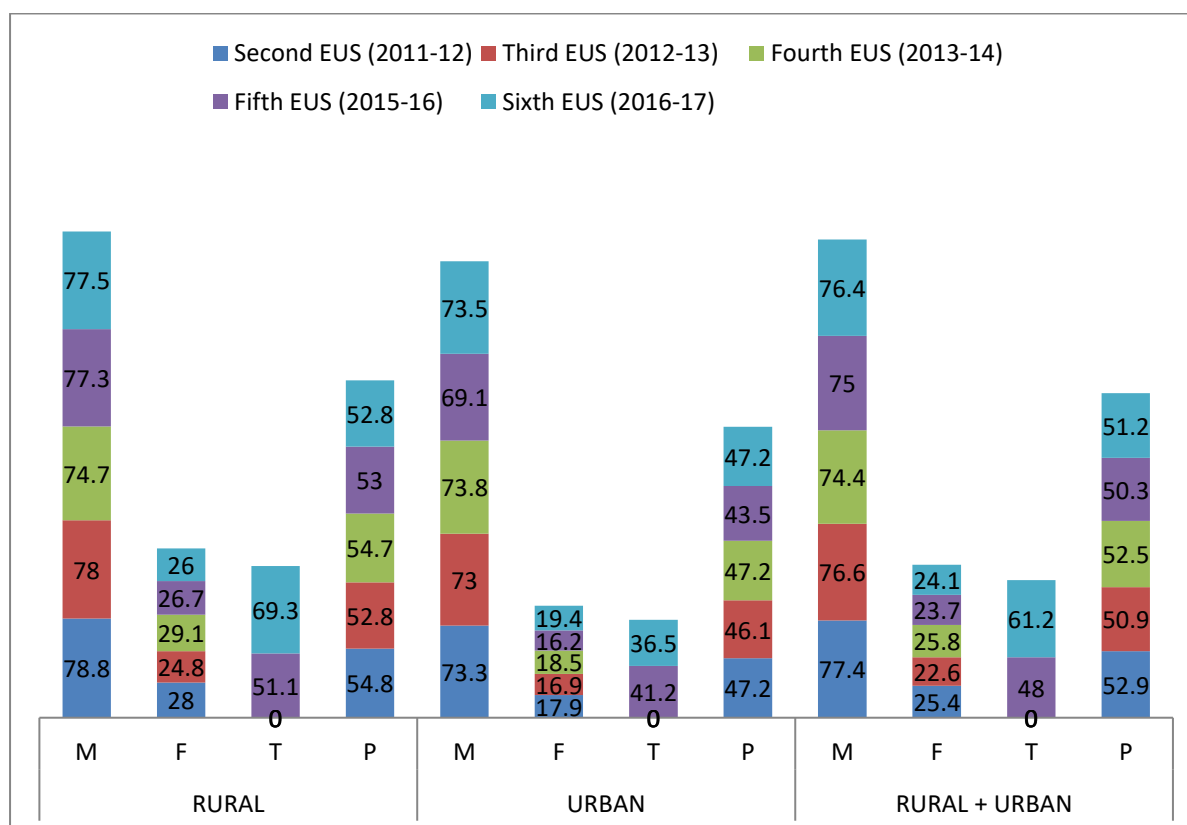

Figure 1.2: Gender/Sector-wise LFPR based on UPS approach for persons aged 15 Years & above based on various Employment Unemployment Surveys

6th Annual EUS Report 2016-17

1.4 Figure 1.2 reveals the gender/sector-wise LFPR from second to sixth EUS. In the rural sector, LFPR estimated on the basis of UPS (Table 1.2) as well as UPSS (Table 1.3) came out to be higher than the corresponding estimates for the urban sector. This difference is true for both males and females. One possible explanation for this phenomenon is that in rural areas, more young persons seek jobs or are already in

jobs rather than enrolling themselves for higher education.

1.5 Female LFPR was significantly lower as compared to LFPR among males. At All India level, female LFPR was estimated to be 24.1 per cent (Table 1.2) as compared to 76.4 per cent for males. The male-female difference was a bit higher in urban areas, possibly because of more females join higher education programmes in urban areas.

Table 1.3: Labour Force Participation Rate based on Usual Principal & Subsidiary Status [UPSS (PS+SS) approach] for persons aged 15 Years & above based on 2nd, 3rd, 4th, 5th and 6th EUS (in per cent)

Survey /Sector	Labour Force Participation Rate under UPSS											
	RURAL				URBAN				RURAL +URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
Second EUS (2011-12)	79.4	33.9	-	57.9	73.7	19.1	-	48.0	77.9	30.0	-	55.4
Third EUS (2012-13)	78.7	29.9	-	55.5	73.2	17.8	-	46.7	77.2	26.5	-	53.1
Fourth EUS (2013-14)	76.4	36.4	-	58.8	74.0	19.7	-	47.9	75.7	31.1	-	55.6
Fifth EUS (2015-16)	78.0	31.7	52.2	55.8	69.1	16.6	41.2	43.7	75.5	27.4	48.8	52.4
Sixth EUS (2016-17)	78.0	29.5	69.3	54.8	73.6	20.1	38.1	47.6	76.8	26.9	61.6	52.8

M=Male, F=Female, T=Transgender, P=Person

1.6 Table 1.3 reveals that Labour Force Participation Rate (LFPR) was estimated at 52.8 percent for

persons aged 15 Years & above based on Usual Principal and Subsidiary Status Approach at the

6th Annual EUS Report 2016-17

All India level under 6th Annual EUS. (LFPR) based on UPSS approach under 6th EUS was more than LFPR under 5th EUS which was 52.4 per cent. Under 6th EUS, LFPR in urban sector had increased to 47.6 per cent in comparison to 5th EUS i.e. 43.7 per cent. Further, LFPR in rural sector under 6th EUS has reduced to 54.8 per cent from 55.8 per cent under 5th EUS.

Worker Population Rate

1.7 As presented in Table 1.4, Worker Population Rate based on Usual Principal Status UPS approach for persons aged 15 years & above under 6th EUS has also witnessed a similar trend vis-a-vis LFPR as 48.5 per cent during sixth Annual EUS survey over 47.8 per cent during 5th Annual EUS. Increase in WPR implies a larger growth in number of workers than in the population i.e. number of workers increases proportionally.

Table 1.4: Worker Population Rate based on Usual Principal Status (UPS) approach for persons aged 15 years & above based on 2nd, 3rd, 4th, 5th and 6th EUS (in per cent)

Survey / Sector	Worker Population Rate under UPS											
	RURAL				URBAN				RURAL +URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
Second EUS (2011-12)	76.6	26.5	-	52.9	70.9	15.7	-	44.9	75.1	23.6	-	50.8
Third EUS (2012-13)	74.9	23.4	-	50.5	69.9	14.7	-	43.5	73.5	20.9	-	48.5
Fourth EUS (2013-14)	71.6	27.2	-	52.1	70.9	16.2	-	44.6	71.4	23.8	-	49.9
Fifth EUS (2015-16)	74.1	24.6	50.0	50.4	66.8	14.3	36.9	41.4	72.1	21.7	45.9	47.8
Sixth EUS (2016-17)	74.1	23.9	67.5	50.1	70.3	16.8	35.7	44.3	73.1	21.9	59.6	48.5

M=Male, F=Female, T=Transgender, P=Person

6th Annual EUS Report 2016-17

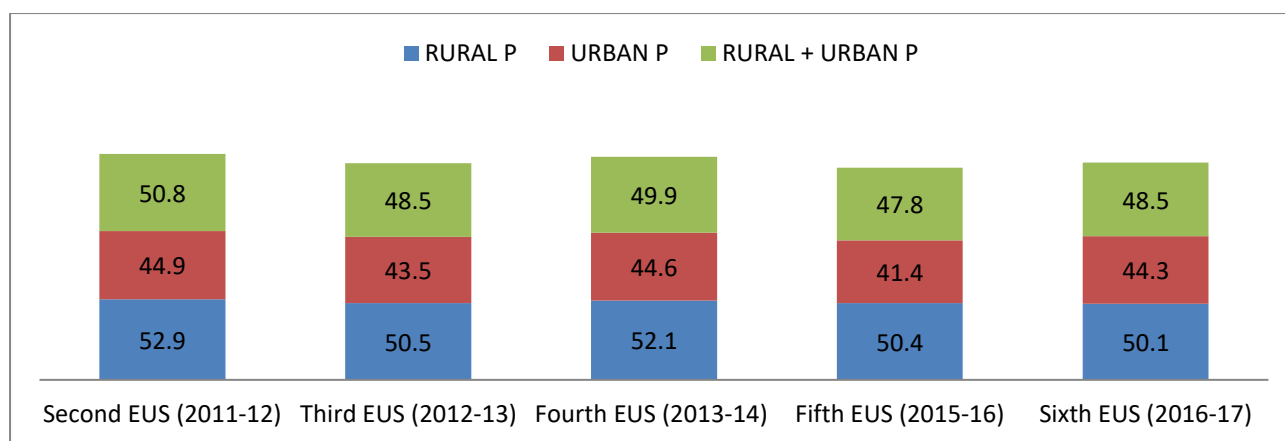

Figure 1.3: WPR based on UPS approach for persons aged 15 Years & above based on various Employment Unemployment Surveys

1.8 Rural WPR has slightly increased from 41.4 percent under 5th EUS to 50.1 percent under 6th EUS whereas urban WPR has reduced from 50.4 percent under 5th EUS to 44.3 percent under 6th EUS (Table 1.4).

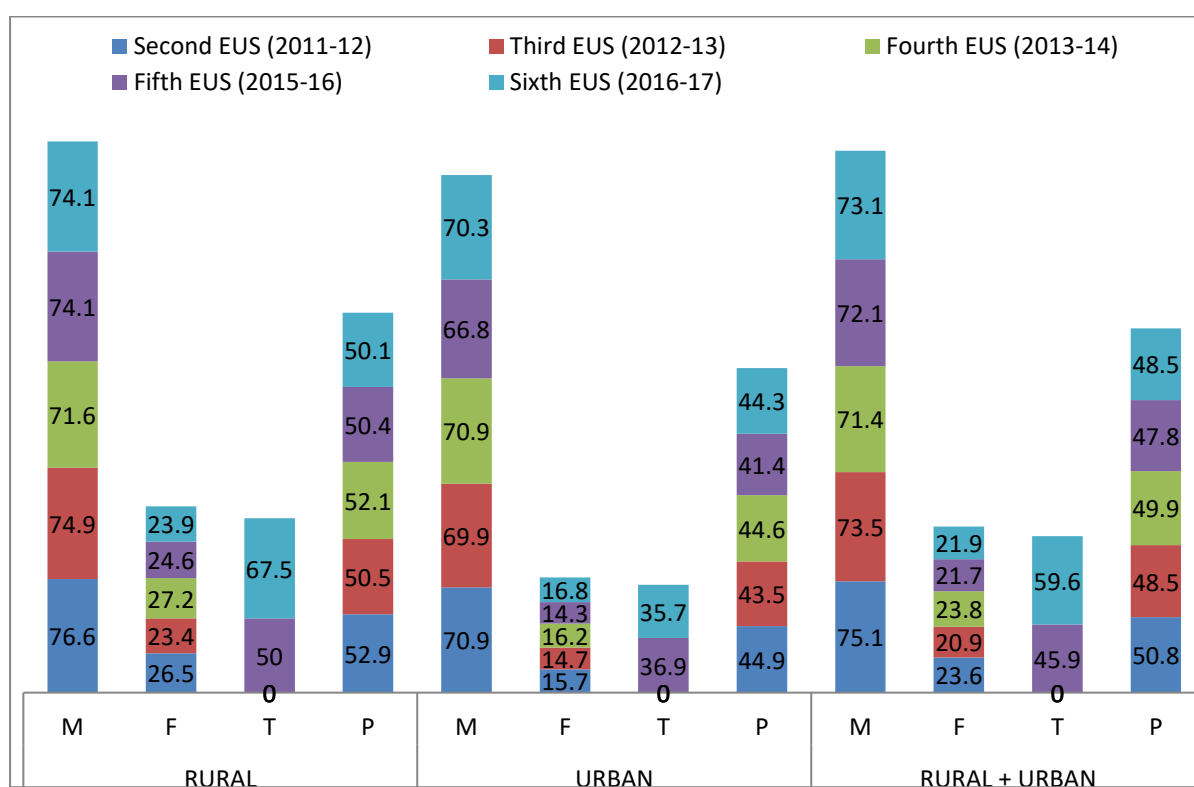

Figure 1.4: Gender/Sector-wise WPR based on UPS approach for persons aged 15 Years & above based on various Employment Unemployment Surveys

6th Annual EUS Report 2016-17

1.9 Figure 1.4 reveals that gender/sector-wise WPR from second to sixth EUS. As somewhat expected from LFPR differentials, the number of workers per hundred eligible males is much higher than the corresponding figure among females. Also to be

noted that figures for rural population exceed those for urban population. The female WPR was estimated to be 21.9 per cent at the All India level under the UPS approach as compared to the male WPR of 73.1 per cent and 59.6 per cent for transgenders.

Table: 1.5 Worker Population Rate based on Usual Principal & Subsidiary Status [UPSS (PS+SS)] approach for persons aged 15 years & above based on 2nd, 3rd, 4th, 5th and 6th EUS (in per cent)

Survey / Sector	Worker Population Rate under UPSS											
	RURAL				URBAN				RURAL +URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
Second EUS (2011-12)	77.5	32.5	-	56.3	71.3	17.0	-	45.8	75.9	28.5	-	53.6
Third EUS (2012-13)	76.1	28.7	-	53.6	70.4	15.7	-	44.2	74.5	25.0	-	51.0
Fourth EUS (2013-14)	74.3	35.1	-	57.1	71.4	17.5	-	45.5	73.5	29.6	-	53.7
Fifth EUS (2015-16)	75.7	30.2	51.9	53.9	67.1	14.8	36.9	41.8	73.3	25.8	47.2	50.5
Sixth EUS (2016-17)	75.6	28.1	67.5	52.9	70.8	17.8	37.3	45.0	74.3	25.2	60.0	50.7

M=Male, F=Female, T=Transgender, P=Person

1.10 Table 1.5 reveals that Worker Population Rate for persons aged 15 years & above has slightly increased from 50.5 per cent (5th EUS) to 50.7 per cent (6th EUS) under Usual Principal & Subsidiary Status (UPSS)

approach. In rural sector WPR has reduced from 53.9 per cent (5th EUS) to 52.9 per cent (6th EUS) whereas in urban sector it has significantly increased from 41.8 per cent to 45.0 per cent during the same period.

Table: 1.6 Unemployment Rate based on Usual Principal Status UPS approach for persons aged 15 years & above based on 2nd, 3rd, 4th, 5th and 6th EUS (in per cent)

Survey/Sector	Unemployment Rate under UPS											
	RURAL				URBAN				RURAL +URBAN

Unemployment Rate

1.11 Table 1.6 shows that the Unemployment Rate based on Usual Principal Status (UPS) approach for persons aged 15 years & above based on 2nd, 3rd, 4th, 5th and 6th EUS has shown an increasing trend. Under 6th EUS, it was estimated to be 5.4 per

cent in comparison to 5.0 percent under 5th EUS. In rural sector, UR has slightly increased from 5.1 per cent (5th EUS) to 5.2 percent (6th EUS) whereas in urban areas it has increased from 4.9 percent (5th EUS) to 6.1 per cent (6th EUS).

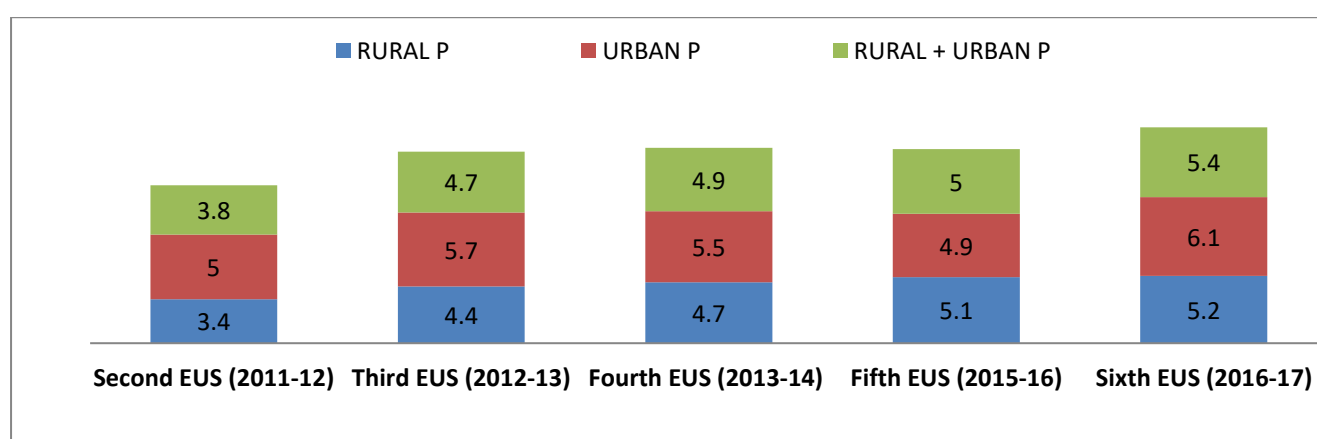

Figure 1.5: Gender/Sector-wise UR based on UPS approach for persons aged 15 Years & above based on various Employment Unemployment Surveys

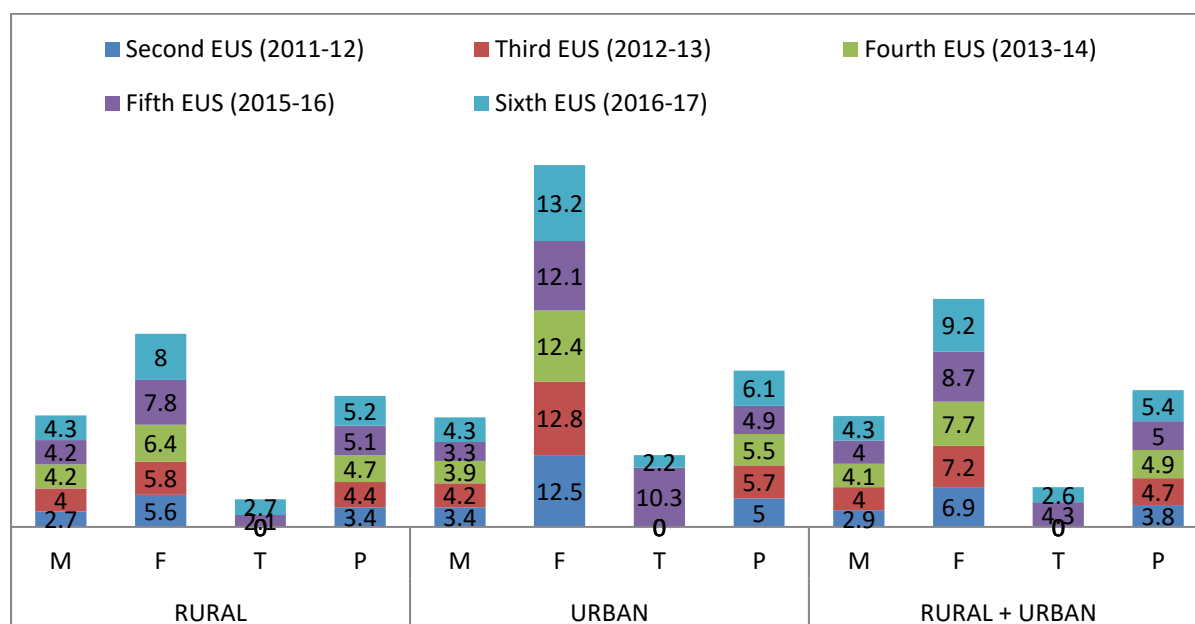

Figure 1.6: UR based on UPS approach for persons aged 15 Years & above based on various Employment Unemployment Surveys

Fig. 1.6 reveals gender wise Unemployment rates from 2nd EUS to 6th EUS. Unemployment Rate based on UPS approach for females at All India level had shown a positive trend from 2nd round onwards. Similar trend was observed for rural females as Unemployment Rate had depicted a same positive trend from 2nd round onwards.

Under 6th Annual EUS, the Unemployment Rate was significantly higher among females as compared to males. At the All India level, the female unemployment rate was estimated to be 9.2 per cent, whereas for males it was 4.3 per cent under the UPS approach. In urban sector, the female UR was estimated to be as high as 13.2 per cent.

Table 1.7: Unemployment Rate based on Usual Principal & Subsidiary Status UPSS (PS+SS) approach for persons aged 15 years & above based on 2nd, 3rd, 4th, 5th and 6th EUS (in per cent)

Survey/Sector	Unemployment Rate under UPSS											
	RURAL				URBAN				RURAL +URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
Second EUS (2011-12)	2.4	4.1	-	2.9	3.1	11.2	-	4.7	2.6	5.3	-	3.3
Third EUS (2012-13)	3.3	4.2	-	3.5	3.9	11.7	-	5.3	3.5	5.6	-	4.0
Fourth EUS (2013-14)	2.7	3.4	-	2.9	3.5	10.8	-	4.9	2.9	4.9	-	3.4
Fifth EUS (2015-16)	2.9	4.7	0.6	3.4	3.0	10.9	10.3	4.4	3.0	5.8	3.2	3.7
Sixth EUS (2016-17)	3.1	4.7	2.7	3.5	3.8	11.2	2.1	5.3	3.3	6.1	2.6	3.9

M=Male, F=Female, T=Transgender, P=Person

Table 1.7 reveals that the UR based on UPSS approach has increased from 3.7 per cent under 5th EUS to 3.9 per cent under 6th EUS at All India level. In rural sector, it has slightly increased

from 3.4 per cent (5th EUS) to 3.5 per cent (6th EUS) whereas in urban sector it has increased from 4.4 per cent under 5th EUS to 5.3 per cent under 6th EUS.

CHAPTER-II

SIGNIFICANCE OF EMPLOYMENT STATISTICS

2.1 The experience of countries that succeeded in reducing poverty significantly indicates the importance of high rates of economic growth in achieving this. High growth, however, is not a sufficient condition for poverty reduction; the pattern and sources of growth as well as the manner in which its benefits are distributed are equally important from the point of view of achieving the goal of poverty reduction. Based on aforesaid evidences, employment plays a vital role in all developing countries. Indeed, countries which attained high rates of employment growth alongside high rates of economic growth are also the ones who succeeded in reducing poverty significantly.

2.2 India is one of the fastest growing economies in the world. The rapid growth in the Gross Domestic Product in the last decade shows the transition of our economy from agriculture domination to manufacturing and

tertiary sectors. Rapid growth is essential for expanding incomes and employment, but growth is not only the measure of development. The ultimate objective is to attain broad based improvement in the living standards of people. One of the indicators of this broad based improvement is to provide gainful employment opportunities to the working class population. Thus, Statistics pertaining to Employment-Unemployment scenario of a nation is an important input for policy making and planning purposes.

2.3 The Government has undertaken numerous initiatives to boost the employment scenario in the country. Noteworthy among these are the 'Start-up India', 'Make in India' and 'Skill India' initiatives. The 'Start-up India' initiative seeks to unleash the potential of entrepreneurs and turn them from job seekers to job creators. The Government is also targeting growth of the

employment intensive manufacturing sector through 'Make in India' initiative which will generate employment and self employment opportunities for the growing population.

2.4 In the policy context the most critical factor that impinges on labour supply is the Labour Force Participation Rate (LFPR). The Labour Force Participation Rate is a measure of the proportion of a country's working-age population that engages actively in the labour market, either by working or seeking for work. It provides an insight into the relative size of the supply of labour force available for engaging in the production of goods and services. The breakdown of the labour force by sex and age group gives a profile of the distribution of the economically active population within the country. A careful assessment of how many new workers will enter the labour force is a prerequisite to design demand side policy interventions for gainfully absorbing these numbers in the economy. Moreover, the indicator for Labour Force Participation Rate

plays a vital role in the study of the factors that determine the size and composition of a country's human resources.

2.5 Based on the present or Sixth Annual Employment Unemployment Survey Report 2016-17, LFPR according to Usual Status Approach (Principal Status + Subsidiary Status) was estimated to be about 52.8 per cent at National level. In comparison, LFPR was reported to be nearly 68.93 per cent in China, 65.20 per cent in Canada, 61.89 per cent in United States of America, 62.34 per cent in United Kingdom and 60.21 per cent in Japan. Low LFPR primarily indicates high dependency ratio. The development experience suggests a strong negative correlation between dependency and growth, that was, lower dependency ratios increase growth and higher growth rate leads to lower dependency ratios.

Significance of Labour Statistics & ILO Resolutions on Labour Statistics

2.6 Availability of statistics on economically active population at

frequent regular intervals is of utmost importance to monitor the economic/labour market situation, to devise, execute and evaluate the policies for human resource development including skill development, employment creation and poverty reduction. The frequency of employment data becomes even more crucial in the wake of the growing exposure of India to the global economic upheavals and its consequent impact on the employment scenario within the country. In this regard the Resolution 1 adopted by the 19th International Conference of Labour Statisticians (ICLS) also recommends that “To meet the need for information to monitor labour markets and work patterns, a national data collection strategy should be established that allows for different sets of statistics to be reported, as relevant, on a sub-annual basis (main aggregates of employment, the labour force, labour underutilization), annual basis (detailed statistics of the labour force and of labour underutilization, including unemployment) and less frequent

basis (depending on national circumstances statistics on participation and working time in own-use production work, unpaid trainee work and volunteer work, particular topics, such as labour migration, child labour etc)”.

2.7 The ILO Convention No. 160 and Recommendation No. 170 concerning Labour Statistics was adopted by General Conference of International Labour Organization way back in 25th June 1985 recognizing the need for reliable labour statistics both in developed and in developing countries, particularly for the purposes of planning and monitoring social and economic progress, as well as for industrial relation. Each member country, which ratifies ILO Convention 160, undertakes that it will regularly collect, compile and publish basic labour statistics, which shall be progressively expanded in accordance with its resources to cover the specified subjects.

2.8 The Resolution 1 adopted by the latest 19th International Conference of Labour Statisticians

(ICLS) calls for countries to develop systems of work statistics to achieve a number of objectives ranging from monitoring of labour markets and labour underutilization to assess participation in different forms of work among population groups such as women and men, young people, children etc. The resolution also highlighted that the system should be designed in consultation with the various users of the statistics and in harmony with other economic and social statistics so as to provide current statistics for short-term needs along with statistics to be collected at longer intervals for structural and in-depth analysis.

2.9 The other important resolution includes that a system should be designed to monitor labour markets and labour underutilization including unemployment, implementation and evaluation of economic and social policies and programmes related to employment creation, income generation, skills development including vocational

education and training, and related decent work policies.

Employment statistics in India & its stakeholders

2.10 Labour Statistics are collected, compiled and disseminated by several agencies in India. Ministry of Labour and Employment is one of the most important sources of labour statistics in India. It collects labour statistics through the offices of Labour Bureau, Directorate General of Employment and Training (DGE&T), Directorate General of Labour Welfare (DGLW) and Directorate General Factory Advice Service & Labour Institutes (DGFASLI). Ministry of Statistics and Programme Implementation is the other major source which collects and publishes the data through two important organisations viz. the Central Statistical Office (CSO) and the National Sample Survey Office (NSSO). Besides these two, State governments also collect labour statistics, mostly through the Department of Labour &

Directorate of Economics & Statistics.

2.11 In India, the main users/interest groups who make use of the employment statistics are policy makers and administrators, research workers, media, worker's organizations employer's associations and international agencies etc. Thus, it is not only the Ministry of Labour & Employment and some other welfare ministries and departments responsible for making labour policy and laws with their implementation, but agencies engaged in planning socio-economic development, particularly, the NITI Aayog has become other major user of employment statistics on different aspects of labour.

2.12 Labour Force Surveys primarily provide estimates of Labour Force Participation Rate, Worker Population Rate and Unemployment Rate. These estimates are amongst the important measures of performance of an economy. Further, they also provide

descriptive data by social groups, sex, age, education, rural/urban sector, industry, occupation and type of activity. Different levels of Government use these data for evaluation, planning and design of employment programs and social safety net programmes for persons with specific employment attributes. Besides this, labour market analysts, economists, consultants, planners, forecasters, academics and other stakeholders in the private and public sector also use this data for research purposes.

Main Characteristics of the Present Survey

2.13 The current Employment - Unemployment Survey is the Sixth in the series providing annual results of the status of labour market in India. The survey covers the entire country. The field work of the survey was launched in August, 2016. In majority of the States/UT's the field work was completed by March, 2017. The estimates of the Labour Force parameters and its derivatives are generated at State/UT/All India

level. Considering the importance of Labour Statistics and its use by different agencies, it has been decided to bring one integrated report catering to the needs of different users accordingly, estimates of the Labour Force parameters pertaining to social group/age/education and skill wise are generated.

2.13.1 Youth is an asset for any nation and productive employment of youth is essential for them to contribute to its economic development. Especially, for a young nation like India which is on verge of demographic dividend phase, creating youth employment assumed a paramount importance. Governments are rightly concerned about rising levels of youth unemployment and underemployment because of not only the direct economic costs (including financing unemployment benefits, retraining schemes and other active labour market policies and the loss in potential output resulting from lower employment rates), but also due to the social impact of joblessness as manifested by

increased crime, mental health problems, violence, drug taking and social exclusion.

2.13.2 Youth unemployment and underemployment is prevalent around the world because young people lack skills, work experience, job search abilities and the financial resources to find employment. Moreover, young Indians face major barriers because of poverty and low level of human capital. In case of India the unemployment rate among youth is generally higher than the rest of the population and it increases with the level of education. Thus youth employment deserves special attention due to specific challenges faced by the youth in the form of lack of experience, heightened vulnerability during economic downturns in terms of difficulty in finding jobs and high chances of being laid off. Under 6th Annual Employment & Unemployment Survey, as per the recommendations of the Expert Group the estimates are derived for age groups viz. 15-17 years, 18-24 years, 25-29 years and 30 years & above.

2.13.3 Skill development is vital for achieving high levels of sustainable economic growth. A low-skill, low-productivity, low-wage economy is unsustainable in the long term and is incompatible with poverty reduction. The vicious circle of inadequate education, poor training, low productivity, poor quality jobs and low wages traps the working poor and excludes workers without relevant skills from participating in economic growth and social development. In the context of globalization, this negatively affects the competitiveness of enterprises and their capacity to contribute to economic and social development (ILO, 2008). Thus skill development is crucial to fuel innovation, increase productivity, development of enterprise, technological change, investment, diversification of the economy, and competitiveness.

2.13.4 Ministry of skill development & entrepreneurship has been set up for coordinating the efforts of all concerned stakeholders in the field of Skill Development. The National Skill

Development Mission has been launched to rapidly scale up skill development efforts in India.

2.13.5 Reliable statistics on skill and training profiles of the Indian labour force is a vital input for pragmatic assessment of skill gap and for identifying the areas in skill development where action is required. In an endeavour to provide consistent database on skill profile of the labour force and workforce, data on education, skill development & Labour force has been compiled.

2.13.6 In the context of India, a significant dimension of inclusiveness relates to economic development of different social groups i.e. SCs, STs and the OBCs. Achieving equity for these groups is essential to realize the goal of inclusive growth. As part of the Sixth Annual Employment Unemployment Survey, endeavor has been made for collecting information on various social groups and data on various labour force indicators for these social groups.

District-level Estimates

2.14 District level data on labour force indicators can serve as a crucial input in development planning at the district level. Availability of data at such micro level also facilitates effective monitoring and evaluation of the various programmes targeting employment generation. During the third Annual Employment Unemployment Survey 2012-13, estimates at district level were started on pilot basis for the State of Andhra Pradesh. For deriving estimates at district level, the State Government had covered matching sample along with Labour Bureau main survey. By pooling the central and state sample, district level estimates for the state of Andhra Pradesh were prepared. During the fourth round, the district level estimates were generated for about 120 districts in the country for five states namely Andhra Pradesh, Telangana, Tamil Nadu, Maharashtra & Puducherry. Further, under the fifth round, the district level estimates were generated for four states namely

Andhra Pradesh, Telangana, Maharashtra & Puducherry.

2.15 During the 6th Annual Employment Unemployment Survey for four States/UT's namely Andhra Pradesh, Maharashtra, Puducherry and Telangana had expressed their desire to have district level estimates of employment data. Labour Bureau acceded to their request and provided all the technical guidance in selection of rural/urban sample, training to the enumerators/supervisors and supply of blank schedules etc. All the four States have completed the field work by covering the matching sample along with central sample (Labour Bureau sample). The data for the district level samples has been processed to derive district level estimates by Labour Bureau.

Data Collection

2.16 To ensure optimal utilization of available resources, Directorates of Economics and Statistics of all the States/UTs were requested to undertake data collection in their respective States/UTs. Out of 36 States/UTs, 16 States/UTs agreed

and undertook the fieldwork on behalf of Labour Bureau. In the remaining States/UTs Labour Bureau engaged about 600 contract investigators to complete the fieldwork. Labour Bureau provided extensive training to State officials and contract staff through interactive sessions and workshops to familiarize them with the methodology, concepts and definitions and the practical aspects of the field work.

Supervision

2.17 Usefulness of data depends upon its quality and adherence to the methodology adopted for the survey. Labour Bureau adopted a three-tier supervision of fieldwork to ensure that the data collected is consistent with the agreed definitions and concepts used in the questionnaire. All the States/UTs agreed to perform first level scrutiny by the officials of Directorate of Economics and Statistics (DES) in their respective States. The objective of first level scrutiny is to ensure that sample units are correctly identified; households are listed properly;

formation of hamlet groups and sampled households are selected using the prescribed statistical procedure and techniques. Supervisors are also expected to ensure that codes for status, activity, industry group and occupation are consistent with the responses through random field level inspections and verification of data recorded by the investigators.

2.18 The second tier of scrutiny is carried out through 120 supervisors engaged on contract basis. They are required to check the reported data for overall consistency and uniformity. In many cases they are also deployed to the field to perform surprise inspections and work alongside the contract investigators in clarifying their doubts and helping investigators in collecting the data. The supervisors carried out number of inspections in different States/UT's in the sample First Stage units to check the filled in schedules for authenticity, consistency etc.

2.19 In the third tier of supervision, Labour Bureau

deputes its own regular officials to verify the quality of data collected. In addition, four consultants were hired on contract basis to undertake random scrutiny of schedules and provide day-to-day guidance to field staff and supervisors. Any discrepancy observed at this level was referred back for necessary rectifications at the field.

Major Changes/improvements from earlier surveys

2.20 During 6th Annual Employment Unemployment Survey an attempt has been made to capture the information related to households having a Saving Bank/Jan Dhan account and Average monthly household earnings for each State/UT. In addition, information has also been captured on methods adopted to seek work by the unemployed, reasons for unemployment among graduates and post graduates, type of job contract, availability of paid leave & social security benefits and social security benefits by different schemes for each State/UT. The methodology followed in selecting

the sample and coverage in the current survey is almost similar to the Fifth Annual Employment-Unemployment Survey. The details of the selection of first stage unit, sample household etc. is detailed at the Annexure for “Sampling Design & Estimation Procedure”. However, based on the experience and the inputs and comments received from the stakeholders, certain changes have been made in the current survey. Questionnaire used for collecting the data has been modified and simplified to improve accuracy and reliability of data.

2.21 The past experience suggests that selecting households in second stage sampling was less than satisfactory because investigators didn't have knowledge, skills and experience of sampling tools and random numbers. The training module for imparting these skills was simplified in the current survey and higher proportion of time was spent on this aspect of training by organizing mock exercises and workshops. This has resulted in

improved quality of data in the current survey.

Limitations and future challenges

2.22 As suggested elsewhere, credibility of any survey depends upon the accuracy tested over a period of time and general acceptance of the results by the users of information. Unlike the more institutionalized surveys conducted by National Sample Survey Office (NSSO) that tend to establish relationship between expenditure and employment, the purpose of annual employment surveys carried out by Labour Bureau is primarily to assess and estimate the structure and composition of labour force and provide the data to various users on regular basis. Within this broad framework, there are certain shortcomings that need to be kept in mind while drawing inferences from the data contained in the report.

2.23 The current methodology is unsuitable for measuring under-employment, disguised employment and seasonality of

labour force. Likewise, it also does not capture the migration aspects of employment. Further, there are reasons to feel that the survey should be more sensitive to gender attributes to capture the true and fair value of contribution made by females.

2.24 Survey of this magnitude conducted every year puts great deal of strain on available resources. There is a need to relook the methodology of sample size and household selection to optimize the available resources without compromising the quality and accuracy of the results. It is assessed that approximately one half of the total time required for survey is attributed to stratification related work and listing of households.

2.25 Labour Bureau is following a conventional approach of canvassing paper-based questionnaires.

Constitution of the Expert Group

2.26 Ministry of Labour & Employment constituted an expert group under the Chairmanship of

6th Annual EUS Report 2016-17

renowned Statistician Professor S.P. Mukherjee with other experts on the subject as members, to finalize the questionnaires,

sampling design, instruction manual & other technical details of the survey. Composition of the Expert group is annexed.

CHAPTER-III

HOUSEHOLD CHARACTERISTICS

Introduction

3.1 During the Sixth Annual Employment-Unemployment

Survey information has been collected on some important household characteristics. This includes information on household size, households by social group, households benefitted from different employment generating schemes, number of employed persons in the household, households by saving bank accounts, households by average monthly earnings and households by number of wage/salaried persons etc. The findings of the survey on these parameters are discussed in the ensuing paragraphs.

3.2 A total of 13065 Villages/UFS Blocks were allocated in the sample, out of which 13051 Villages/UFS Blocks were actually covered. Hence, 99.89 per cent was the actual coverage of Village/UFS Blocks during the survey. In the rural sector 7401 villages were actually covered, out of 7409 villages allocated. For urban sector

5656 Villages/UFS blocks were allocated and 5650 were actually covered during the survey.

3.3 The survey was conducted in all the 36 States/UTs by covering all the districts in the country. A sample size of 1,56,429 households spread across 36 States/UTs have been covered out of which 88,701 households belong to the rural sector and the rest 67,728 households to the urban sector. A total of 7,76,171 persons aged 15 years and above were surveyed out of which 4,44,730 resided in the rural sector sample households and rest 3,31,441 persons in the urban sector sample households were covered during the survey.

Members aged 15 years and above in a household

3.4 The second stage stratification under the survey to select the sample household was based on number of members aged 15 years and above in the household. The households studied under the survey were classified on the basis of number of members aged 15 years and above in the household.

Accordingly, all the households under study were put in four categories as under:

1. 1 member household;
2. 2-3 members' household;
3. 4-5 members' household;
4. 6 & above members' household.

3.5 The results in Table 3.1 below show that at the All India level 50.4 per cent of the households were having 2-3 member's aged 15 years

and above followed by 32.9 per cent of the households having 4-5 member's aged 15 year and above. In case of 6 & above members aged 15 years and above, there were about 12.5 per cent households at overall level. The State-wise distribution of the households by members aged 15 years & above is presented in (Tables 3, 3.1, 3.2 in Annexure IV).

Table 3.1: Distribution of households by members aged 15 years and above
All India (in per cent)

SECTOR	1 MEMBER	2-3 MEMBERS	4-5 MEMBERS	6 & ABOVE MEMBERS
RURAL	4.1	49.5	33.0	13.4
URBAN	4.5	52.9	32.4	10.3
RURAL + URBAN	4.2	50.4	32.9	12.5

3.6 At sectoral level i.e. rural and urban sector also, similar types of results have been observed. The results are important in the sense

that they provide information related to age of working persons in the households at State/UTs level.

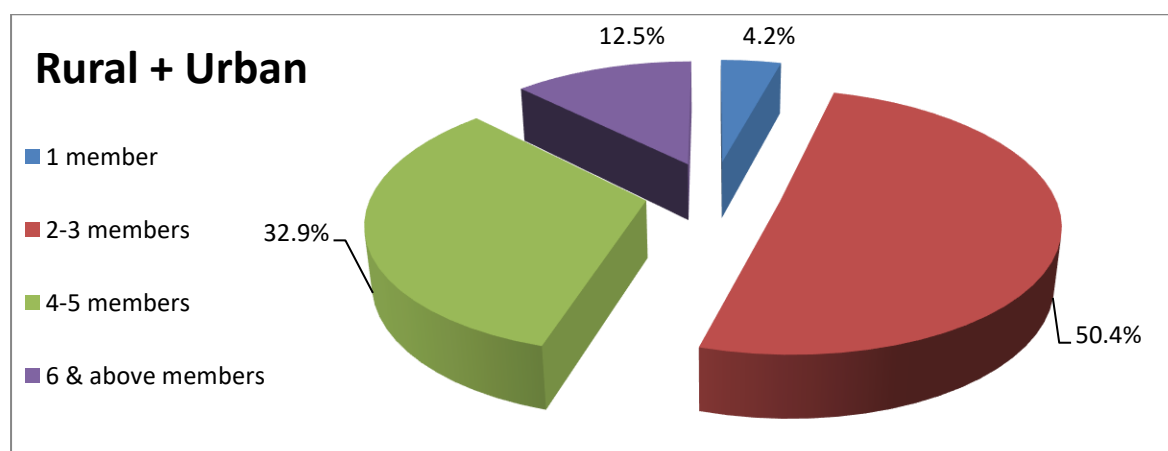

Figure 3.1: Distribution of households by members aged 15 years and above

Social Groups

3.7 The households are classified into four social groups, viz., Scheduled Castes, Scheduled Tribes, Other Backward Classes and Others category. The State-wise distribution of the households among different social groups is presented in (Tables 3.1 and Figure 3.2 Annexure IV).

3.8 Table 3.2 shows the distribution of the households by social groups. The results show

that at All India level, 42.1 per cent of the households belong to Other Backward Classes category followed by 29.2 per cent under the Others category, 19.2 per cent under the Scheduled Castes category and the rest about 9.4 per cent households under the Scheduled Tribes category. Tables 4.1 & 4.2 (Annexure IV) also show the distribution of households among different social groups in rural, urban and rural + urban sectors in different States/UTs.

Table 3.2: Distribution of households by Social Groups

SOCIAL GROUP	All India (in per cent)		
	RURAL	URBAN	RURAL + URBAN
SCHEDULED CASTES	21.3	14.2	19.2
SCHEDULED TRIBES	11.5	4.2	9.4
OTHER BACKWARD CLASSES	42.3	41.8	42.1
OTHERS	24.9	39.8	29.2

3.9 In the rural sector, a trend, similar to the one observed at the All India level (rural + urban) was visible. In rural areas, the proportion of the households under Other Backward Classes category was the highest with 42.3 per cent followed by 24.9 per cent

under the Others category, 21.3 per cent under the Scheduled Caste category and the rest 11.5 per cent under the Scheduled Tribes group.

3.10 In case of urban sector, the Others Backward Class had maximum proportion 41.8 per cent

followed by 39.8 per cent households under the Other Backward Classes category, 14.2 per cent households under the

Scheduled Castes category and 4.2 per cent households were reported under the Scheduled Tribes category at the All India level.

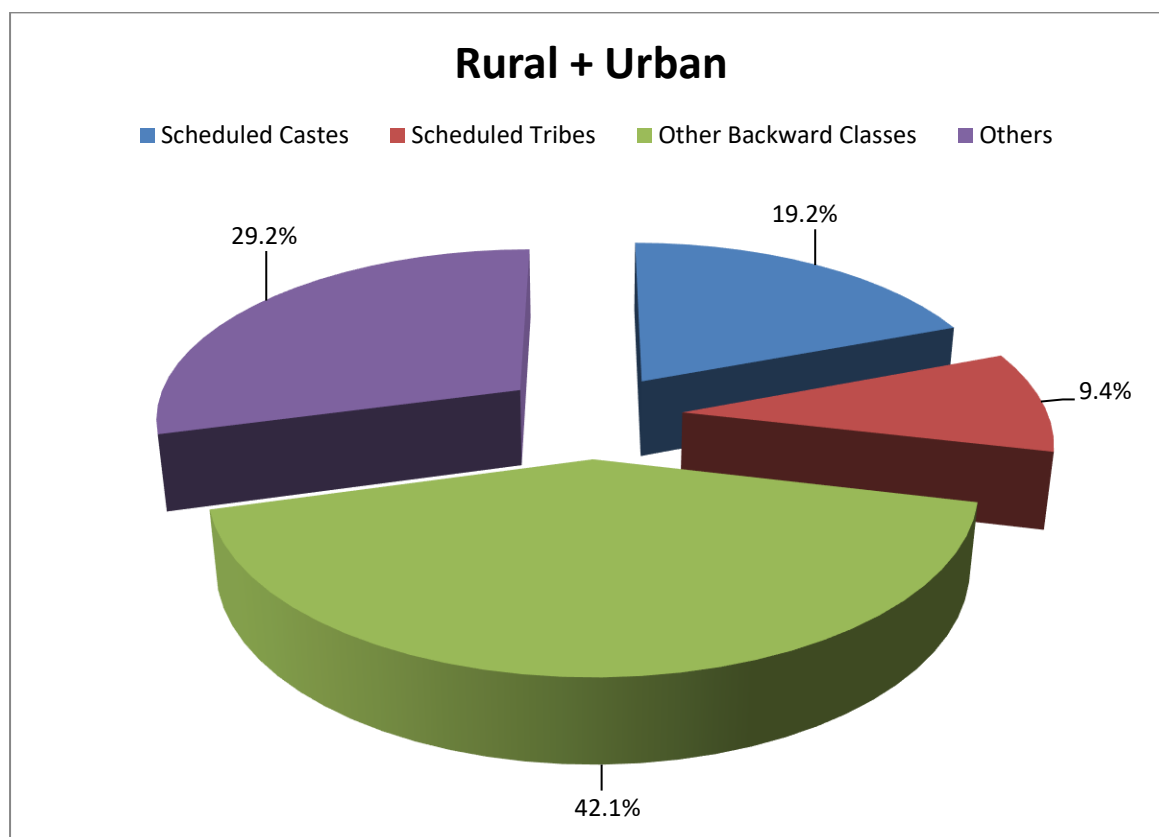

Figure 3.2: Distribution of households by social group at All India Level (Rural + Urban)

Households Benefitted from Employment Generating Schemes

3.11 In the current survey the information from the households regarding members of the household benefitted from the major employment generating schemes during the reference

period as detailed in Box 3.1. The results thrown out by the survey would help Central and State government agencies to assess the progress made in the schemes so far and take corrective action to ensure that benefits of the schemes reach the targeted population.

Box 3.1: Major Employment Generation Schemes

I. Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) was enacted on 7.9.2005 for the enhancement of livelihood security of households in rural areas of the country by providing at least one hundred days of guaranteed wage employment in every financial year to every household whose adult members volunteer to do unskilled manual work. Thus, MGNREGA makes the Government legally accountable for providing employment to those who ask for it and thereby goes beyond providing a social safety net towards guaranteeing the Right to Employment.

II. Prime Minister's Employment Generation Programme (PMEGP) was launched in August, 2008 by the Ministry of Micro, Small & Medium Enterprises. The main objective of this programme is to generate continuous and sustainable employment opportunities in Rural and Urban areas of the country.

III. National Rural Livelihoods Mission (NRLM) was launched by the Ministry of Rural Development (MoRD), Government of India in June 2011. The Mission aims at creating efficient and effective institutional platforms of the rural poor enabling them to increase household income through sustainable livelihood enhancements and improved access to financial services.

NRLM has set out with an agenda to cover 7 crore rural poor households, across 600 districts, 6000 blocks, 2.5 lakh Gram Panchayats and 6 lakh villages in the country through self-managed Self Help Groups (SHGs) and federated institutions and support them for livelihoods collectives in a period of 8-10 years.

In addition, the poor would be facilitated to achieve increased access to their rights, entitlements and public services, diversified risk and better social indicators of empowerment. NRLM believes in harnessing the innate capabilities of the poor and complements them with capacities (information, knowledge, skills, tools, finance and collectivization) to participate in the growing economy of the country. Earlier this scheme was known as the Swarnjayanti Gram Swarozgar Yojana (SGSY), a flagship programme of the Ministry of Rural Development, has been restructured as NRLM.

IV. National Urban Livelihoods Mission (NULM) for urban areas was launched by the Ministry of Housing and Urban Poverty Alleviation (MHUPA), Government of India in 23rd September, 2013 by replacing the existing Swarna Jayanti Shahari Rozgar Yojana (SJSRY). The NULM will focus on organizing urban poor in their strong grassroots level institutions, creating opportunities for skill development leading to market-based employment and helping them to set up self-employment venture by ensuring easy access to credit. The Mission is aimed at providing shelter equipped with essential services to the urban homeless in a phased manner. In addition, the Mission would also address livelihood concerns of the urban street vendors.

V. Pradhan Mantri Mudra Yojana (PMMY) under the Micro Units Development and refinance agency(MUDRA)Bank is a new institution being set up by Government of India for development and refinancing activities relating to micro units. The basic purpose of MUDRA is to attain development in an inclusive and sustainable manner by supporting and promoting partner institutions and creating an ecosystem of growth for micro enterprises sector.

VI. Others (including any other Central/ State Employment Generating Scheme):

Besides the above listed schemes there may be some other schemes of the Centre/State governments from which the member of household got benefitted in terms of getting gainful employment during the reference period.

3.12 The results show that about 13.4 per cent of the households were benefitting from the employment generating schemes at overall level. At the all India level 9.5% per cent households were found to have benefitted from MGNREGA followed by 2.6 per cent from other schemes except MGNREGA, PMEGP, NRLM, NULM and PMMY. All States/UTs have shown positive number of households benefitting under MGNREGA during the reference period except Delhi, Chandigarh and Daman & Diu where even not a single household was benefitted from MGNREGA. In Tripura 56.3 per cent of the households were benefitted from MGNREGA followed by 43.8 per cent in Manipur and 42.1 per cent in Mizoram. On the other hand, lowest i.e. 0.2 per cent households

benefitted under MGNREGA scheme was recorded for the Union Territory of Andaman & Nicobar during reference period.

3.13 Similar trends have been observed across social groups at the All India level i.e. 13.4 per cent SC households, 15.0 per cent ST households, 9.0 per cent OBC households and 5.8 per cent households from others group benefitted from the MGNREGA during the survey. The percentage of households benefitted from remaining schemes was negligible across all social groups (Table 5 to 5.4, Annexure IV). Very few households were observed to have benefitted from PMEGP, SGSY and SJSRY across states as well as across social groups. This fact reveals that how much significance MGNREGA has gained since its inception.

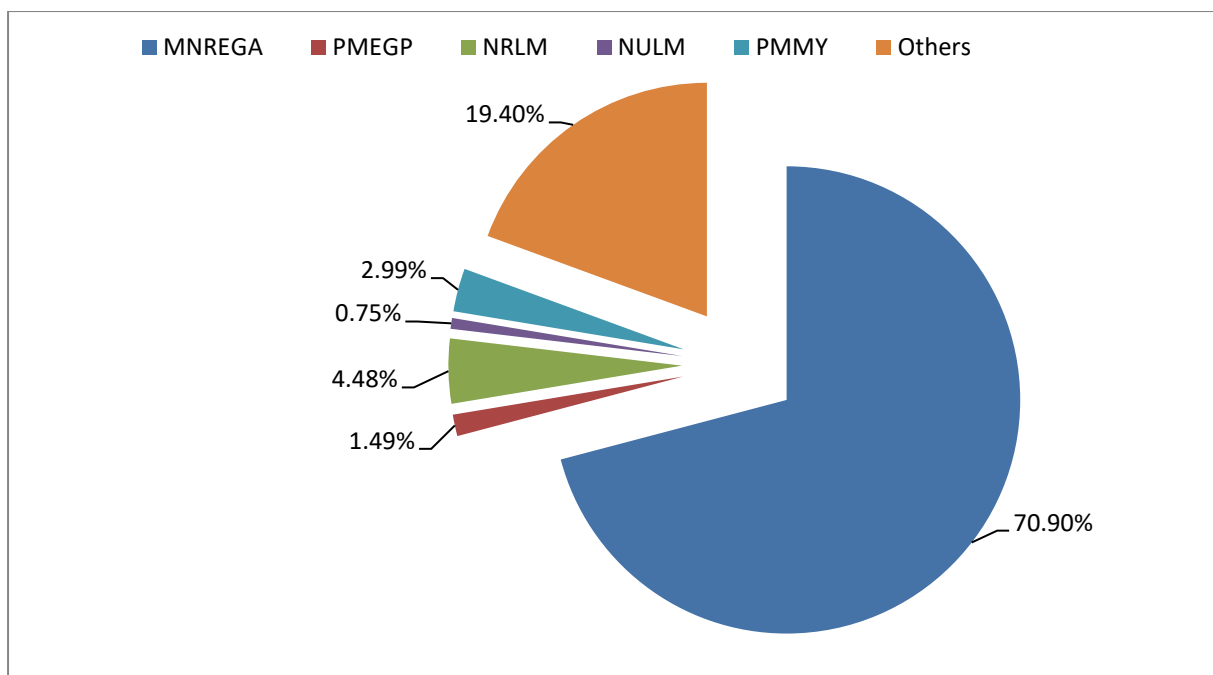

Figure 3.3: Distribution of Households benefitted from Employment Schemes

Households by number of employed persons

3.14 Households are categorized according to the number of employed persons based on Usual Principal Status approach in that household. For that, all the households are grouped in five categories as follows:

- 1) None (no family member is employed);
- 2) 1 person employed households;
- 3) 2 persons employed households;
- 4) 3 persons employed households;

- 5) 4 & above persons employed households

3.15 Table 3.3 shows that about 46.7 per cent of the households had only one person as employed/earner followed by households with 2 employed persons (32.4 per cent). Households with 3 employed persons constitute 11.3 per cent and 4.4 per cent of the households did not have a single employed person/earner and the households with 4 & above persons as employed/earner constitutes 5.2 per cent.

Table 3.3: Distribution of households by number of employed persons aged 15 years and above

All India (in per cent)

SECTOR	NONE	1 PERSON	2 PERSONS	3 PERSONS	4 & ABOVE PERSONS
RURAL	3.7	43.7	34.0	12.5	6.0
URBAN	6.0	54.3	28.4	8.4	3.0
RURAL + URBAN	4.4	46.7	32.4	11.3	5.2

3.16 The same trend was visible in both rural and urban sectors also where households with 1 employed person constituted the highest proportion followed by households with 2 employed persons. In urban sector, the proportion of households with 1

employed person was significantly higher about 54.3 per cent when compared to other types of households. The proportion of the households with no employed person or earner was 6.0 per cent in urban sector as compared to 3.7 per cent in rural sector.

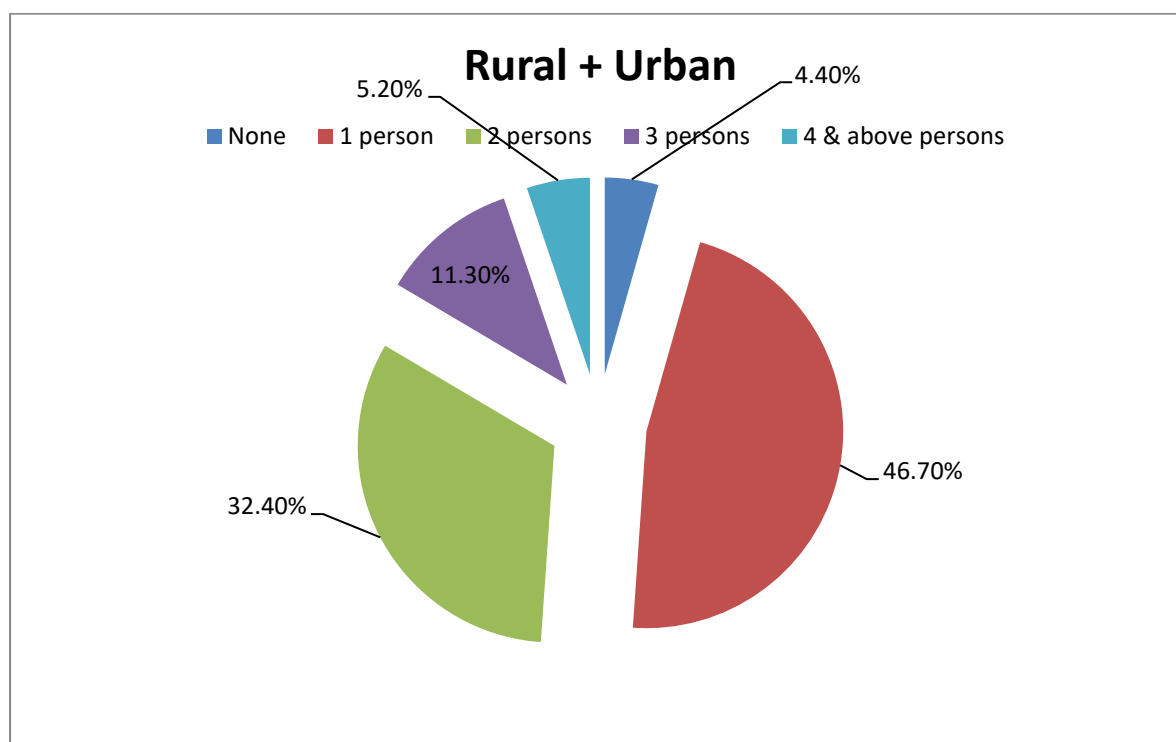

Figure 3.4: Distribution of households by number of employed Persons

Households by Number of Wage/Salaried Persons

3.17 In Table 3.4, information is compiled on proportion of wage/salaried persons aged 15 years and above in a household based on Usual Principal Status approach. The households are

classified into four categories namely

- i) No wage/salaried person in the household,
- ii) One wage/salaried person,
- iii) Two wage/salaried persons and
- iv) Three and more wage/salaried persons in the household.

Table 3.4: Distribution of households by number of wage/salaried persons aged 15 years and above
All India (in per cent)

SECTOR	NONE	1 PERSON	2 PERSONS	3 PERSONS & MORE
RURAL	82.6	14.2	2.8	0.5
URBAN	59.7	30.4	8.1	1.8
RURAL + URBAN	76.0	18.8	4.3	0.9

3.18 It is clearly evident that at the All India level, about 76 per cent of the households reported to be having no wage/salaried person in their households.

3.19 It has also reported that about 82.6 per cent of the households in rural sector had no wage/salaried person (Table 7, 7.1 and 7.2, Annexure IV).

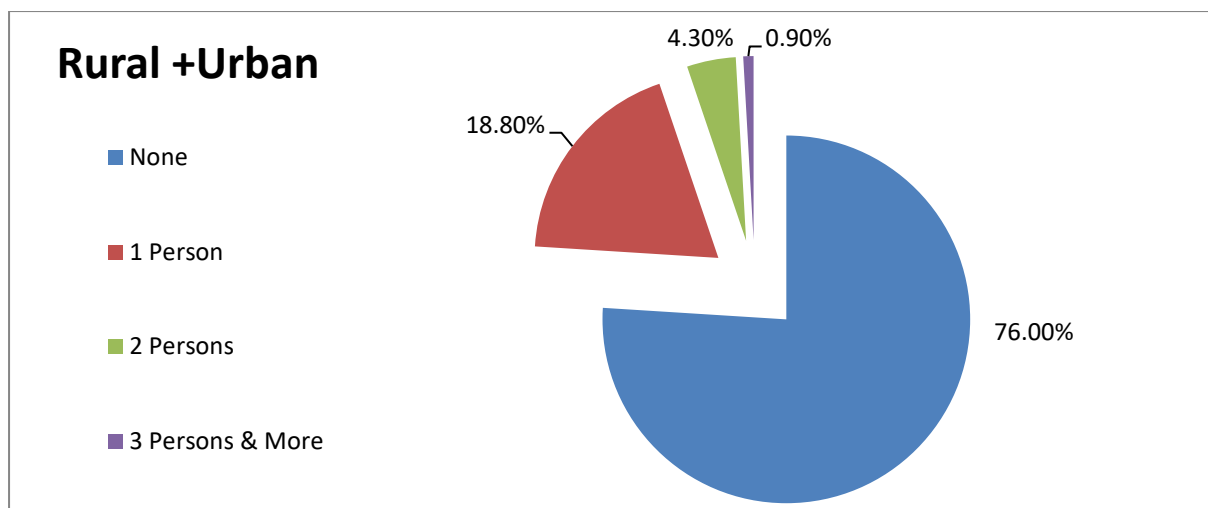

Figure 3.5: Distribution of households by number of Wage/Salaried Persons

Households by Average Monthly Earnings

3.20 In this survey an attempt has also been made to compile the information on Average Monthly Households Earnings. It could be seen from Table 3.5 that at the All India level a little more than 40.4 per cent of the surveyed households had average monthly earnings up to Rs.

7500/- only. In rural sector such households constituted about 47.8 per cent of the households whereas it was about 21.5 per cent for similar urban households. Only 1.8 per cent of the households reported earnings upto Rs 50,001 to Rs. 1,00,000 at All India level.

Table 3.5: Households by average monthly earnings

SECTOR	All India (in per cent)							
	No INCOME	UP TO 5000	5001 TO 7500	7,501 TO 10,000	10,001 TO 20,000	20,001 TO 50,000	50,001 TO 1,00,000	ABOVE ONE LAKH
RURAL	0.4	22.9	24.5	23.9	19.4	8.0	0.7	0.1
URBAN	0.5	8.9	12.1	20.2	29.2	23.6	4.5	0.9
RURAL + URBAN	0.5	18.9	21.0	22.8	22.3	12.5	1.8	0.3

3.21 The State-wise distribution of the households by average monthly earnings is presented in

(Table 8, 8.1 and 8.2 Annexure IV). The state of Chhattisgarh recorded the highest 30.6 per

cent households with lowest average monthly earnings i.e., up to Rs. 5000/- followed by West Bengal 27 per cent , Madhya Pradesh 26 per cent. On the other

hand, UT of Chandigarh had 0.7 per cent of the households with up to Rs. 5000/- average monthly earnings.

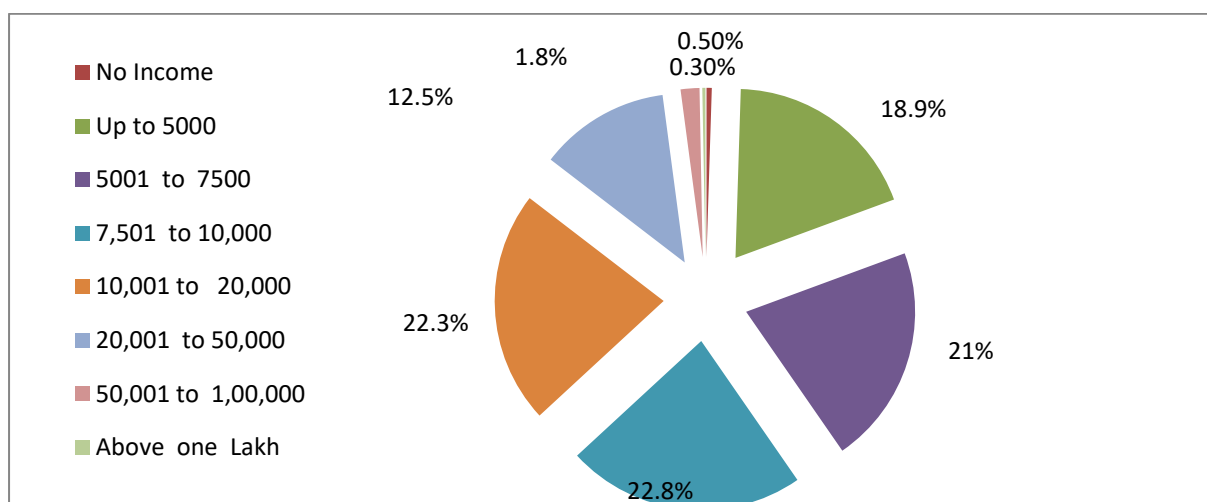

Figure 3.6: Distribution of households by Average monthly income

Table 3.6: Households having saving bank account by average monthly earnings
All India (in per cent)

SECTOR	HH	NIL	UPTO 5000	5001 TO 7500	7,501 TO 10,000	10,001 TO 20,000	20,001 TO 50,000	50,001 TO 1 LAKH	ABOVE ONE LAKH
RURAL	95.6	0.4	22.0	24.5	24.2	19.9	8.3	0.7	0.1
URBAN	97.6	0.4	8.4	11.9	20.2	29.6	24.0	4.6	0.9
RURAL + URBAN	96.2	0.4	18.0	20.8	23.0	22.8	12.9	1.8	0.3

Households by Saving Bank Accounts and Average Monthly Earnings

3.22 Table 3.6 presents percentage distribution of households having savings bank account. The survey results reveal that at the All India

level 96.2 per cent of the households had saving bank accounts. (Government, Private and Co-operative bank) for both rural and urban sectors. Government of India's recent initiatives to enhance the financial

inclusion and accessibility of financial institutions such as Pradhan Mantri Jan Dhan Yojna and Pradhan Mantri Micro Units Development and Refinance Agency (Mudra) Yojana may have translated into entering of more population in the ambit of formal financial activities. Table 3.6 shows that out of 96.2 per cent households, 18 per cent households reported their average monthly household's earnings in the range upto Rs. 5000 and 23.0 per cent households with the range of average monthly earnings of Rs. 7501 to Rs. 10,000. Only in case of 0.3 per cent households, earnings above Rs. 1,00,000 have been reported with saving bank account (Table 9.9.1 and 9.2 Annexure IV).

Households by Number of Earners and Average Monthly Earnings

3.23 It has been observed that at the All India level (Table 3.7) 4.4 per cent of the households did not have even a single earner. Among the households without any earner, 50.9 per cent households have average monthly earnings up to Rs. 5,000.

3.24 Meghalaya has the highest 29.9 per cent households with no income. Across all States/UTs, among the households with no earner Gujarat has the highest (0.8 per cent) households with average monthly earnings above Rs. 1,00,000 (Table 11 to 11.4 Annexure IV).

3.25 At the All India level, 46.7 per cent households had only a single earner. Among single earner households, only 23.9 per cent of the households reported average monthly earnings up to Rs. 5,000 and by 24.2 per cent of the households with Rs. 5,001 to Rs. 7500. Dadra & Nagar Haveli had the highest percentage of households 65.6 per cent with a single earner followed by Jammu & Kashmir 63.4 per cent. It has also been observed that 32.4 per cent households reported having 2 earning family members and out of these, most of the households 24.1 per cent had average monthly earnings in the range of Rs. 10,001 to Rs. 20,000 and 12.2 per cent with Rs. 20,001 to Rs. 50,000.

Table 3.7: Households by earning members and average monthly earnings based on UPS approach

All India (in per cent)

DETAILS OF EARNER	HH	NIL	UP TO 5000	5001 TO 7500	7,501 TO 10,000	10,001 TO 20,000	20,001 TO 50,000	50001 TO 1,00,000	ABOVE ONE LAKH
NO EARNER	4.4	6.3	50.9	8.8	11.5	15.5	6.6	0.3	0.1
ONE EARNER	46.7	0.2	23.9	24.2	22.9	17.6	10.2	0.9	0.1
TWO EARNER	32.4	0.2	13.8	21.8	25.3	24.1	12.2	2.5	0.4
THREE EARNER	11.3	0.1	7.0	15.2	21.3	33.0	19.6	3.1	0.6
FOUR & ABOVE EARNER	5.2	0.1	4.2	10.2	20.7	35.5	24.6	3.6	1.2

3.26 The results reveal that 11.3 per cent households had three earning members and out of these 21.3 per cent households have average monthly earnings in the range of Rs. 7,501 to Rs. 10,000 followed by 15.2 per cent households with average monthly earnings in the range of Rs. 5,001 to Rs. 7,500.

3.27 It is also revealed that 5.2 per cent of the households reported having 4 and above earning members. Out of these 24.6 per cent of the households reported having average monthly earnings in the range of Rs. 20,000 to Rs. 50,000. The state of Mizoram has highest 13.4 per cent households having 4 and above earners

followed by Meghalaya 11.2 per cent and Chhattisgarh 9.5 per cent. (Table 11.4, Annexure IV).

Households by Number of Wage Salaried Persons and Average Monthly Earnings

3.28 In the present survey, information has been compiled for the first time regarding the households having wage/salaried member vis-a-vis average monthly earnings, as presented in table 3.8. The results reveal that at the All India level 17.4 per cent of the households had wage/salaried persons. Among the households with wage/salaried persons, 5.9 per cent of the households had average monthly earnings in the range of Rs.50, 001- Rs. 1,00,000 while 30.8 per cent of the

households with Rs.20,001- Rs. 50,000 of average monthly earnings.

Table 3.8: Households having wage/salaried persons by average monthly earnings
(in per cent) **All India**

SECTOR	HH	NIL	UP TO 5000	5001 TO 7500	7,501 TO 10,000	10,001 TO 20,000	20,001 TO 50,000	50,001 TO 1,00,000	ABOV E ONE LAKH
RURAL	17.4	0.1	6.7	13.6	19.8	30.1	26.3	3.3	0.3
URBAN	40.3	0.1	3.4	6.9	14.2	29.3	35.6	8.7	1.7
RURAL+ URBAN	17.4	0.1	5.1	10.4	17.1	29.7	30.8	5.9	1.0

3.29 In the rural sector, out of 17.4 per cent households having wage/salaried persons, 26.3 per cent of the households had average monthly earnings in the range of Rs. 20,001- Rs. 50,000 and 3.3 per cent of the households with average monthly earnings in the range of Rs. 50,001-Rs.1,00,000.

3.30 In case of urban sector, percentage of households having Wage/salaried persons was more than double 40.3 per cent as compared to rural sector. The variation can also be observed in case of average monthly earnings of urban sector as compared to

overall results of All India and rural sector. In urban sector, 8.7 per cent of the households recorded having average monthly earnings of Rs. 50,001-100,000 and 35.6 per cent households in the range of Rs. 20,001-Rs 50,000 average monthly earnings.

3.31 Union Territory Chandigarh had maximum 69.8 per cent households with wage/salaried persons. The state of West Bengal had recorded the lowest (8.8 per cent) households with wage/salaried persons (Table 12, Annexure IV).

CHAPTER-IV

LABOUR FORCE ESTIMATES

Introduction

4.1 Labour Force indicates the supply of labour in the country and is an important input for production of goods & services in the country. The reliable estimates of labour force are important for policy and planning purposes. The Labour Force Participation Rate derived shows the proportion of a country's working-age population that engages actively in the labour market, either by working or looking/searching for work. It provides an indication of the relative size of the supply of labour available to engage in the production of goods and services. The breakdown of the labour force by sector, sex, State/UTs, social group and age group wise gives a profile of the distribution of the economically active population within the country to formulate policies and plans for various target population.

4.2 In our country, the Labour Force Participation Rate for women is quite low as compared to other developed countries. Based on the

experience gained in each round, more and more probing questions for some of the categories of persons especially persons pursuing studies and persons involved in domestic duties are included in the schedule, however, still it is likely that the Labour Force Participation Rate (LFPR) and Worker Population Rate (WPR) are underestimated due to insufficient probing especially in case of these categories of persons.

4.3 The present chapter deals with the Labour Force Participation Rate, Worker Population Rate, Unemployment Rate, Proportion Unemployed estimates and activities pursued by employed persons based on Usual Principal Status approach and Usual Principal and Subsidiary Status approach. All the estimates derived in the present chapter are for the persons aged 15 years and above as was compiled in the previous Annual EUS reports also.

Box 4.1 Concepts & Measurement of Labour Force

Concepts of Labour Force

- 1. Labour Force Participation Rate:** - Labour Force Participation Rate (LFPR) is defined as the number of persons in the labour force per 1000 persons.

$$LFPR = \frac{\text{no. of employed} + \text{no. of unemployed persons}}{\text{Total population}} \times 1000$$

- 2. Worker Population Rate:** - Worker Population Rate (WPR) is defined as the number of persons employed per 1000 persons.

$$WPR = \frac{\text{no. of employed Persons}}{\text{Total population}} \times 1000$$

- 3. Proportion Unemployed:** - Proportion Unemployed (PU) is defined as the number of persons unemployed per 1000 persons.

$$PU = \frac{\text{no. of unemployed persons}}{\text{Total population}} \times 1000$$

- 4. Unemployment Rate:** - Unemployment Rate (UR) is defined as the number of persons unemployed per 1000 persons in the labour force (employed & unemployed).

$$UR = \frac{\text{no. of unemployed persons}}{\text{labour force}} \times 1000$$

Measurement of Labour Force

In a country where majority of the workers are employed in the unorganized sector and pursuing multiple activities, estimating labour force and its derivatives by a single approach is a difficult task. In such cases no single measure is appropriate to estimate the labour force parameters precisely. As per International practice, Labour Force related parameters can be estimated for both longer reference period and current or shorter reference periods. Accordingly, based on longer reference period, Labour Force related parameters may be derived by the following two different approaches.

- i) Usual Principal Status (UPS) Approach:** - The major time criterion based on the 365 days is used to determine the activity pursued by a person under the usual principal status approach. Accordingly, the major time spent by a person (183 days or more) is used to determine whether the person is in the labour force or out of labour force. A person found unemployed under this approach reflects the chronic unemployment. In the present survey, the usual principal status approach estimates are derived for a moving reference period of last twelve months. For example, if the household is surveyed in January, 2017, the reference period for collection of information is January, 2016-December, 2016.

- ii) **Usual Principal and Subsidiary Status (UPSS) Approach:** - The other important approach to measure the labour force parameters is the usual principal & subsidiary status approach. This approach is a hybrid one which takes into consideration both the major time criterion and shorter time period (30 days or more in any economic activity). Thus a person who has worked even for 30 days or more in any economic activity during the reference period of last twelve months is considered as employed under this approach. In this approach, the reference period is same as taken in the usual principal status approach (UPS). This approach is also called the usual status approach.

Concepts of Labour Force

4.4 The results of Labour Force Participation Rate and its derivatives are compiled under two approaches namely Usual Principal

Status (UPS) approach and Usual Principal and Subsidiary Status (UPSS) approach which are based on longer reference period of one year.

Labour Force Participation Rate (LFPR)

Table 4.1: LFPR based on UPS & UPSS approach for persons aged 15 years & above
All India (in per cent)

APPROACH	RURAL				URBAN				RURAL+ URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
UPS	77.5	26.0	69.3	52.8	73.5	19.4	36.5	47.2	76.4	24.1	61.2	51.2
UPSS	78.0	29.5	69.3	54.8	73.6	20.1	38.1	47.6	76.8	26.9	61.6	52.8

4.5 The results of LFPR are presented in the form of proportions for persons aged 15 years & above only (Table 4.1). The results are compiled for all States/UTs. In order to derive the absolute figures, the proportions

may be multiplied with the corresponding population figure of same age-group/sector/gender.

4.6 At the All India level, the Labour Force Participation Rate (LFPR) based on Usual Principal

Status approach was estimated at 51.2 per cent or 512 persons out of 1000 persons aged 15 years & above. The present survey has estimated the various Labour Force indicators for the third gender namely 'transgender' also. The gender wise estimates derived shows that 76.4 per cent of the males, 24.1 per cent of the females and 61.2 per cent of the transgenders aged 15 year and above were either working or looking/available for work. Among States and UTs, Andhra Pradesh recorded the highest LFPR of 65.8 per cent followed by Telangana 64.8 per cent and Meghalaya 63.5 per cent. The lowest 41.0 per cent was recorded in Chandigarh followed by J & K (42.2 per cent) and Delhi 43.4 per cent (Table 13 Annexure IV).

4.7 While analyzing the sector-wise LFPR estimates under UPS approach, it may be seen from the table that in rural sector the LFPR was estimated to be 52.8 per cent whereas in urban sector the same was 47.2 per cent at the All India level. One of the reasons for lower LFPR in urban areas was perhaps

the low female participation rate of 19.4 per cent. In rural and urban sector, the male participation rate was at 77.5 per cent and 73.5 per cent respectively. As compared to male LFPR, female LFPR was very low for both rural and urban sectors (See box 4.2). The LFPR based on UPS approach for transgenders were 69.3 per cent and 36.5 per cent in rural and urban sectors respectively.

4.8 Under the UPSS approach, the LFPR at the All India level was estimated to be 52.8 per cent. Under this approach, the persons employed even for 30 days and above are also taken into consideration and counted as employed. This approach is important to understand the contribution made by the seasonal workers in the production of goods and services in the country. Many persons categorized as not in labour force or unemployed based on major time criterion are counted as employed under this approach, if they have worked for 30 days and above during the one year reference period.

Box 4.2: In Depth: Female Labour Force Participation Rate (LFPR)

The low female Labour Force Participation Rate (LFPR) is a cause of concern for the economy as females constitute a significant proportion of the total working age population. In the World Economic Forum 'Global Gender Report 2015' India is ranked 139 among 145 countries on the Economic participation and opportunity sub index and in the rankings by indicator, India's rank in Female LFPR is 136 among 145 countries. The 6th EUS survey results reveal that the female LFPR of 24.1 per cent at All India (Rural + Urban) level was significantly lower than the LFPR of 76.4 per cent and 61.2 per cent among males and transgenders respectively while in 5th EUS survey report, the female LFPR was 23.7 per cent at All India as compared to 75 per cent and 48 per cent among males and transgenders respectively. The LFPR for females in urban areas is very low at 19.4 per cent as compared to 26.0 per cent in rural areas.

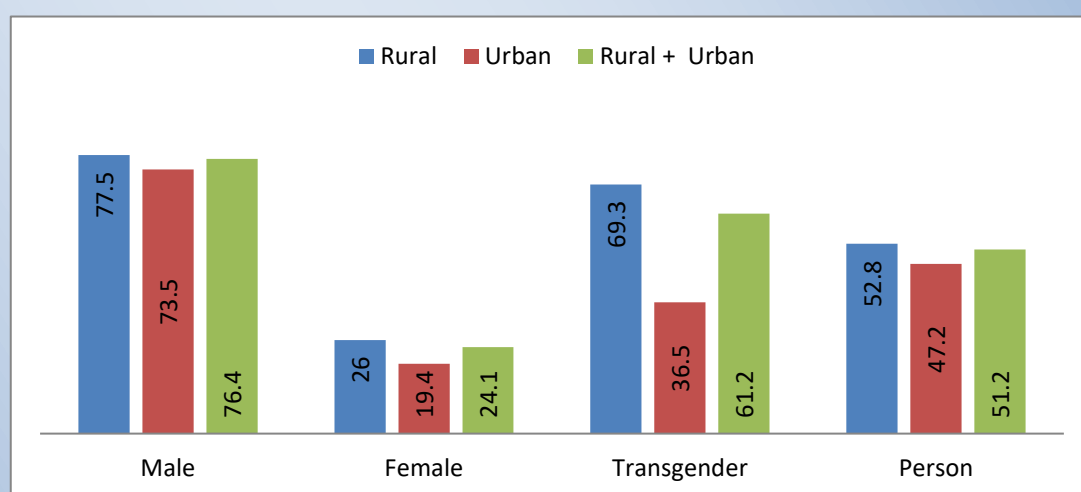

Figure 4.1: Gender wise LFPR based on UPS approach

There are large interstate variations in the female LFPR. The North Eastern and Southern States, in general, display high female LFPR as compared to low levels in Northern States. Chandigarh had the lowest female LFPR of 6.1 per cent followed by Bihar (7.5 per cent), J & K (11.2 per cent), Uttar Pradesh (11.9 per cent) and Delhi (14.0 per cent). Mizoram has the highest female LFPR of 54.7 per cent followed by Telangana (52.1 per cent), Meghalaya (51.2 per cent), Andhra Pradesh (50.1 per cent).

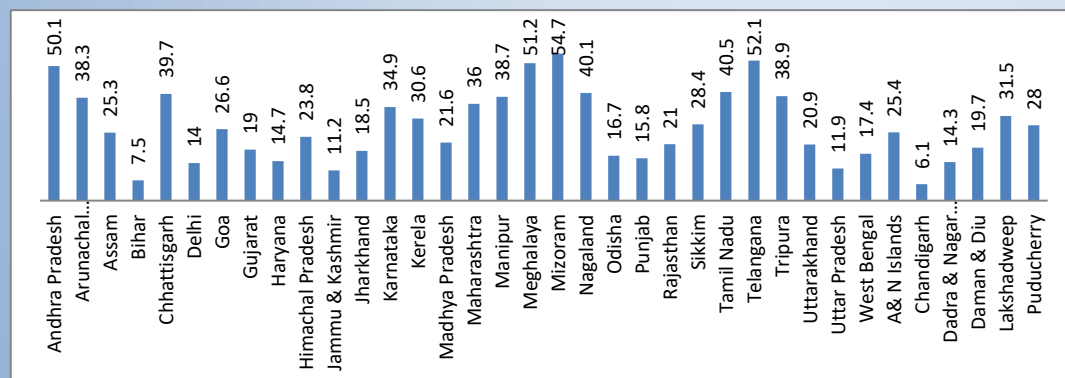

Figure 4.2: Female Labour Force Participation Rate (State wise)

4.9 It has been observed that the Male LFPR has increased from 75 per cent to 76.4 per cent in 6th EUS as compared to 5th EUS and the Female LFPR has increased from 23.7 per cent to 24.1 per cent respectively. As the male & Female LFPR has increased as compared to 5th EUS, the gap between LFPR of male and female has also increased. The gap between the male and female LFPR is highest in the States/UTs of Bihar where it comes out to be 76.0 per cent and 7.5 per cent respectively followed

by Chandigarh where the male LFPR is 69.1 per cent and female LFPR is 6.1 per cent. The least gap in male and female LFPR comes out in the States/UTs of Mizoram where male LFPR is 69.9 per cent and female LFPR is 54.7 per cent followed by Telangana where the male LFPR is 77.1 per cent and the female LFPR is 52.1 per cent (Table 13 Annexure IV) followed by Nagaland having male LFPR of 66.1 per cent and female LFPR of 40.1 per cent.

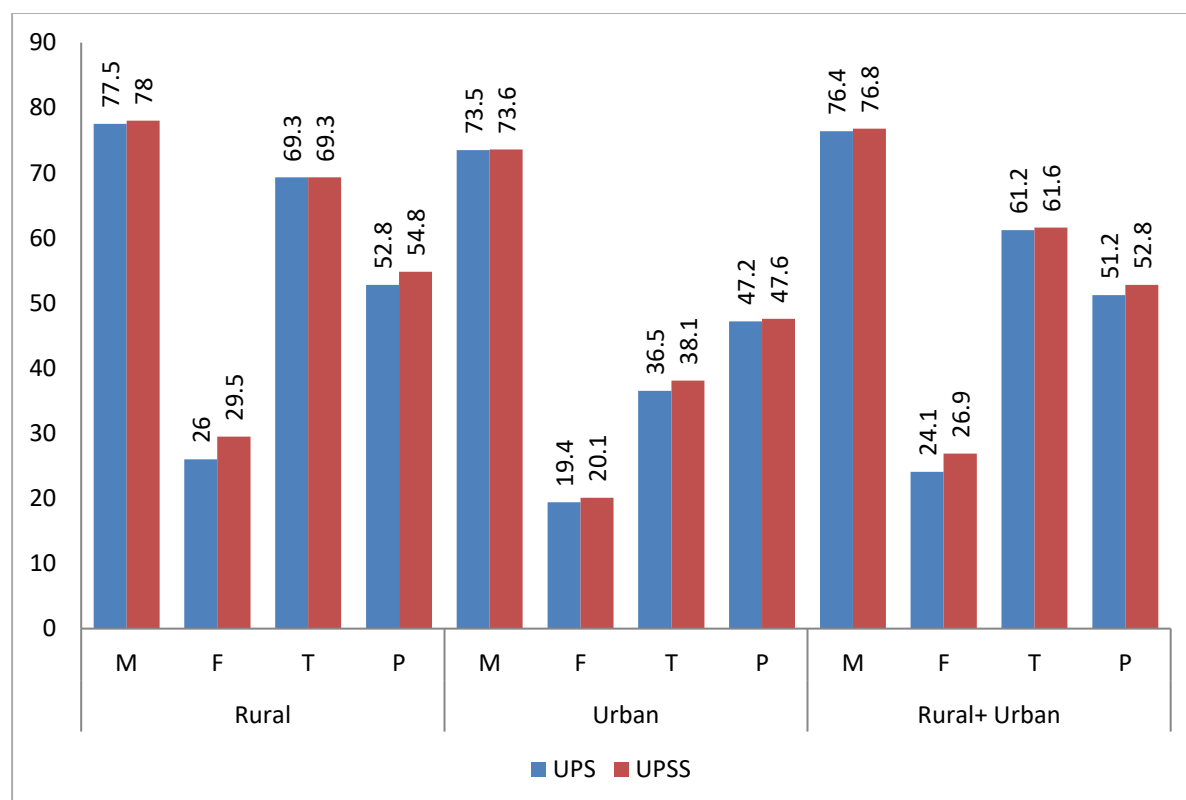

Figure 4.3: Labour force participation rate based on UPS and UPSS approach

4.10 While comparing the results of UPSS approach with UPS approach, it may be seen that for male category, the LFPR under the UPSS approach was higher than that under UPS approach by 0.4

per cent. Whereas in case of females the LFPR under UPSS approach was higher than LFPR under UPS approach by 2.8 per cent at the All India level.

Worker Population Rate (WPR)

4.11 The second important parameter of the labour force is the Worker Population Rate. The WPR signifies the proportion of workers /employed persons in the total population for the specific age group. As stated earlier, all the labour force related parameters are derived for the persons aged 15 years and above. The Worker Population Rate based on Usual Principal Status approach and

Usual Principal and Subsidiary Status approach for persons aged 15 years and above at the All India level is given below in Table 4.2.

4.12 In the 6th EUS, it has been observed that the estimated absolute figure of self-employed persons came out be 20.65 cr. which was 18.66 cr. in the 5th EUS. The difference of 1.45 cr. between these figures shows the appreciable increase in Workers Population Rate.

Table 4.2: Worker Population Rate based on UPS and UPSS approach for persons aged 15 years & above
All India (in per cent)

APPROACH	RURAL				URBAN				RURAL + URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
UPS	74.1	23.9	67.5	50.1	70.3	16.8	35.7	44.3	73.1	21.9	59.6	48.5
UPSS	75.6	28.1	67.5	52.9	70.8	17.8	37.3	45	74.3	25.2	60	50.7

4.13 The WPR was estimated to be 48.5 per cent at the All India level based on Usual Principal Status Approach or in other words 48.5 per cent of persons aged 15 years and above were employed at All India level based on major time criterion approach. In case of gender wise classification of results, 73.1 per cent of the males, 21.9 per cent of the females and 59.6 per cent of the transgenders aged 15 years and above were employed based on UPS approach. Among States and UTs, the WPR based on UPS approach was the highest in the State of Andhra Pradesh 63.2 per cent followed by Telangana 62.5 per cent, Meghalaya 61.1 per cent and lowest for J & K 38.5 per cent, Chandigarh 40.3 per cent & Delhi 41.2 per cent. (Table 14, Annexure IV)

4.14 While making comparison with the WPR of 5th EUS, it may be

seen that there is increase in WPR by 0.7 per cent under UPS approach as in 6th EUS, the WPR was 48.5 per cent whereas in the 5th EUS it was 47.8 per cent.

4.15 In rural sector, 50.1 percent of the persons aged 15 years and above were employed whereas in urban sector 44.3 per cent of the persons aged 15 years & above were employed based on UPS approach.

4.16 It may be seen from table 4.2 that the WPR based on the UPSS approach was estimated at 50.7 per cent at the All India level. The gender wise distribution of results show that 74.3 per cent of the males, 25.2 per cent of the females and 60.0 per cent of the transgenders aged 15 years and above were employed based on UPSS approach at the All India level.

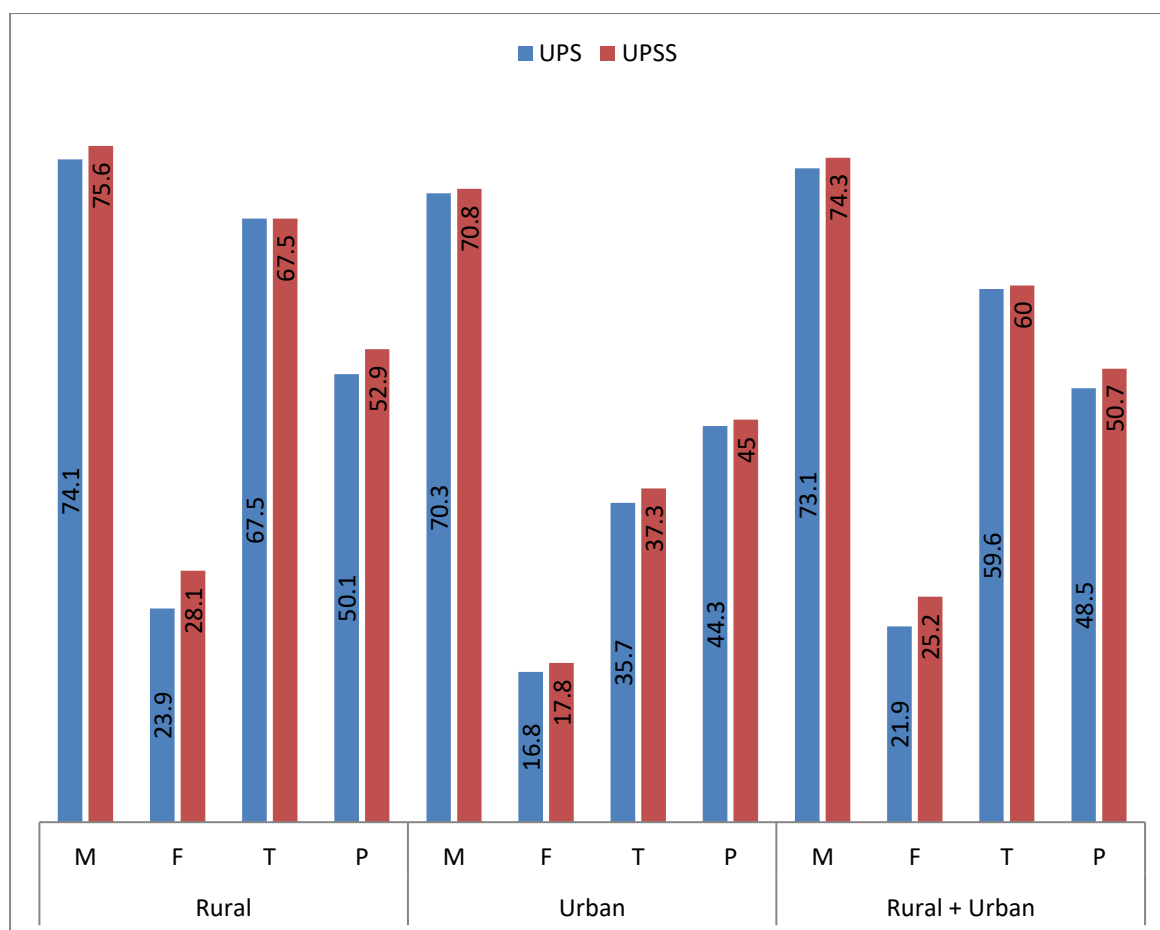

Figure 4.4: Worker Population Rate based on UPS and UPSS approach

4.17 At sectoral level, WPR was estimated to be 52.9 per cent and 45 per cent in the rural and urban sector respectively under the UPSS approach. The WPR for females in rural areas based on UPSS approach was higher by 4.2 per cent as compared to that based on UPS approach (Table 4.2)

Unemployment Rate (UR)

4.18 The third important parameter of the labour force is the Unemployment Rate. The

unemployment rate reflects the portion of the labour force which was available for work during the given reference period but did not get work. The Unemployment Rate derived based on Usual Principal Status approach is also sometimes called as “chronic unemployment” as the persons remained unemployed for major part of the period for which they were available. The Unemployment Rate in the present report has been calculated for Usual Principal

Status approach and Usual Principal & Subsidiary Status approach. The UR based on UPS

and UPSS approaches at the All India level is given below in Table 4.3).

Table 4.3: Unemployment Rate based on UPS & UPSS approaches for persons aged 15 years & above
All India (in per cent)

APPROACH	RURAL				URBAN				RURAL+ URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
UPS	4.3	8.0	2.7	5.2	4.3	13.2	2.2	6.1	4.3	9.2	2.6	5.4
UPSS	3.1	4.7	2.7	3.5	3.8	11.2	2.1	5.3	3.3	6.1	2.6	3.9

4.19 The Unemployment Rate based on Usual Principal Status approach was estimated to be 5.4 per cent at the All India level or in other words 5.4 per cent of the persons who were available for work during the reference period could not get work and remained unemployed. Among the States and UTs unemployment rate exhibits wide variations. Tripura had the highest unemployment rate of 20.1 per cent (fig. 4.6) followed by Kerala 13.2 per cent, A & N Islands 11.8 per cent, Goa 10.1 per cent and J & K 8.8 per cent. Gujarat had the lowest UR of

0.9 per cent followed by Daman & Diu 1.5 per cent, Chandigarh 1.7 per cent, Karnataka 1.9 per cent, Dadra & Nagar Haveli 2.3 per cent (Table 15, Annexure IV). The Unemployment Rate for females was observed to be higher than the males across rural and urban sectors. At the All India level, the UR for females at 9.2 percent was more than double as compared to 4.3 per cent UR for male counterparts. The unemployment rate for transgenders was estimated to be 2.6 per cent at the All India level based on UPS approach.

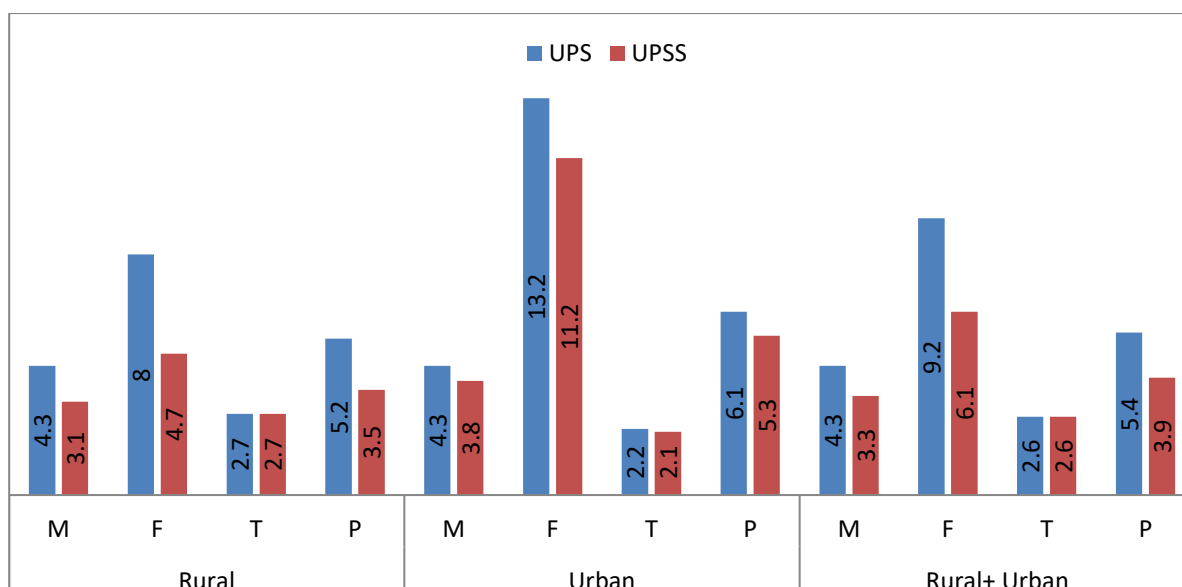

Figure 4.5: Unemployment Rate based on UPS & UPSS approach

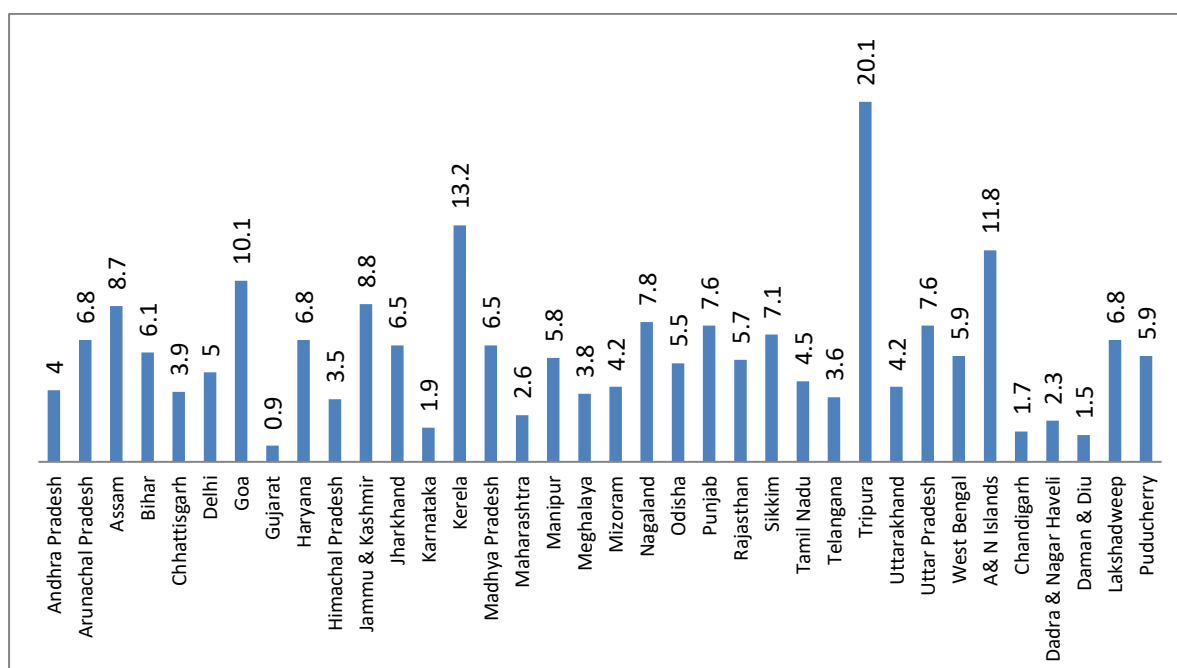

Figure 4.6: State/ UT wise Unemployment rate based on UPS approach

4.20 The percentage change in the LFPR of 6th EUS after comparing with the 5th EUS comes out to be 1.7 per cent while the percentage change in the WPR comes out to be 1.4 per cent. It may be seen from

the data that the Unemployed Rate has increased from 5.0 to 5.4 per cent. After in depth analysis, it may be inferred that the WPR has increased by 1.4 per cent whereas LFPR has increased by 1.7 per

cent. However it is observed that there is marginal increase in unemployment rate at all India level whereas the unemployment rate has increased in urban area by 1.2 per cent compared to 5th EUS.

4.21 In the rural sector, based on Usual Principal Status approach unemployment rate was 5.2 per cent whereas in urban sector, the same was 6.1 per cent at the All India level. In case of urban females the UR was significantly high at 13.2 per cent at the All India level as compared to 4.3 percent for urban males and rural females (8 per cent). Similarly, the unemployment rate among transgenders in urban areas was less at 2.2 per cent as compared to UR of 2.7 per cent for transgenders in rural areas.

4.22 The Unemployment Rate based on Usual Principal & Subsidiary Status approach was estimated to be 3.9 per cent at the All India level. The unemployment

rate for males was 3.3 per cent whereas for females, the same was 6.1 per cent. The unemployment rate for transgenders based on UPSS approach was 2.6 per cent at the All India level. At the sectoral level, the unemployment rate in rural sector was estimated to be 3.5 per cent whereas in urban sector, it was 5.3 per cent at the All India level based on UPSS approach (Table 4.3).

Proportion Unemployed (PU)

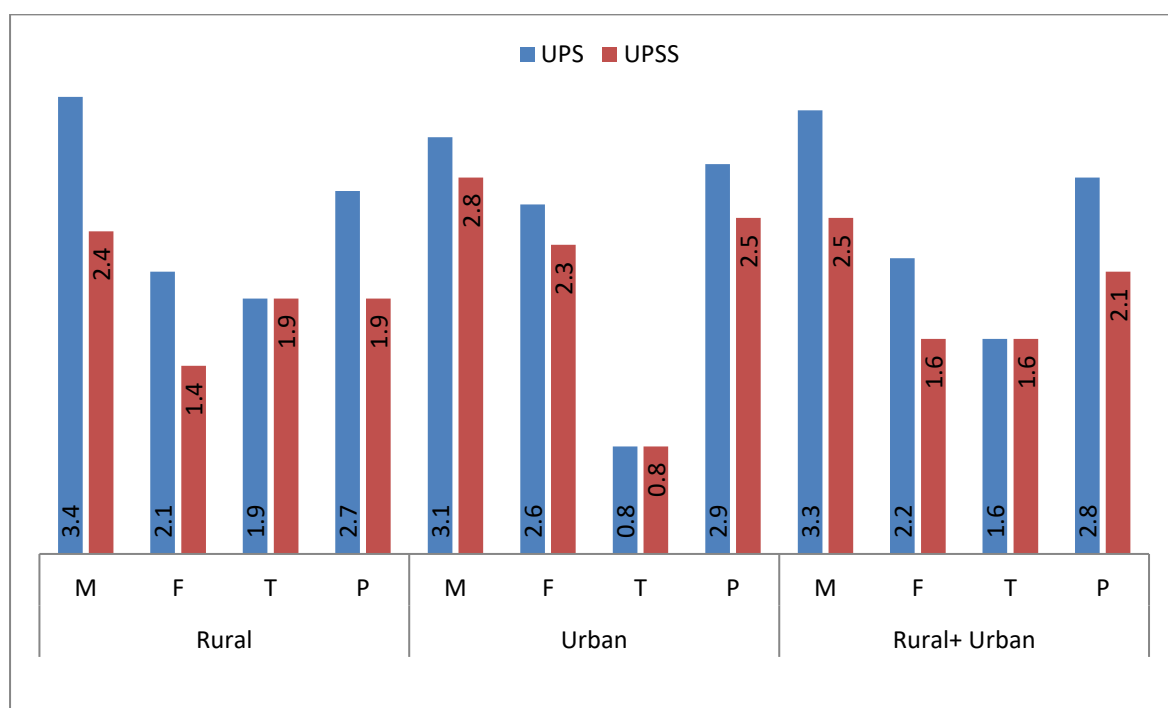

4.23 The other important parameter under the labour force is proportion unemployed. As discussed earlier, it is defined as a proportion of unemployed persons in the total population, whereas unemployment rate is defined as a proportion of unemployed persons in the labour force. The Proportion Unemployed has been derived for Usual Principal Status approach and Usual Principal & Subsidiary Status approach in this report. The PU based on these two approaches is given below in Table 4.4

Table 4.4: Proportion Unemployed based on UPS & UPSS approaches for persons aged 15 years & above
All India (in per cent)

APPROACH	RURAL				URBAN				RURAL+ URBAN			
	M	F	T	P	M	F	T	P	M	F	T	P
UPS	3.4	2.1	1.9	2.7	3.1	2.6	0.8	2.9	3.3	2.2	1.6	2.8
UPSS	2.4	1.4	1.9	1.9	2.8	2.3	0.8	2.5	2.5	1.6	1.6	2.1

4.24 The Proportion Unemployed based on Usual Principal Status approach was estimated to be 2.8 per cent at the All India level. In case of males, the PU was 3.3 per cent whereas for female category

the same was 2.2 per cent. The proportion unemployed for transgenders was estimated to be 1.6 per cent. At sectoral level, the PU was 2.7 per cent in rural and 2.9 per cent in the urban sector.

**Figure 4.7: Proportion Unemployed based on UPS & UPSS approach**

Activity-wise distribution of the population

4.25 The persons aged 15 years and above are classified based on

various activities pursued by them during a longer reference period of one year. The workers/employed persons are also classified based

on the economic activity pursued by them on the basis of National Industrial Classification 2008 (NIC 2008) at the section level. The workers or employed persons are also classified among occupations on the basis of National Classification of Occupations (NCO 2004).

Activity-wise distribution of persons

4.26 Based on the Usual Principal Status approach, the main activities pursued by the persons are as follows:

- i) worked in household enterprise as an own account worker;
- ii) worked in household enterprise as an employer;
- iii) worked as helper in household enterprise (unpaid family worker);
- iv) worked as permanent regular salaried/ wage employee;
- v) worked as contract worker;
- vi) worked as casual wage labour in public works;

vii) Worked as casual wage labour in other types of work; private work excluding agriculture & allied work.

viii) Worked as casual wage labour in agriculture & allied sectors.

ix) did not work but was seeking and/or available for work;

x) attended educational institution;

xi) attended domestic duties only;

xii) Rentiers, pensioners, remittance recipients, etc.;

xiii) not able to work due to disability;

xiv) Others (begging, prostitution, etc.).

The classification as mentioned above from sr. no. (i) to (ix) belongs to the labour force and remaining from sr. no. (x) to (xiv) belongs to the non-labour force category under the Usual Principal Status approach.

Table 4.5: Distribution of employed persons among different categories of employment based on UPS & UPSS approach (R+U) (in per cent)

APPROACH	SELF EMPLOYED	WAGE/SALARY EARNERS	CONTRACT WORKER	CASUAL LABOUR
UPS	49.2	18.0	3.8	28.9
UPSS	49.5	17.3	3.7	29.5

4.27 The distribution of employed persons by categories of employment, namely, self-employed wage/salary earners, contract workers and casual labour based on UPS & UPSS approach is presented in Table 4.5. The survey results show that majority of the persons i.e. 49.2 per cent of the employed persons were reported to be self-employed followed by 28.9 per cent as casual labour, 18 per cent as wage/salary earners and remaining 3.8 per cent as contract workers based on Usual Principal Status approach. Under the Usual Principal & Subsidiary Status approach also a similar pattern as observed in UPS approach. State/UT wise distribution of employed persons by categories of employment is given in (Table 29, Annexure IV).

Among the State/UTs, Arunachal Pradesh had the highest 75 per cent of the workers as self-employed as compared to the lowest 19.1 percent of the workers as self-employed in Chandigarh. Self-employment was the dominant form of employment in all the States/UTs barring UTs of Chandigarh, A & N Islands, Goa, Sikkim and Delhi. Tamil Nadu had the highest 45.3 per cent of workers engaged in casual labour followed by Andhra Pradesh 43.1 per cent, West Bengal 42.5 per cent, Puducherry 41.9 per cent and Kerela 41.7 per cent (Table 29, Annexure IV). Chandigarh had the highest 63.9 per cent of the workers employed on regular wage/salary basis while Madhya Pradesh had the lowest 11.5 per cent (Table 29, Annexure IV).

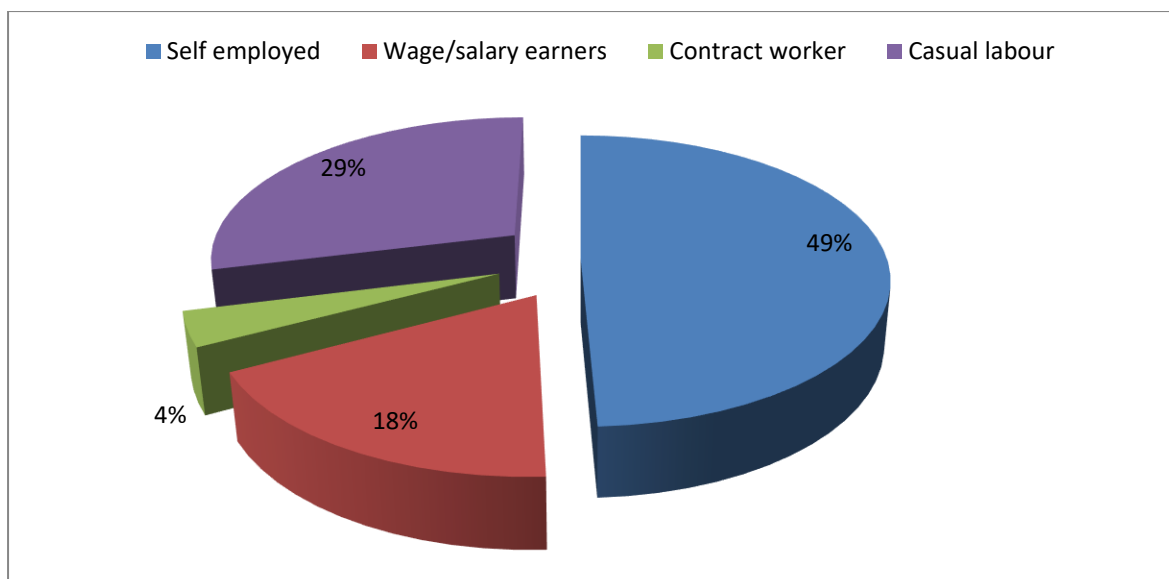

Figure 4.8: Distribution of Employed persons by various activities under UPS approach

4.28 While analyzing the results at gender level, the survey results reveal that for male category, self-employment was the dominant categories in which majority of the male persons were employed. Under the self-employment category, 50.8 per cent of the male were employed followed by 26.7

per cent under the casual labour, 18.6 per cent under wage/salary earners and remaining 3.9 per cent as contract workers based on Usual Principal Status approach. The distribution of employed persons for male category based on UPS and UPSS classification is given below in Table 4.6.

Table 4.6: Distribution of employed persons (male) among different categories of employment based on UPS & UPSS approach (R+U)

(in per cent)

APPROACH	SELF EMPLOYED			WAGE/SALARY EARNERS			CONTRACT WORKER			CASUAL LABOUR		
	M	F	T	M	F	T	M	F	T	M	F	T
UPS	50.8	43.9	43.0	18.6	15.8	24.1	3.9	3.3	3.9	26.7	36.9	29.0
UPSS	50.9	45.4	43.3	18.3	13.8	24.0	3.9	3.0	3.9	26.9	37.8	28.8

4.29 In case of females, self employment was the dominant form of employment. At the All India level, 43.9 per cent of the female work force was employed as self employed followed by 36.9 per cent under casual labour, 15.8 per cent as wage/salary earners and remaining 3.3 per cent as contract worker based on Usual Principal Status approach. The distribution of female employed persons based on UPS and UPSS classification is given above in Table 4.6

4.30 In case of transgenders also self-employment was the main form of employment under which 43.0 per cent of the transgenders were employed followed by 29.0 per cent as casual labour, 24.1 per cent as wage and salaried earners

and remaining 3.9 per cent as contract workers. The distribution of transgender employed persons based on UPS and UPSS classification is given above in Table 4.6.

Industry wise distribution of workers

4.31 The employed persons are further classified based on the economic activity pursued by them in different industry sections. The results are compiled based on National Industrial Classification 2008. The results at State/UT level are compiled at section level (A-U) of NIC 2008 classification. However, at the All India level, the survey results are presented at two digit level of NIC 2008 classification.

Table 4.7: Sector wise distribution of employed persons based on NIC 2008 classification
All India (in per cent)

APPROACH	PRIMARY SECTOR	SECONDARY SECTOR	TERTIARY SECTOR
RURAL + URBAN			
UPS	42.9	22.4	34.9
UPSS	63.8	23.0	13.1
RURAL			
UPS	55.1	19.9	24.9
UPSS	67.0	22.1	11.0
URBAN			
UPS	7.0	29.5	63.4
UPSS	20.0	35.8	44.5

4.32 Table 4.7 presents percentage distribution of employed persons (Rural+ Urban, Rural and Urban) based on NIC 2008 classification. The results reveal that under UPS approach, majority of the persons were employed in primary sector i.e. agriculture, forestry & fishing and mining & quarrying or Section A & Section B of NIC 2008 classification. In the primary sector, 42.9 per cent of the workers were estimated to be employed followed by 34.9 per cent in the tertiary sector and the remaining 22.4 per cent in the secondary sector i.e. manufacturing and construction sector (Section C, D, E & F) based on Usual Principal Status approach.

4.33 It may be observed from the above Table (4.7) that similar trend was evident under Usual Principal & Subsidiary Status approach.

4.34 The sector wise distribution of employed persons based on NIC 2008 classification is presented in Table 4.7. The results reveal that in rural sector, 55.1 per cent of the

employed persons were engaged in primary sector, followed by 24.9 per cent in the tertiary sector and remaining 19.9 per cent in the secondary sector based on Usual Principal Status approach.

4.35 As can be seen from Table 4.7, in the urban sector, majority of the employed persons were in tertiary sector. Based on Usual Principal Status approach, 63.4 per cent of the employed persons were in tertiary sector, followed by 29.5 per cent in the secondary sector and remaining 7.0 per cent in the primary sector.

Under-Employment

4.36 In order to find out whether the persons available for 12 months during the reference period are fully employed or partially employed, special tables have been generated in this report. The persons who were available for 12 months during the reference period are categorized into following four groups based on Usual Principal & Subsidiary Status approach.

- i) Worked for 12 months or fully employed
- ii) Worked for 6-11 months (partially employed)
- iii) Worked for 1-5 months (partially employed)
- iv) Did not get any work and remained unemployed throughout the year.

Table 4.8: Percentage distribution of persons available for 12 months based on UPS/UPSS approach

GROUP	RURAL	URBAN	All India (in per cent)
			RURAL + URBAN
WORKED FOR 12 MONTHS	55.6	76.2	61.2
WORKED FOR 6-11 MONTHS	39.2	18.1	33.4
WORKED FOR 1-5 MONTHS	1.6	0.6	1.3
DID NOT GET ANY WORK	3.6	5.1	4.0

4.37 The survey results reveal that 61.2 per cent of the persons who were available for 12 months were able to get the work throughout the year at the All India level as presented in Table 4.8. However, in rural areas, only 55.6 per cent of the persons who were available for 12 months were able to get work for 12 months. 4.0 per cent of the persons who were available for work throughout the year could not get any work at the All India level. The results have been compiled at State/UT, gender and sectoral level at (Table 37 Annexure IV)

4.38 The present survey has made an attempt to capture data on a number of other variables of interest related to employment and unemployment. The data has been collected on parameters like methods adopted to seek work by the unemployed, reasons for unemployment among graduates and post graduates, type of job contract. Comprehensive data on these variables serves a very useful purpose in assessing the employment unemployment situation in a holistic manner.

Employed Persons by Average Monthly Earnings

4.39 The present survey has classified the various categories of employed persons according to average monthly earnings. The data are presented in Table 4.9. At the All India level, a majority 58.9 per cent of the self-employed workers had average monthly earnings up to Rs 10,000. In Delhi 3.4 per cent of the self employed workers earned in the monthly bracket of Rs 50,001 to Rs 100,000 (Table 33, Annexure IV). At the All India level, 64.1 per cent of the self-employed males had monthly average earnings up to Rs 10,000 as against 37.8 per cent of self-employed females and 67.5 per cent of self-employed

transgenders. Only 0.1 per cent of self-employed were estimated to have earnings above Rs 1 lakh. At the All India level, 77.7 per cent i.e. more than half of the regular wage/salaried workers earned monthly average earnings of up to Rs 20,000. Whereas, 21.1 per cent of regular wage/salaried workers fall in the monthly average earnings bracket Rs 7501 to Rs 10,000 followed by 19.9 per cent in Rs 20,001-Rs 50,000 and 16.8 per cent in Rs 5001-Rs 7500. Contract workers and Casual workers were predominantly in the low earnings bracket of up to Rs 10000. 85 per cent of the contract workers and 95 per cent of the casual workers had average monthly earnings of up to Rs 10,000.

Table 4.9: Self Employed/Regular wage salaried/Contract/Casual Workers according to Average Monthly Earnings**All India (in per cent)**

	SELF EMPLOYED	REGULAR WAGE/SALARIED	CONTRACT WORKERS	CASUAL LABOUR
PERSONS IN LABOUR FORCE	49.3	18.0	3.8	28.9
NO INCOME	26.6	0.5	0.4	0.6
UP TO RS. 5,000	24.6	14.8	31.6	52.3
RS. 5,001- Rs 7,500	18.2	16.8	28.7	26.8
RS7,501- Rs 10,000	16.1	21.1	24.7	15.9
RS10,001- Rs20,000	10.6	25.0	11.6	4.2
RS 20,001- Rs 50,000	3.4	19.9	2.9	0.2
RS 50,001- Rs 1,00,000	0.3	1.8	0.2	0.0
ABOVE RS 1,00,000	0.1	0.1	0.0	0.0

Unemployed Persons by methods adopted to seek work

4.40 Table 4.10 presents data on unemployed persons by methods adopted to seek work based on UPS approach. It shows that at the All India level, majority of persons 28.8 per cent used direct application method, followed by through employment exchange 21.5 per cent, application made in response to advertisement 14.5 per

cent and so on. Workers in the rural sector, however, adopted direct application method. Gender wise analysis reveals that at the All India level, among the unemployed persons, the percentage of females seeking work through employment exchange was highest at 22.0 per cent as compared to 21.2 per cent for males. Further details on methods adopted are presented in Table 4.10 (Table 53, Annexure IV).

Table 4.10: Unemployed persons aged 15 years & above by methods adopted to seek work based on UPS approach

Unemployed Persons (Graduates and Post Graduates) by reasons of Unemployment

4.41 In India, it is observed that the Unemployment Rate goes up with the level of education. High unemployment rate among graduates and post graduates is a serious issue and to address it effectively, a clear understanding of the underlying factors is required. To this effect, this survey also collected the data on reasons for unemployment from the unemployed graduates and post graduates. Table 4.11 provides the

details of reasons for unemployment as given by unemployed graduates and post graduates. It reveals that for graduates and post graduates alike the main reason for unemployment was non availability of jobs matching with education/skill and experience. This clearly brings out the prevalence of skill mismatch in the labour market which renders even highly qualified individuals jobless. At the All India level, 44.0 per cent of unemployed graduates and 44.6 per cent of unemployed post graduates cited non availability of jobs matching with

education/skill and experience as the main reason for unemployment followed by non-availability of adequate remuneration cited by 33.3 per cent of graduates and 33.5 per cent of post graduates.

Non availability of jobs matching skills/education and experience continues to be the dominant reason for unemployment for graduates and

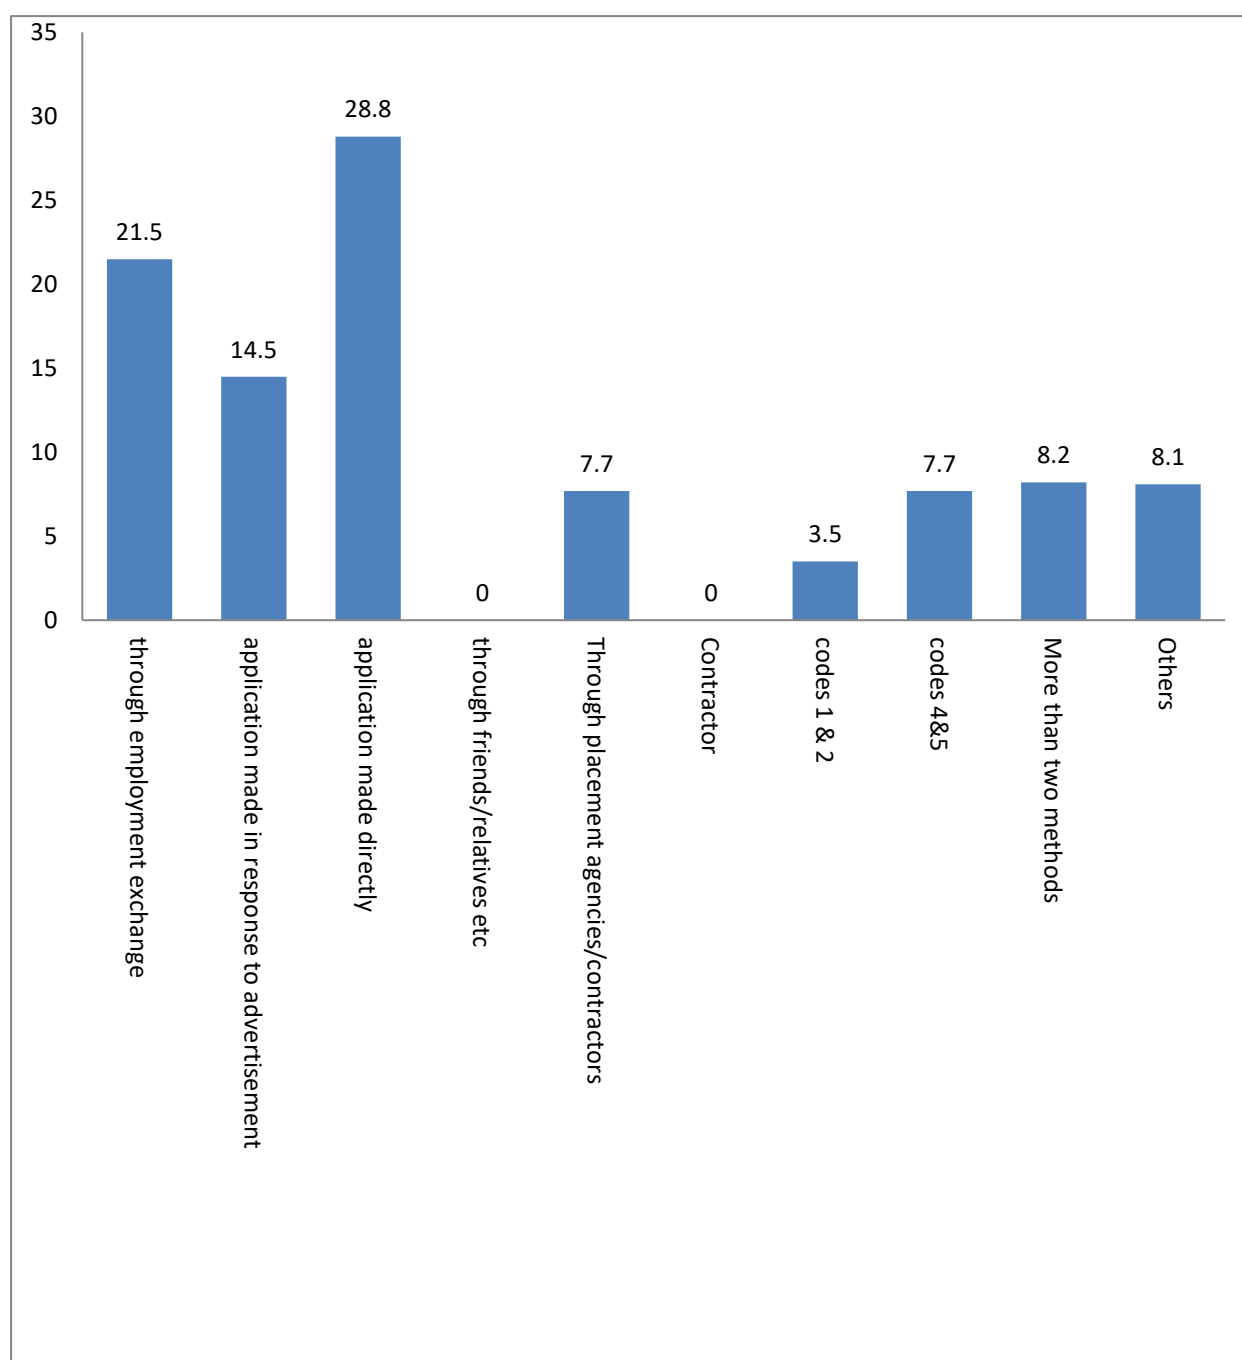

Figure 4.9: Unemployed Persons by methods adopted to seek work (in per cent)

Post-graduates across rural and urban sector also followed by non-availability of adequate

remuneration (Table 54 & 55, Annexure IV).

Table 4.11: Unemployed persons having graduate/post graduate level qualification aged 15 years & above by reasons of unemployment

All India (in per cent)

REASONS	GRADUATE			POST GRADUATE		
	RURAL	URBAN	RURAL+ URBAN	RURAL	URBAN	RURAL+ URBAN
NON AVAILABILITY OF JOBS MATCHING WITH EDUCATION/SKILL/EXPERIENCE	42.9	46.0	44.0	44.1	45.2	44.6

Workers by type of job contract

4.42 Table 4.12 provides data on the status of job contract of contract workers. The data reveals

that at the All India level 24.4 per cent of the contract workers did not have a written job contract. About 8.3 per cent of the contract workers had written job contract of

more than three years. Sector wise analysis shows that the percentage of workers with no written job contracts was higher in urban sector as compared to rural sector for contract workers category. 67.6 per cent of the contract workers in the urban sector had no written

job contract as compared to 0.2 per cent in the rural sector (Table 56 Annexure IV). About 9.7 per cent of the contract workers in urban area had written job contract for more than 3 years comparative to 7.5 per cent of contract workers in rural areas.

Table 4.12: Contract workers aged 15 years & above by type of job contract

Chapter-V

Labour force parameter based on Age, Social group, Education & Skill

The present chapter deals with the key labour force parameters based on age, social group, education and skill. As under Sixth Annual Employment Unemployment survey, an integrated report pertaining to age; social group, education & skill has been prepared.

5.1.1 “Youth” is best understood as a period of transition from the dependence of childhood to adulthood’s independence. Youth is a more fluid category than a fixed age-group. However, age is the easiest way to define this group, particularly in relation to employment. Therefore “youth” is often indicated as a person between the age where he/she may leave compulsory education, and the age at which he/she finds his/her first employment. This latter age limit has been increasing, as higher levels of unemployment puts many young people into a prolonged period of dependency.

5.1.2 In this report an attempt has been made to assess the participation and employment situation for different age groups viz. 15-17 years, 18-24 years, 25-29 years and 30 years and above, in the labour market.

5.1.3 In this report the estimates of Labour Force Participation Rate (LFPR), Worker Population Rate (WPR) and Unemployment Rate (UR) based on Usual Principle Status (UPS) & Usual Principle and Subsidiary Status (UPSS) approaches are derived for different age groups viz. 15-17 years, 18-24 years, 25-29 years and 30 years and above.

Labour Force Participation Rate (LFPR)

5.1.4 At the All India level, the Labour Force Participation Rate for the age group 18-24 was 38.5 per cent based on Usual Principal Status Approach. In case of male category, the LFPR was estimated to be 55.5 per cent whereas in case of female category, it was 19.1 per cent based on Usual Principal Status Approach. As evident from the Table 5.1, the LFPR for male category was 56.4 per cent whereas for females, it was 21.4 per cent for the age group 18-24 years at the All India level under the UPSS approach.

5.1.5 Labour Force Participation Rate for the age group 25-29 was 61.3 per cent based on Usual Principal Status Approach. In case of male category,

the LFPR was estimated to be 94.8 per cent whereas in case of female category, it was 27.9 per cent based on Usual Principal Status Approach. Based on Usual Principal & Subsidiary Status Approach, the LFPR for male category was 95.0 per cent whereas for females, it was 31.2 per cent for the age group 25-29 years at All India level.

5.1.6 In case of age group 15-17 years, the Labour Force Participation Rate was estimated to be 7.3 per cent based on Usual Principal Status Approach at the All India level. In case of male category, it was 10.1 per cent whereas for female, the same was 3.6 per cent. Based on the Usual Principal & Subsidiary Status Approach, LFPR for the age group 15-17 years was estimated to be 8.2 per cent at the All India level. In case of male category the LFPR was 11.1 per cent and for female it was 4.6 per cent.

5.1.7 In case of age group 30 years & above based on UPS approach, LFPR was 58.9 per cent and it was 60.5 per cent in case of UPSS approach. Based on UPS approach for persons of age group 30 years & above for male category, it was 89.0 per cent whereas for female, the same was 27.2 per cent at the All India level. Based on UPSS approach, LFPR for the age group 30

years & above for male category was 89.2 per cent and for female, it was 30.2 per cent. For transgender LFPR was observed to be 67.4 per cent based on both UPS & UPSS approach. It can be observed from Table 5.1 that LFPR of Male & Female has increased along with the age up to age group (25-29). LFPR for transgender also shows increasing trend as they move from age group of 25-29 years to 30 years & above.

5.1.8 Based on UPS approach, (Please refer Table 23-23.2, Annexure IV) LFPR was observed to be 40.3 per cent in rural sector and 33.6 per cent in urban sector in the age group 18-24 years and for the age group 25-29 years, it is 62.2 per cent in rural sector and 59.0 per cent in urban sector. However, in the age group of 30 years & above, the rural LFPR was 61.1 per cent as compared to 53.7 per cent in the urban sector. Based on UPSS approach, LFPR was observed to be 42.2 per cent in rural sector and 34.0 per cent in urban sector in the age group 18-24 years and for the age group 25-29 years it is 64.4 per cent in rural sector and 59.5 per cent in urban area. However, in the age group of 30 years & above, the rural LFPR was 63.1 per cent as compared to 54.0 per cent in the urban area.

Table 5.1: LFPR for different age groups by different approaches
(in per cent)

Approach	15-17 Years				18-24 Years				25-29 Years				30 Years & above			
	M	F	T	P	M	F	T	P	M	F	T	P	M	F	T	P
UPS	10.1	3.6	-	7.3	55.5	19.1	68.8	38.5	94.8	27.9	58.9	61.3	89.0	27.2	67.4	58.9
UPSS	11.1	4.6	-	8.2	56.4	21.4	71.7	40.1	95.0	31.2	58.9	63.0	89.2	30.2	67.4	60.5

M=Male F=Female T=Transgender P=Persons

5.1.9 In case of age group 18-24 years, the state of Tripura has shown the highest 60.2 per cent LFPR followed by state of Goa with 56.9 per cent whereas the UT of Chandigarh has shown the lowest 21.3 per cent LFPR for this age group based on UPS Approach.

5.1.10 In case of age group 25-29 years, the state of Goa has shown the highest 81.9 per cent LFPR followed by state of Andhra Pradesh with 77.2 per cent whereas the state of Jammu & Kashmir has shown the lowest 49.0 per cent LFPR for this age group based on UPS Approach.

5.1.11 For persons 30 years & above, Meghalaya has observed to

be the state with the highest 81.3 per cent LFPR followed by Mizoram with 77.6 per cent. The UT of Chandigarh has the lowest i.e. 43.4 per cent LFPR.

Worker Population Rate (WPR)

5.1.12 The second important parameter in the labour force survey is the Worker Population Rate which signifies the proportion of workers/employed persons in the total population of specific age group. Based on Usual Principal Status Approach and Usual Principal & Subsidiary Status Approach, the Worker Population Rate for different age groups is given in Table 5.2.

Table 5.2: WPR for different age groups by different approaches
(in per cent)

Approach	15-17 Years				18-24 Years				25-29 Years				30 Years & above			
	M	F	T	P	M	F	T	P	M	F	T	P	M	F	T	P
UPS	8.3	2.8	-	5.9	44.9	14.0	64.8	30.5	88.1	23.3	49.1	55.6	88.3	26.1	67.2	58.0
UPSS	9.8	3.9	-	7.2	48.1	17.0	67.6	33.6	89.8	27.5	49.1	58.6	88.8	29.7	67.2	60.0

M=Male F=Female T=Transgender P=Persons

5.1.13 At the All India level, the Worker Population Rate for the age group 18-24 was estimated at 30.5 per cent based on Usual Principal Status Approach. In case of male category, it was 44.9 per cent whereas for female category, the Worker Population Rate was estimated at 14.0 per cent. Based on Usual Principal and Subsidiary Status Approach, the Worker Population Rate was estimated at 33.6 per cent for the age group 18-24 years at the All India level. For male category of persons, the WPR was 48.1 per cent whereas for female category, it was 17.0 per cent.

5.1.14 At the All India level, the Worker Population Rate for the age group 25-29 was estimated at 55.6 per cent based on Usual Principal

Status Approach. In case of male category, it was 88.1 per cent whereas for female category, the Worker Population Rate was estimated at 23.3 per cent. Based on Usual Principal and Subsidiary Status Approach, the Worker Population Rate was estimated at 58.6 per cent for the age group 25-29 years at the All India level. For male category of persons, the WPR was 89.8 per cent whereas for female category, it was 27.5 per cent. In this age group transgender had shown 49.1 per cent WPR in both UPS and UPSS approaches.

5.1.15 In case of age group 15-17 years, the WPR was estimated to be 5.9 per cent based on UPS approach at the All India level. In case of male category it was 8.3 per cent whereas for Female, the

same was 2.8 per cent. Based on UPSS approach WPR for the age group 15-17 years was estimated to be 7.2 per cent at the All India level. For male category it was 9.8 per cent and for female category it was 3.9 per cent as given in the Table 5.2.

5.1.16 Akin to LFPR based on UPS & UPSS approaches for the age group 30 years & above, WPR was also observed to be the highest among all age groups at All India level based on both UPS & UPSS approaches. For the age group 30 years and above, WPR was estimated to be 58.0 per cent based on UPS approach at the All India level. In case of male categories it was 88.3 per cent and for female it was 26.1 per cent. Based on UPSS approach, WPR for the age group 30 years & above was estimated to be 60.0 per cent. For male and female category it was 88.8 per cent and 29.7 per cent respectively. In case of transgender WPR was 67.2 per cent in both UPS and UPSS approaches. In this age group, 30 years and above, LFPR for male and female have decreased

whereas WPR for male and female have increased along with the age under UPS Approach. It shows that LFPR and WPR for transgender have varying trend with age groups.

5.1.17 The state of Meghalaya was observed to have the highest WPR 15.4 per cent for the age group of 15-17 years. The State of Kerala had the lowest WPR 0.7 per cent for the age group of 15-17 years. The persons in the age group of 18-24 years had the highest WPR 52.7 per cent in the UT of Daman & Diu and the lowest WPR in the state of Jammu & Kashmir 14.9 per cent as observed during the survey period (Refer Table 24, Annexure IV).

5.1.18 The person in the age group of 25-29 years had the highest WPR (70.8 per cent) in the state of Andhra Pradesh and the lowest in the state of Jammu & Kashmir (37.8 per cent) as observed during the survey period. For the persons in the age group 30 years & above Meghalaya had the highest WPR (80.4 per cent) and the state of Goa had the

lowest (42.8 per cent) WPR for this age group (Refer Table 24, Annexure IV).

Unemployment Rate (UR)

5.1.19 Based on the Usual Principal Status Approach, the Unemployment Rate at the All India level was estimated at 20.8 per cent for the age group 18-24 years. In case of male category of persons, the unemployment rate was estimated at 19.0 per cent whereas for female category, it was

26.7 per cent for the age group 18-24 years.

5.1.20 The unemployment rate at the All India level was estimated at 9.2 per cent for the age group 25-29 years. In case of male category of persons, the unemployment rate was estimated at 7.1 per cent whereas for female category, it was 16.4 per cent for the age group 25-29 years. The UR in case of transgender in this age group was 16.8 per cent.

Table 5.3: Unemployment rates for different age groups by different approaches (in per cent)

Approach	15-17 Years				18-24 Years				25-29 Years				30 Years & above			
	M	F	T	P	M	F	T	P	M	F	T	P	M	F	T	P
UPS	18.0	22.9	-	19.1	19.0	26.7	5.9	20.8	7.1	16.4	16.8	9.2	0.8	4.1	0.2	1.5
UPSS	11.8	14.7	-	12.5	14.8	20.5	5.6	16.2	5.4	11.9	16.8	7.0	0.5	1.9	0.2	0.8

M=Male F=Female T=Transgender P=Persons

5.1.21 In the age group of 15-17 years, Unemployment Rate (UR) was 19.1 per cent based on UPS approach at the All India level. In case of male category, the UR was 18.0 per cent and for female it was 22.9 per cent based on UPS approach. UR based on UPSS approach in the age group of 15-17 years was 12.5 per cent. Based on

UPSS, the UR for male category was 11.8 per cent and for female it was 14.7 per cent.

5.1.22 Based on Usual Principal & Subsidiary Status Approach, the Unemployment Rate was estimated at 16.2 per cent for the age group 18-24 years at the All India level. While comparing gender wise unemployment rate, for male

category of persons, it was found to be 14.8 per cent, whereas for female category, the same was 20.5 per cent at the All India level.

5.1.23 Based on Usual Principal & Subsidiary Status Approach, the unemployment rate was estimated at 7.0 per cent for the age group 25-29 years at the All India level. While comparing gender wise unemployment rates, for male category of persons, it was found to be 5.4 per cent whereas for female category, the same was 11.9 per cent at the All India level.

5.1.24 UR for the age 30 years & above was 1.5 per cent based on UPS approach at the All India level. For male category, UR was only 0.8 per cent, for female it was 4.1 per cent. Based on UPSS approach, the UR at the All India level was observed to the tune of 0.8 per cent. For male the UR was 0.5 per cent, whereas for female it was 1.9 per cent.

5.1.25 Based on UPS approach the highest percentage of Unemployment 85.6 per cent was found in the state of Goa for the age group of 15-17 years followed

by the UT of Puducherry with 78.0 per cent UR for the age group of 15-17 years. The state of Himachal Pradesh revealed the lowest 1.1 per cent UR for the age group 15-17 years during the survey (Refer Table 25, Annexure IV).

5.1.26 Based on UPS approach in case of age group 18-24, the state of Tripura had the highest UR 54.8 per cent followed by state of Jammu & Kashmir 40.7 per cent. The UT of Daman & Diu had the lowest 2.8 per cent in this age group.

5.1.27 Based on UPS approach in case of age group 25-29 years, the state of Tripura had the highest UR 40.9 per cent followed by state of Kerala 29.8 per cent. The state of Gujarat had the lowest 2.5 per cent in this age group.

5.1.28 It may be seen from the above table that majority of the persons were either self-employed or casual workers for all the age groups. While analyzing the results under 18-24 years of age group, it was evident that 40.2 per cent were self-employed followed by casual workers 35.0 per cent, 19.4

per cent as wage/salaried employees category and remaining 5.4 per cent under the contract workers classification at the All India level (Rural+ Urban) (Refer Table 31, Annexure IV).

5.1.29 It may also be seen from the above table that majority of the persons were either self-employed or casual workers employee for all the age groups. While analyzing the results under 25-29 years of age group, it was evident that 42.0 per cent were self employed workers followed by 28.8 per cent as casual workers, 23.8 per cent as wage/salaried, 5.4 per cent as contract workers at the All India level (Rural+ Urban).

5.1.30 The survey results were compiled for the age group of 15-17 years, 18-24 years, 25-29 years and 30 years and above. Based on the survey findings, majority of the persons were employed under the Code 1 classification of Agriculture, forestry and fishing section based on Usual Principle Status Approach in all the age groups.

5.1.31 The results were compiled for not literate, below primary, primary, middle/ secondary/ higher secondary, certificate course at under graduate level, diploma at graduate level and graduate & above classification. It may be seen from the table that as the education level increases, the unemployment rate was also found to be increasing. In case of graduates & above, the unemployment rate was estimated at 22.4 per cent for the age group 18-24 years. In case of less educated persons like not literate, below primary and primary persons aged 18-24 years, the unemployment rate was estimated about 4.0 per cent.

5.1.32 The results were compiled for not literate, below primary, primary, middle/ secondary/ higher secondary, certificate course at under graduate level, diploma at graduate level and graduate & above classification. It may be seen from the table that as the education level increases, the unemployment rate was also found to be increasing. In case of graduates & above, the

unemployment rate was estimated at 19.4 per cent for the age group 25-29 years. In case of less educated persons like not literate, below primary and primary persons aged 25-29 years, the unemployment rate was estimated about 3.0 per cent.

Education and Economic Growth

5.2.1 Education is fundamental to the growth and prosperity of a nation. Education is also an effective means to achieve inclusive growth in India by educating the underprivileged, vulnerable and marginalized people so that they participate effectively in the growth process; the initiatives have been taken in the field of education at all levels. The right to education Act, 2009 entitles every child in the age group of 6-14 years to free and compulsory education.

5.2.2 Skill development is crucial from the perspective of both employability and sustained economic growth based on high productivity. Skill development is essential to enhance the employability of the new entrants to workforce by equipping them with right skills. Similarly, regular up skilling and re-skilling is required to maintain the employability levels of those already in the labour force. A highly skilled

workforce facilitates generation of new ideas and innovation which is vital to achieve productivity growth and competitive advantage in wake of the rapidly changing demands of international competitiveness. The Ministry of skill development and entrepreneurship was set up in November, 2014 to drive the “Skill India” agenda in a “Mission Mode” in order to coverage existing skill training initiatives and combine scale and quality of skilling efforts, with speed. The Government seeks to successfully meet the challenge of developing skills and effectively utilizing them at the same time as a number of initiatives such as ‘Skill India’, ‘Make in India’ and ‘Start up India’ have been launched simultaneously.

5.2.3 Skill development is one of the paramount subject matter in India and the Government initiated various policies and programmes to improve or create skills in its labour force. Considering the ample importance of skill development, Labour Bureau collected information related to vocational training under Sixth Annual Employment – Unemployment Survey 2016-17 for persons aged 15 years and above.

5.2.4 Table 48, Annexure IV exhibits the distribution of persons aged 15

years & above who received vocational training during the reference period. Vocational training plays a vital role in developing skills among the people. At the All India level, 8.2 per cent of persons aged 15 years and above were reported to have received/been receiving vocational training. The percentage of population who received/were receiving vocational training in rural and urban areas was estimated at 7.4 and 10.5 per cent respectively. The gender wise estimates show that the percentage of females who received/were receiving vocational training was less than the half of its counterpart.

5.2.5 Table 5.4 presents distribution of persons aged 15 years & above who

received vocational training by broad activity status under Usual Principal Status (UPS) approach. Among the persons reported as received vocational training, 74.9 per cent were reported to be employed while 7.2 per cent were unemployed. A noticeable share 18.9 per cent of population who received vocational training were reported to be not participating in the labour force. At the All India level, a significantly high proportion of females (43.9 per cent) had reported to be out of labour force. The sector level estimates were not showing any commendable variation among the broad activity status. The results have been compiled for all the States/UTs by Social Group/Gender/Sector.

Table 5.4: Distribution of persons aged 15 years & above who received vocational training by broad activity status

Sector	(in per cent)											
	Employed				Un-employed				Not in labour force			
	M	F	T	P	M	F	T	P	M	F	T	P
Rural + Urban	86.5	46.3	100.0	74.0	6.0	9.8	-	7.2	7.5	43.9	-	18.9
Rural	85.6	45.8	100.0	73.4	6.8	10.0	-	7.7	7.7	44.2	-	18.8
Urban	88.3	47.0	100.0	74.9	4.5	9.5	-	6.1	7.2	43.4	-	18.9

M-Male, F- Female, T-Transgender, P-Persons

Education level and Broad activity

5.2.6 Distribution for persons aged 15 years & above by educational classification and main activity status is exhibited in Figure 5.1. The survey

results revealed high labour force participation among the persons with 'graduate' and 'post graduate & above' educational classification. The

proportion of unemployed persons was also on the increasing side with the increase in education level. The unemployed proportion among 'graduates' and 'post graduates' & above' was estimated at 10.8 per cent and 10.4 per cent respectively. The persons having 'secondary' and 'higher secondary' educational

classification reported low rate of participation in labour force and were estimated at 45.3 per cent and 45.3 per cent respectively. The unemployment proportion among the persons classified in 'secondary' and 'higher secondary' educational classifications was estimated at 1.8 and 3.7 per cent respectively.

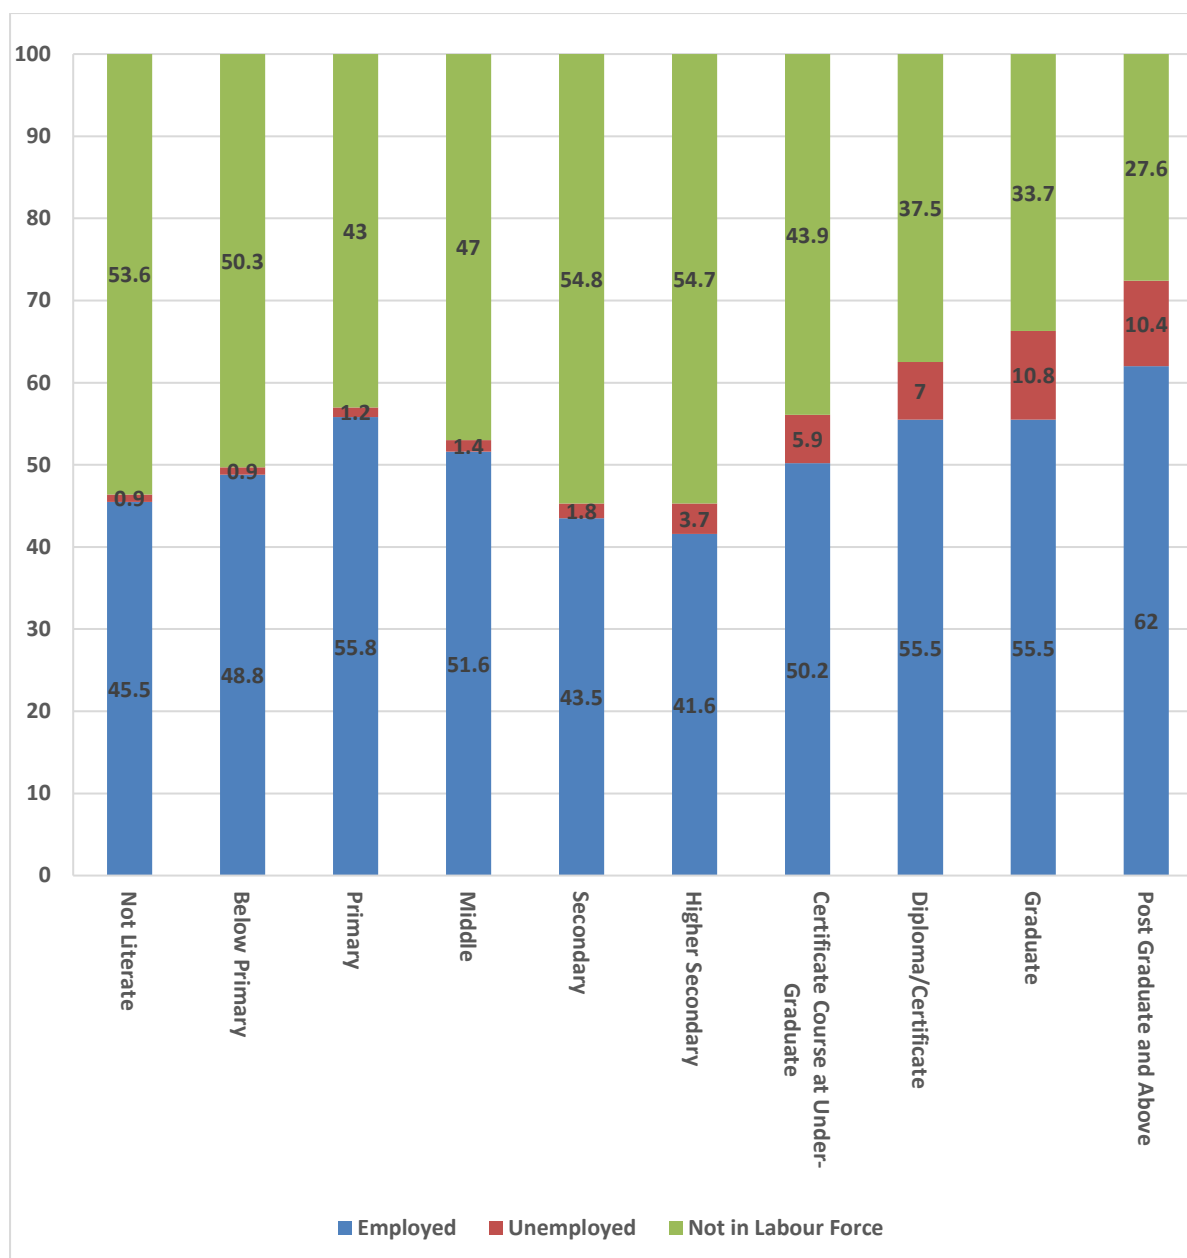

Figure 5.1: Distribution for persons aged 15 years & above by main activity & educational classification according to Usual Principal Status (UPS) approach (in per cent)

5.2.7 The results of educational classification and main activity have been compiled for all the States/UTs by Gender/Social-Group/Sector. The State wise highest and lowest per 1000

distribution of employed persons aged 15 years & above by educational classification according to Usual Principal Status (UPS) approach have also been compiled under the survey.

Table 5.5: Highest and lowest per 1000 distribution of employed persons aged 15 years & above by educational classification according to Usual Principal Status (UPS) approach.

Educational Classification	Highest	Lowest
Not literate	Meghalaya(792)	Lakshadweep(62)
Below Primary	Arunachal Pradesh & Telangana (765)	Puducherry (195)
Primary	Meghalaya(776)	Goa (207)
Middle	Mizoram (716)	Jammu & Kashmir (374)
Secondary	Chandigarh(571)	Dadra & Nagar Haveli (264)
Higher secondary	Daman & Diu (538)	Tripura (264)
Certificate course at undergraduate level	Arunachal Pradesh (941)	Sikkim (158)
Diploma/ certificate	Arunachal Pradesh (1000)	Nagaland (237)
Graduate	Himachal Pradesh (699)	Lakshadweep (399)
Post graduate & above	Daman & Diu (836)	Tripura (282)

5.2.8 Table 5.5 shows that the highest proportions of employed persons with 'not literate' were reported in the state of Meghalaya while Lakshadweep had the lowest proportion of employed persons. In the state of Arunachal Pradesh & Telangana had the highest proportion of employed persons with 'below primary', while Meghalaya and Mizoram with the highest proportion of employed persons were reported in primary

and 'middle' education while Puducherry, Goa & J & K had the lowest proportion of employed persons under these educational classifications. In the State of Arunachal Pradesh, all the persons with 'Diploma /certificate' educational classification were reported to be employed according to the Usual Principal Status (UPS) approach. The highest proportion of persons with educational qualifications of 'higher secondary' and 'graduate' were found to be

employed in the UT of Daman & Diu & in the state of Himachal Pradesh. The UT of Dadra & Nagar Haveli had the lowest proportion of employed persons with the educational qualifications of 'secondary' and in 'diploma/certificate' the lowest proportion of employed persons was in the state of Nagaland. In case of persons with educational classification of 'certificate course at undergraduate level', the State of Sikkim had the lowest employment proportion. The highest proportion of employed persons with P.G. and above were reported in UT of Daman & Diu while Tripura had the lowest proportion of employed persons.

Graduate degree and above in different fields

5.2.9 Distribution of persons aged 15 years & above with Graduate degree and above in different fields and main activity pursued by them according to Usual Principal Status (UPS) approach is exhibited in Figure 5.2. The survey results revealed that there was more than 70 per cent labour force

participation among the persons with 'Medical science' and 'Agricultural, Forestry, Fishery and Animal Husbandry' and Engineering Technology & Management, fields of education. The unemployed proportion was estimated to be the lowest at 6.8 per cent among the persons with 'Medical Science' field of education. The highest 34.8 per cent of persons with Graduate degree and above in 'Arts and Humanities' field of education were found to be out of labour force.

Type of Training

5.2.10 The information related to vocational training was collected by the type of training namely, formal and informal. As per the concepts and definitions of this survey, informal training is defined as the process of acquiring the expertise in a vocation through ancestors over generations. The formal vocational training is a training which is acquired through institutions under the structural training programme and led to a recognised certificate or diploma.

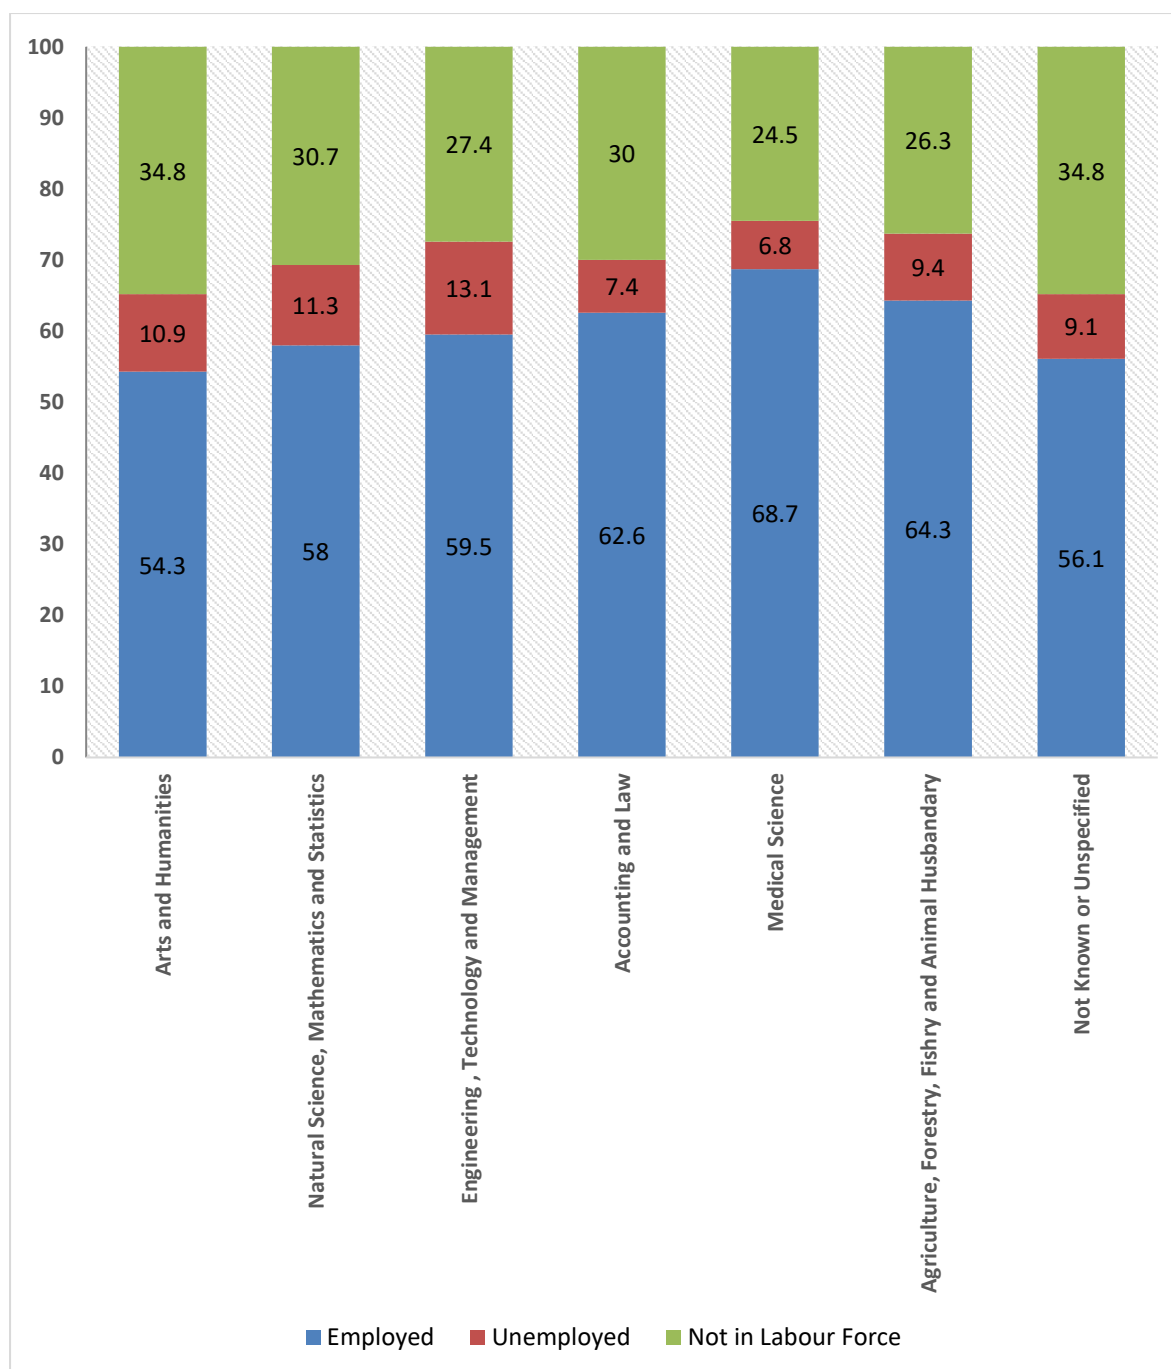

Figure 5.2: Distribution of persons aged 15 years & above with Graduate degree and above in different fields and main activity pursued by them according to Usual Principal Status Approach (in per cent)

5.2.11 Table 49 (Annexure IV) shows the pattern of vocational training of population aged 15 years and above. At All India level,

only 9.0 per cent of the persons aged 15 years & above reported to have received/been receiving

vocational training, out of which, majority of

Table 5.6: Distribution of labour force aged 15 years & above who received vocational training by gender, nature of training and activity status (in per cent)

Type of Training	employed				unemployed			
	M	F	T	P	M	F	T	P
Formal	85.7	74.3	84.8	82.9	14.3	25.7	15.2	17.1
Informal	95.5	83.9	87.5	92.3	4.5	16.1	12.5	7.7

M-Male, F-Female, T-Transgender, P-Persons

the persons i.e. 5.4 per cent acquired/were acquiring informal vocational training. Only 3.6 per cent of the persons aged 15 years and above were reported to have received/been receiving formal vocational training. Going through the sector wise estimates, majority of the vocationally trained (5.2 per cent) persons in rural sector acquired training through informal system, whereas in urban sector, the difference in proportion of formal and informal training was not significant.

5.2.12 Table 5.6 shows that among informally trained labour force, 92.3 per cent of informally trained persons were employed under the Usual Principal Status approach. At the same time, only 82.9 per cent of the formally

trained persons were reported as employed under the same approach. The results indicate a true picture of India's economy with a dominant share of unorganized sector.

5.2.13 The distribution of vocationally trained labour force by activity status and by field of training according to the Usual Principal Status approach is depicted in Table 50, Annexure IV. Among the formally and informally trained persons, it can be seen that the Unemployment Rate is less in informally trained labour force. Under both the formal and informal types of training, the highest Unemployment Rate was observed among the persons with 'IT/ITES' field of training. All the persons who acquired formal

vocational training in the fields of 'Rubber' were reported to be

employed. (Table 50 annexure IV)

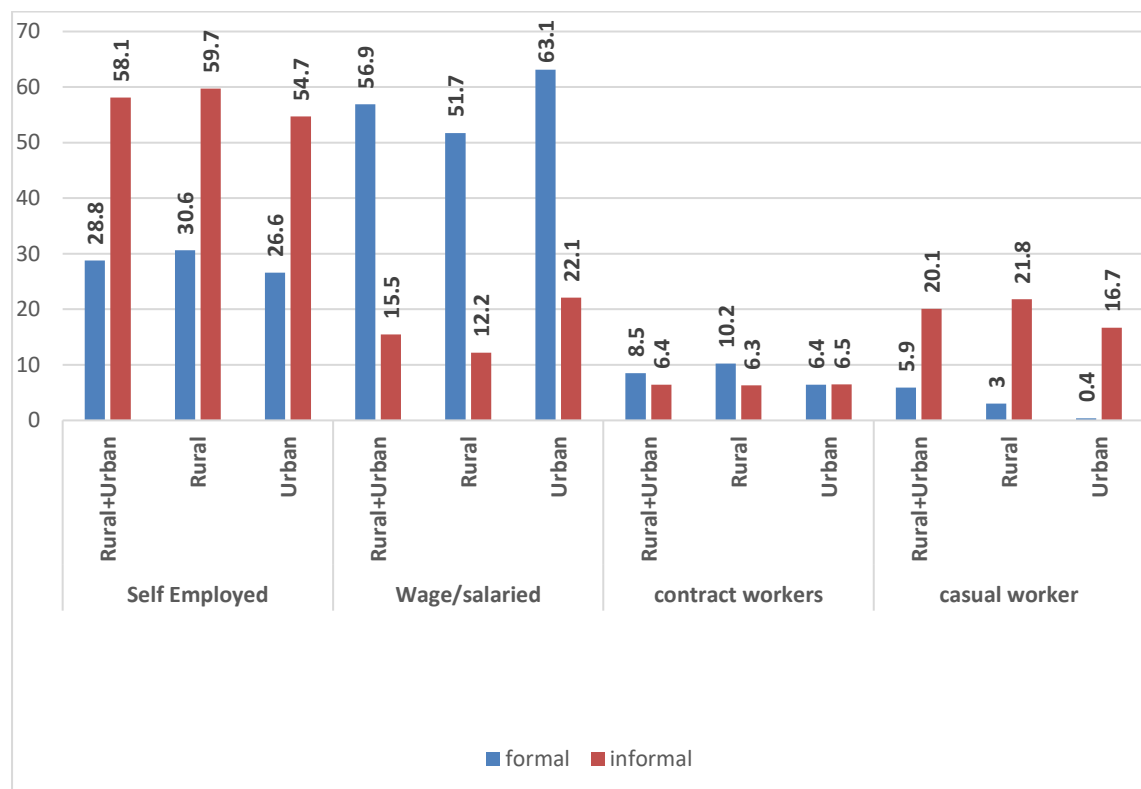

Figure 5.3: Distribution of persons aged 15 years and above who received/were receiving vocational training and pursuing different economic activities based on Usual Principal Status (ps) approach (in per cent)

5.2.14 The sectoral level distribution of persons aged 15 years and above who received/were receiving vocational training and pursuing different economic activities based on Usual Principal Status (UPS) approach estimated percentages are exhibited in Figure 5.3. Among formally trained employed persons, more than 50 per cent were reported to be

employed in wage/salaried category followed by the self-employed category. In the case of informally trained employed persons more than the half were reported to be employed in the self-employed category followed by the casual workers.

Employment-Unemployment

Scenario among Different Social Group

5.3.1 The Annual Employment-Unemployment Surveys conducted by Labour Bureau throws information of labour force and its derivatives for various social groups namely categorised as Scheduled Caste (SC), Scheduled Tribe (ST), Other Backward Class (OBC) and Others category. This report primarily deals with the Employment - Unemployment Scenario during 2016-17 as a part of Sixth Annual Employment - Unemployment Survey among persons belonging to these four social groups, viz., Scheduled Caste (SC), Scheduled Tribe (ST), Other

Backward Class (OBC) and Others category. The State-wise distribution of households among different social groups for States/UTs is presented in Tables 4.4.1 and 4.2 (Annexure IV).

Distribution of Households by Social Groups

5.3.2 The survey results show that at overall level, about 42.1 per cent of the households belong to Other Backward Class category followed by 29.2 per cent under the Others category, 19.2 per cent under the Scheduled Caste category and the rest 9.4 per cent households under the Scheduled Tribe category.

Table 5.8: Distribution of households (HHs) by social groups

All India (in per cent)

Particulars	SC	ST	OBC	Others
Rural	21.3	11.5	42.3	24.9
Urban	14.2	4.2	41.8	39.8
Rural + Urban	19.2	9.4	42.1	29.2

In the rural sector, a trend, similar to the one observed at the All India level (rural + urban) was visible. In rural areas, the proportion of households under Other Backward

Classes category was the highest with 42.3 per cent followed by 24.9 per cent under the Others category, 21.3 per cent under the Scheduled Caste category and the rest 11.5 per

cent under the Scheduled Tribe group.

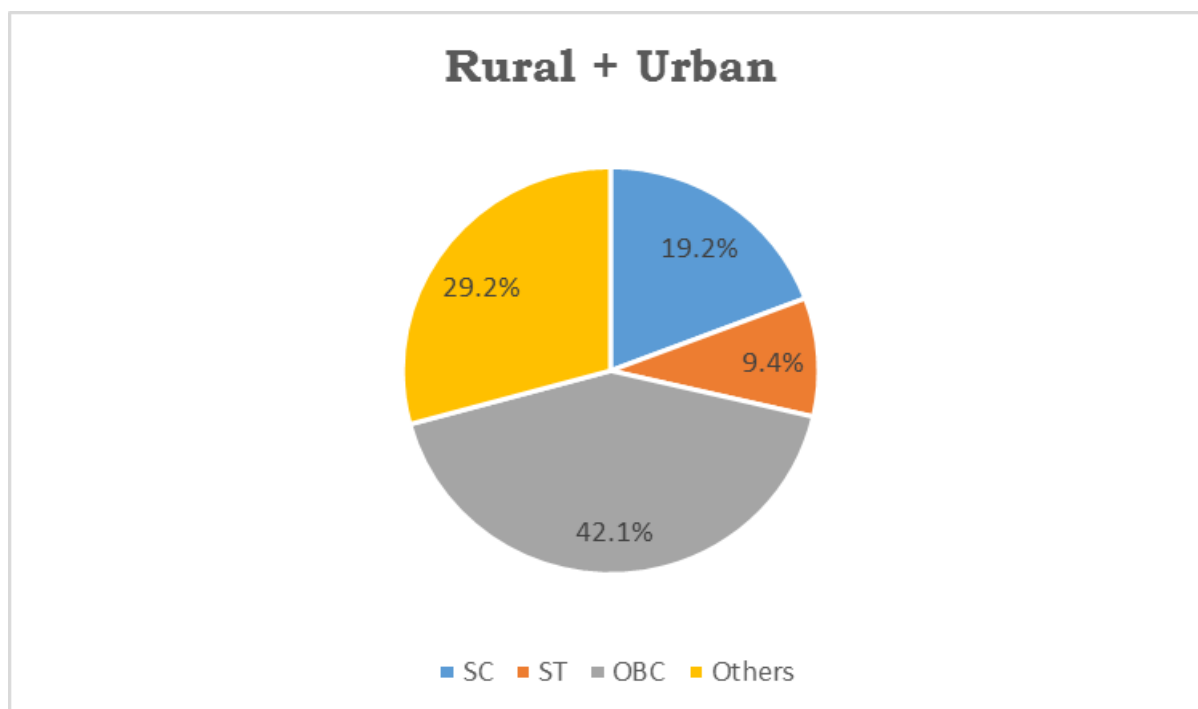

Figure 5.4: Distribution of households by social group

5.3.3 In case of urban sector, the OBC category households had maximum proportion i.e. about 41.8 per cent followed by 39.8 per cent households under the Others category, 14.2 per cent households under the Scheduled Caste category and 4.2 per cent households come under the Scheduled Tribe category at All India level. It can be inferred from the results that among the social groups, OBC and Others categories were having more households in urban sectors as compare to Scheduled Caste and Scheduled Tribe categories in India.

LABOUR FORCE PARTICIPATION RATE (LFPR)

5.3.4 At National level, the Labour Force Participation Rate for Scheduled Tribe category was the highest about 56.6 per cent followed by 53.3 per cent under the Scheduled Caste category, 51.6 per cent for Other Backward Classes category and 47.7 per cent for others category under the Usual Principal Status approach.

5.3.5 At sectoral level according to UPS approach, in the case of rural

sector, LFPR for Scheduled Tribe category was the highest i.e. about 57.8 per cent and in urban sector Scheduled Caste category had the highest 49.3 per cent LFPR.

5.3.6 Among the States, it is observed that for the Schedule Caste category the state of Andhra Pradesh had witnessed highest LFPR with 70.1 per cent. LFPR for Schedule caste category was the highest for Union Territory of A & N Islands with 77.9 per cent. On the other hand, the Union Territory of Dadar and Nagar Haveli and the State of Sikkim had the lowest 38.6 per cent and 35.1 per cent LFPRs respectively for Scheduled Caste category persons based on Usual Principal Status Approach.

The state of Andhra Pradesh had shown maximum number of Scheduled Tribe category persons i.e. 77.8 per cent participating in the Labour market followed by Telangana with 72.1 per cent for Scheduled Tribe category Persons. Union Territory of Daman & Diu had the lowest 41.6 per cent LFPR for Scheduled Tribe Category Persons. Among the States/UTs for Other Backward Class (OBC) category persons, the state of Mizoram had witnessed highest LFPR i.e. 87.2 per cent followed by 67.7 per cent in Meghalaya. The UT of Dadra and Nagar Haveli had revealed the lowest i.e. 39.6 per cent LFPR for OBC category work force.

5.3.7 For the others category, the UT of Lakshadweep had the highest

Table 5.9: Labour Force Participation Rate for persons aged 15 years & above according to Usual Principal Status Approach (ps)

All India (in per cent)

Social Groups	Rural				Urban				Rural + Urban			
	M	F	T	P	M	F	T	P	M	F	T	P

WORKER POPULATION RATE (WPR)

5.3.8 Working Population Rate is the persons employed per thousand persons. Based on Usual Principal

Status and Usual Principal & Subsidiary Approaches, the Worker Population Rate for different social groups is presented in Table 5.11 and Table 5.12 respectively.

Table 5.11: Worker Population Rate for persons aged 15 years & above according to Usual Principal Status Approach

All India (in per cent)

Social Group s	Rural				Urban				Rural + Urban			
	M	F	T	P	M	F	T	P	M	F	T	P
SC	75.1	26.2	77.9	51.7	71.9	19.9	73.1	46.3	74.5	24.9	76.8	50.6
ST	74.8	33.3	72.4	55.0	68.2	19.7	63.8	44.6	74.0	31.5	72.3	53.7

Others	73.0	17.9	47.6	46.7	68.8	14.3	23.9	42.5	71.4	16.5	38.3	45.1

M- Male; F-Female; T-Transgenders; P-Person

5.3.9 At the All India level, WPR was the highest under Scheduled Tribe category with about 53.7 per cent followed by 50.6 per cent under the Scheduled Caste category, 48.7 per cent for Other Backward Classes category and 45.1 per cent for Others category based on Usual Principal Status Approach.

5.3.10 At the sectoral level, rural sector shows the same trend and in the urban sector, WPR was the highest among Scheduled Caste 46.3 per cent category followed by Other Backward Class 45.4 per cent, Schedule Tribe category 44.6 per cent and for Others category 42.5 per cent respectively.

5.3.11 The state-wise analysis of WPR revealed that the UT of A & N Island had the highest WPR i.e. 77.9 per cent of Scheduled Caste category persons followed by Telangana with 67.9 per cent WPR for Scheduled Caste category persons. On the other hand, the state of Sikkim had the lowest 30.3 per cent WPR for Scheduled Caste category persons among State/UTs.

5.3.12 The state of Andhra Pradesh had the highest WPR of 75.0 per cent of Scheduled Tribe category followed by the state of Telangana which had 69.8 per cent WPR of Scheduled Tribe population of the state. However, UT of A & N Island had the lowest WPR i.e. 30.0 per cent of Scheduled Tribe Population followed by UT of Puducherry with 33.3 per cent WPR.

5.3.13 For the social group of OBC population, the state of Mizoram had the highest WPR recorded i.e. 81.6 per cent followed by Meghalaya 67.7 per cent. OBC population had the lowest WPR 37.8 per cent in the state of Jammu & Kashmir.

5.3.14 Table 5.12 shows that similar trends as seen under the Usual Principal Status Approach were observed in the Usual Principal & Subsidiary Status Approach also. Scheduled Tribe Category constituted the highest proportion of all the parameters viz. national level, social group wise and gender wise.

Table 5.12: Worker Population Rate for persons aged 15 years & above according to Usual Principal & Subsidiary Status Approach

All India (in per cent)

Social Group	Rural				Urban				Rural + Urban

UNEMPLOYMENT RATE

5.3.15 Based on Usual Principal Status Approach, the unemployment rate for different social groups is given in Table 5.13.

Table 5.13: Unemployment Rate for persons aged 15 years & above according to Usual Principal Status Approach

All India (in per cent)

Social Group	Rural				Urban				Rural + Urban			
	M	F	T	P	M	F	T	P	M	F	T	P
SC	4.3	7.3	1.2	5.0	4.4	11.6	-	6.0	4.3	8.1	1.0	5.2
ST	4.5	6.1	-	4.9	5.8	10.4	-	6.9	4.6	6.5	-	5.2
OBC	4.5	8.0	-	5.3	4.3	13.2	-	6.2	4.5	9.2	-	5.5
Others	4.0	10.4	14.6	5.3	4.0	14.4	7.9	5.9	4.0	11.8	13.0	5.5

M- Male; F-Female; T-Transgenders; P-Person

5.3.16 Based on the Usual Principal Status approach, the unemployment rate at the All India level was 5.5 per cent each for Other Backward Classes category and Others category. In case of Scheduled Caste and Schedule Tribe category, the unemployment rate was estimated to be 5.2 per cent each.

5.3.17 In case of rural sectors, Scheduled Tribe category had the lowest unemployment rate i.e. 4.9 per cent whereas it was the highest under both Other Backward Classes and Others categories with 5.3 per cent in rural sectors, whereas in urban sectors, unemployment rate was the lowest under Others

category 5.9 per cent and the highest among Scheduled Tribe category i.e. 6.9 per cent.

5.3.18 The gender wise unemployment rates at the All India level under the Usual Principal Status Approach reveal that there was wide variation among the male and female unemployment rates. In case of females, maximum unemployment rate was estimated to be 11.8 per cent for Others category whereas for males the same was 4.6 per cent under the scheduled tribe group. In urban sector, the unemployment rate among females was the highest with 14.4 per cent for Other category as compared to other groups.

5.3.19 Further, it is found that 16.8 per cent of Schedule Caste work force remained unemployed in the State of Tripura which is the highest Unemployment Rate among the State/UTs. The state of Gujarat has the lowest i.e. 0.7 per cent Unemployment Rate among Scheduled caste population.

5.3.20 Scheduled Tribe Population has the highest Unemployment Rate

i.e. 50.0 per cent in Union Territory of Puducherry followed by Union Territory of Andaman & Nicobar Island 48.0 per cent. However, the state of Gujarat has the lowest i.e. 0.9 per cent Unemployment Rate for Scheduled Tribe Population of the state.

5.3.21 The social group of OBC category has the maximum Unemployment Rate i.e. 22.5 per cent in the state of Tripura followed by Kerala with 13.7 per cent and Jammu & Kashmir with 13.6 per cent unemployment rate based on usual principal status approach. The State of Gujarat has shown only 1.0 per cent unemployment rate for OBC category.

5.3.22 For Others category labour force, the state of Tripura has revealed the highest 31.7 per cent unemployment rate during the reference period followed by Union Territory of Puducherry i.e. 15.9 per cent unemployment rate of others category. Union Territory of Dadar and Nagar Haveli has the lowest 0.3 per cent UR for other category population.

5.3.23 Table 5.14 shows that at the National level, based on Usual Principal & Subsidiary Status Approach, unemployment rate in case of Others category was 4.4 per cent followed by 4.0 per cent under

Other Backward Class category, 3.6 per cent under Scheduled Caste category and the Scheduled Tribe category was having the lowest Unemployment Rate of 2.9 per cent.

Table 5.14: Unemployment Rate for persons aged 15 years & above according to Usual Principal & Subsidiary Status Approach
All India (in per cent)

Social Group	Rural				Urban				Rural + Urban			
	M	F	T	P	M	F	T	P	M	F	T	P

ST	2.7	2.5	-	2.6	5.0	9.0	-	5.9	2.9	3.0	-	2.9
OBC	3.2	4.7	-	3.6	3.8	11.3	-	5.4	3.3	6.2	-	4.0
Others	3.1	7.4	14.6	4.0	3.5	12.5	7.9	5.2	3.3	9.0	13.0	4.4

M- Male; F-Female; T-Transgenders; P-Person

5.3.24 In case of urban areas the highest unemployment rate was recorded i.e. 5.9 per cent for Scheduled Tribe category and for SC category the lowest unemployment rate was 5.1 per cent.

5.3.25 Female Unemployment Rate was higher than male counterparts under all the four social groups. The highest female unemployment rate was 9.0 per cent for the Others category. For

males at national level, the highest unemployment rate was at 3.3 per cent for the OBC and Others categories.

5.3.26 At the overall level, Others category constituted the highest about 69.2 per cent of persons who worked for 12 months during the reference period followed by 61.3 per cent under the Other Backward Class category, 53.3 per cent under the Scheduled Caste and 49.0 per cent under the

Scheduled Tribe category under UPSS approach.

5.3.27 It was revealed that among Union Territory of Andaman & Nicobar Island and Chandigarh were recorded with 100 per cent of Scheduled Caste workers who worked for 12 months. On the other hand 19.1 per cent of SC workers from Tripura followed by Goa with 11.8 per cent did not get

any work but found available for work according to UPSS approach.

5.3.28 Puducherry was recorded with 100 per cent of Scheduled Tribe workers who worked for 12 months followed by Dadar & Nagar Haveli 97.1 per cent. On the other hand 11.3 per cent of workers of same category did not get work in Punjab followed by Kerala 10.4 per cent.

CONCEPTS AND DEFINITIONS

Important concepts and definitions used in the survey and relevant to this report are explained as below:

1.1 House: Every structure, tent or other place of shelter, etc. which is used primarily for residential use is considered as a house for the present survey.

1.2 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but exclude temporary visitors and guests (expected total period of stay less than 6 months). The members of a household may or may not be related by blood or marriage to one another. The following examples may be useful while determining the group of persons to be considered as households:

- (a) In case a hostel is listed, it will constitute a single household.
- (b) Inmates of hotel, lodging and boarding house etc. will also constitute a single household.
- (c) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on ordinarily taking food from a common kitchen. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household in which he or she resides.
- (d) A resident employee, or domestic servant or a paying guest will be considered as a member of the household in which he or she resides even though he or she is not a member of the same family if the period of stay is six month or above.
- (e) In case a member of a family (say a son or a daughter of the head of family) stays elsewhere like in hostel for studies or for any other reason for major part of the year, he/she will not be considered as a member of his/her parents household.

1.3 Household size: The number of members normally residing in a household is its size.

1.4 Economic activity: The entire spectrum of human activity falls into two categories: i) economic activity and ii) non-economic activity. Any activity that results in production of goods and services which adds value to the national product is considered as an economic activity. Further the economic activities have two parts namely i) market activities and ii) non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. On the other hand non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets. The term 'economic activity' under the sixth Annual Employment and Unemployment survey includes:

- i. All the market activities described above, i.e., the activities performed for pay or profit which result in production of goods and services for exchange, of the

non-market activities,

- a) All the activities relating to the primary sector which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption.
- b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

1.5 Activity status: It is the activity in which a person is engaged during the reference period, which in turn decides the person's participation in economic and /or non-economic activities. According to this, a person will be in one or a combination of the following three statuses during a reference period:

- i. Working or engaged in

- economic activity (work);
- ii. Not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' in case the 'work' is available and
- iii. Neither engaged in any economic activity (work) nor available for 'work'.

Activity statuses mentioned against sl. no. (i) & (ii) above, are associated with 'being in labour force' and the last sl.no. (iii) is associated with 'not being in the labour force'. Being in labour force is further categorized into two parts employed (sl. no. (i) above) and unemployed (sl. no. (ii) above).

1.6 The three broad activity statuses according to 6th EUS have been further subdivided into the following categories as listed below:

- i. working or being engaged in economic activity (employed):
 - a) worked as an own-account worker (self-employed);
 - b) employer (self-employed);
 - c) worked in household enterprise as 'helper' (unpaid family worker);
 - d) worked as regular salaried/wage employee other than contract worker;
 - e) worked as contract worker;

- f) worked as casual wage labour in public works;
- g) worked as casual wage labour in other types of works;
- ii. not working but seeking or available for work (unemployed);
- iii. neither working nor available for work (not in labour force)
 - i) attended educational institution;
 - ii) attended domestic duties;
 - iii) recipients of rent, pension, remittance, etc;
 - iv) not able to work due to disability;
 - v) Others (prostitutes, beggars, etc.);

1.7 The various concepts like, 'workers', 'unemployed', labour force, out of labour force are as explained below:

1.7.1 Workers (or employed):

Persons who are engaged in any economic activity during the reference period or who, despite their attachment to their economic activity, have temporarily abstained from work, for reasons of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work

constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household, farm or non-farm activities are also considered as workers.

1.7.2 Seeking or available for work (or unemployed): Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those who are 'seeking or available for work' (or unemployed).

1.7.3 Labour force: Persons who are either 'working' (employed) or 'seeking or available for work' (unemployed) or both during a major part of the reference period, constitute the labour force.

1.7.4 Out of labour force: Persons who are neither 'working' and at the same time nor 'seeking or available for work' for various reasons during the major part of the reference period are considered to be 'out of the labour force'. The persons under this category includes students, persons engaged in domestic duties,

rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, beggars, prostitutes, etc.

1.8 It may be noted that workers have been further categorized as self-employed, regular salaried/wage employee and casual wage labour. The details of these categories are defined in the following paragraphs.

1.8.1 Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are considered as self-employed. The essential feature of the self-employed is that they have autonomy (i.e., regarding how, where and when to produce) and economic independence (i.e. regarding market, scale of operation and money) for carrying out operation. The fee or remuneration received by them consists of two parts - the share of their labour and profit of the enterprise. In other words, their remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

The self-employed persons may again be categorized into the following groups:

- i) **Own-account workers:** The self-employed persons, who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprises without hiring any labour are called as own account workers. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- ii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprises by hiring labour are considered as the employers.
- iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full or part time and do not receive any regular salary or wages in return for the work performed. They do not run the household

enterprise on their own but assist the related person living in the same household in running the household enterprise.

1.8.2 Regular salaried/wage employee other than contract workers: Persons working in others farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. The category not only includes persons getting time-rate wage but also persons receiving piece-rate wage or salary and paid apprentices, both full time and part-time.

1.8.3 Worked on contract basis: As per the definition of contract worker, a worker is deemed to be employed as contract worker when he/she is hired in connection with the work of an establishment by or through a contractor. Contract workmen are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn, is compensated by the establishment. For the purpose of present survey, in addition to the above mentioned category of workers, the term contract workers

includes workers whose work are governed by a contract agreement either in writing or oral directly by the establishment. More precisely, the workers hired by the establishment directly for a specific job and for a specified period will also be categorized under the contract category of workers.

1.8.4 Casual wage labour: A person casually engaged in others farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually in the rural areas, a type of casual labourers can be seen who normally engage themselves in 'public works' activities. 'Public works' are those activities which are sponsored by the Government or local bodies for construction of roads, digging of ponds, etc. as relief measures (like flood relief, drought relief, famine relief, etc.) and also under various employment generation schemes under poverty alleviation programmes.

1.9 Different approaches for determining activity status: In this report the activity status is determined on the basis of Usual

Principal status (UPS) and Usual Principal Subsidiary status (UPSS).

1.9.1 Usual activity status: The usual activity status relates to the activity status of a person during the last completed twelve months from the date of survey. The activity in which a person spent relatively longer time (major time criterion) during the reference period is considered as the usual principal activity of the person. To decide the usual principal activity of a person, he/she is first categorized as belonging to the labour force or not during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'.

For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but available for work and/or seeking work' is then ascertained again on the basis of the relatively longer time spent during the period in the labour force. Within the broad activity status so determined, the detailed activity status category of a person pursuing more than one such activity will be determined again

on the basis of the relatively longer time spent.

1.9.2 Subsidiary economic activity status: A person whose usual principal status is determined on the basis of the major time criterion may have pursued some other economic activity for 30 days or more during the reference period. The status in which such economic activity is pursued during the reference period is the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, subsidiary activity will be determined on the basis of relatively longer time spent criterion.

1.10 Average monthly household earnings: Average monthly earnings of the sample household i.e., all members of the household, from all the sources is to be filled against this item. A reference period of 12 months shall be observed for calculating the household includes earnings of members from different sources like income from trade, wage employment, casual labour, rental income, interest received, remittances from abroad, old age pension etc excluding earnings of

domestic servant if any in the household.

1.11 Saving Bank account/Jan Dhan account in any bank: This item pertains to household member(s) having saving bank account/Jan Dhan account in any bank (government, private, co-operative).

1.12 Average monthly earnings in Rs. For every member who is employed (status code 11-51), average monthly earnings is to be collected and entered in terms of codes as given in the schedule. Average Monthly earnings are defined as the monetary returns from economic activities undertaken during the reference period by members having status code 11-51. In case of wage wage/salaried, contract and casual workers, the average monthly earnings includes wages and salaries, dearness allowances, other guaranteed allowances, over time payment, bonus, family allowances, or any other social security payments made by the employer. In case of self employed persons, the earnings will be taken as the monthly amount received by them on an average during the reference period.

SAMPLING DESIGN & ESTIMATION PROCEDURE

Introduction: Labour Bureau has been entrusted with the task of conducting Annual Employment - Unemployment Surveys in the country. The objective of this annual survey is to regularly make available the basic inputs on labour force related parameters to facilitate policy formulation/review. The first such Annual Household Employment - Unemployment survey for the period 2009-10 was conducted during the year 2010. Till so far five such surveys have been conducted and thereon reports released. The present one is the Sixth Annual Employment-Unemployment Survey in the series.

2.1 In the current survey, a moving reference period is used to determine the usual status activity of the persons. The survey has been conducted in all the States/UTs by covering all the districts in the country. The field work of the present survey was launched in August, 2016 and completed in majority of the States/UTs by March, 2017. A

sample of about 1.56 lakh household schedules has been covered during the survey in 36 States/UTs.

2.2 Sample Design: A stratified multi-stage sample design has been adopted for the Sixth Annual Household Employment - Unemployment Survey. The first stage units (FSU) for rural sector are the 2011 census villages in all the States/UTs, except Kerala State, where panchayat wards are the FSUs. In case of urban sector, the latest available Urban Frame Survey (UFS) blocks for the period 2007-12 prepared by National Sample Survey Office are the First stage units.

2.3 Stratification: Each district of a State/UT has been divided into two strata: i) rural stratum comprising of all the rural areas of the district and ii) urban stratum comprising of all the urban areas of the district.

2.4 Sample Size: In all 36 States/UTs, a total sample of 13065 First Stage Units (FSUs) is

allocated at All India level keeping in view the resource availability and other logistics. Broadly considering the population proportion, a sample of 7409 FSUs is allocated to rural sector in all the 36 States/UTs, while rest 5656 FSUs are allocated in the urban sector. While allocating the sample, additional weightage is given to the urban sector as compared to rural sector; so that the urban areas are not under represented in the survey on the basis of proportional allocation, with the condition that in major states the total sample size in urban sector does not exceed that of the rural sector.

2.5 Allocation of Sample to States/UTs: Distribution of total number of sample FSUs in rural sector among the States/UTs is done in proportion to their respective rural population as per 2011 census, subject to a minimum sample allocation to each State/UT. For urban sector, the sample FSUs are allocated among the 36 States/UTs in proportion to the UFS blocks for the period 2007-12. A minimum sample size in a State/UT is allocated at 24 FSUs with a

minimum of 12 each in rural and urban areas.

2.6 Allocation of State/UT level rural and Urban Stratum sample to districts: The State/UT level rural/ urban sample is further distributed among its districts in proportion to rural/ urban population/urban frame survey blocks. A minimum of 24 FSUs are allocated to each State/UT for rural and urban areas combined. Stratum level sample is adjusted to multiple of 4 FSUs with a minimum sample size of 4 FSUs in a stratum. In case of some North Eastern States and UTs a marginal increase in sample size is done due to their under representation in overall sample because of their lower population.

2.7 Selection of FSUs: For the rural stratum, the village lists based on 2011 census frame are taken in the same order and the required sample is drawn by using circular systematic sampling technique with probability proportional to size (size being the population of the village as per Census 2011). In case of urban stratum, the UFS blocks are arranged in ascending order based on the town variable. After

arranging UFS blocks, sample is drawn by circular systematic sampling. This arrangement is done to ensure that most of the towns are represented in the sample. In both, the rural and the urban strata, samples are drawn in the form of two independent sub-samples.

2.8 Criteria for hamlet group/sub block formation: Large FSUs having approximate present population of 1200 or more are divided into a suitable number (say, D) of 'hamlet-groups'(hg) in the rural sector and 'sub-blocks'(sb) in the urban sector as stated below.

Approximate present population of the sample village/ urban block	No. of hg/sb to be formed (d)
Less than 1200 (no hamlet-group/sub block)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

2.9 For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except Dehradun plains, Nainital Plains, Haridwar and Udham Singh Nagar), Poonch, Rajouri,

Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu & Kashmir and Idukki district of Kerala, the number of hamlet groups are formed as follows:

Approximate present population of the sample village/ block	No. of hgs/ sbs to be formed (d)
Less than 600 (no hamlet-groups/sub blocks)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

2.10 Selection of hamlet groups/sub blocks:

In case of large village/UFS block wherever hamlet-groups/sub-blocks have been formed, two hamlet-groups/sub-blocks are selected. The procedure to select the hg/sb is as follows:

- i) The hg/sb with maximum percentage share of population will always be selected and termed as hg/sb 1.
- ii) Second hg/sb will be selected from the remaining hgs/sbs by simple random sampling and termed as hg/sb 2.

Listing and selection of the households will be done independently in the two selected hamlet-groups/sub-blocks. In case hamlet-groups/sub-blocks is formed in a sample FSU, it is ensured that the hamlet-groups/sub-blocks formed are clearly identifiable in terms of physical landmarks. The FSU without hg/sb formation will be treated as sample hg/sb number 1.

2.11 Listing of households: After determining the hamlet-groups/sub-blocks i.e. areas to be

considered for listing, all the households in that area will be listed (including those found to be temporarily locked after ascertaining the temporariness of locking of households through local people). The hamlet-group/sub-block with sample hg/sb number 1 will be listed first and that with sample hg/sb number 2 will be listed next.

2.12 Formation of Second Stage Strata and allocation of households:

For canvassing the schedules, all the households listed in selected FSU/ hamlet-groups/ sub-blocks are to be stratified into four second stage strata (SSS) as given below:

The second-stage-strata in the rural and urban stratum will be formed based on the number of persons in a household aged 15 years and above. The four second-stage-strata (SSS) in the rural and urban strata are formed in the following order:

2.13 Allocation of households:

The number of households to be surveyed (h) in each second stage stratum in the sample FSUs is as follows:

Second Stage Strata (SSS)	No. of members in the household aged 15 years & above
SSS1	1
SSS2	2-3
SSS3	4-5
SSS4	6 & more

SSS	Without hg/sb formation		With hg/sb formation in both rural and urban starta	
	Rural	Urban	hg1/sb1	hg2/sb2
h1	1	1	1	1
h2	3	4	2	2
h3	4	4	2	2
h4	4	3	1	1
Total	12	12	6	6

2.14 Selection of Households:

From each Second Stage Strata the sample households are selected by simple random sampling without replacement.

2.15 Shortfall of households to be compensated: Shortfall of households in the frame of any particular SSS will be compensated from the same SSS of the other hg/sb or from the other SSS of the same or other hg/sb where additional household(s) are available. The procedure is as follows:

Step 1: Allocate the required number of households to each SSS wherever possible and identify the SSS having shortfall.

Step 2: In case of hg/sb formation, compensate from the same SSS of the other hg/sb, if available. Otherwise, go to Step 3.

Step 3: Find the SSS where additional households are available following the priority order of SSS 1, SSS 2, SSS 3 & SSS 4 and compensate.

2.16 The table given below may be useful for deciding the SSS from

which the compensation is to be made.

SSS having shortfall	priority order of SSS for compensation
1	2, 3, 4
2	1, 3, 4
3	1, 2, 4
4	1, 2, 3

2.17 If there is hg/sb formation, for each SSS as per priority order, compensation may be made from the hg/sb where shortfall occurs, failing which from other hg/sb and so on.

2.18 For example, if shortfall is in SSS 3 of hg/sb 1, first try to compensate from SSS3 of hg/sb 2, failing which try from SSS 1 of hg/sb 1, failing which try from SSS 1 of hg/sb 2. If the shortfall still remains then try from SSS 2 of hg/sb 1, failing which try from SSS 2 of hg/ sb 2. If the shortfall still remains then try from SSS 4 of hg/sb 1, failing which try from SSS 4 of hg/ sb 2.

Estimation Procedure

t = subscript for t -th stratum

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for i -th FSU (village/panchayat ward/ UFS block)

d = subscript for a hamlet-group/ sub-block ($d = 1, 2$)

j = subscript for j -th second stage stratum in an FSU/hg/sb ($j = 1, 2, 3, 4$)

k = subscript for k -th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 1$ if $D = 1$

$= D-1$ for FSUs with $D > 1$

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum

z = size of selected sample village

n = number of sample FSUs surveyed in a stratum

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

$\bar{X}, \bar{Y}$ = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{tmidjk} = observed value of the characteristic y for the k -th household in the j -th second stage stratum of the d -th hg/ sb ($d = 1, 2$) of the i -th FSU belonging to the m -th sub-sample for the t -th stratum.

Formulae for Estimation of Aggregates for a stratum in a district (rural & urban)

Listing Schedule 'A'

Rural stratum: For estimating the number of households possessing a characteristic in the rural stratum of state.

$$\hat{Y}_{Rural} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1} , y_{i2} are the total number of households possessing the characteristic y in hg's 1 & 2 of the i -th FSU respectively.

Urban Stratum: For estimating the number of households possessing a characteristic in the urban stratum of state.

$$\hat{Y}_{Urban} = \frac{N}{n} \sum_{i=1}^n \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1} , y_{i2} are the total number of households possessing the characteristic y in sub-blocks 1 & 2 of i -th FSU respectively.

Schedule 'B': (Employment – Unemployment Survey Schedule)

Estimation formula for a rural stratum:

Rural:

$$\hat{Y}_{Rural} = \sum_{j=1}^4 \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Estimation formula for an urban stratum:

$$\hat{Y}_{Urban} = \sum_{j=1}^4 \frac{N}{n_j} \sum_{i=1}^{n_j} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate $\hat{Y}$ at the State/ UT/ all-India level is obtained by summing the stratum estimates $\hat{Y}_t$ over all strata belonging to the State/ UT/ All-India.

6th Annual EUS Report 2016-17

Annexure-III

Table (A1): Census Population as on 1st March 2011, percentage decadal change in population of aged 15 years and above between census 2001 and 2011 and projected population as on 1st January 2017 for each State/UT and All-India.

About the Labour Bureau.....

Labour Bureau is an apex organization at the national level providing data for policy formulation, evaluation and research since 1920. The Labour Bureau, in the Union Ministry of Labour and Employment, is the epicenter of all activities involving planning, collection and dissemination of data on various facets of Labour which forms a sound basis for decision making in the Government, industry and by various other user organizations/individuals. Labour Bureau is a store house of important economic indicators like the Consumer Price Index Number for Industrial workers, agricultural and rural labourers, wage rates, industrial relations, socio-economic conditions in un-organized sector, evaluation and review of working of labour legislations in the country and the like. Labour Bureau has been providing uninterrupted services to the national and international fora like ILO since its inception. Today, it has assumed a vital role in the labour matters and acquired an undisputed and indispensable status in the field of labour statistics. Equipped with the expertise of conducting surveys at the National/Regional level in diverse fields and in providing in depth analysis, the organization continues in its pursuit of excellence.
